

General Grazing Reserve Information	
Area:	16,954 acres (6,861 hectares)
Year Established:	1969
Terrain:	Gently rolling to moderately rolling slopes, with several strong slopes present
Vegetation:	Tame pasture and deciduous upland forests
EcoRegion:	Low-boreal mixedwood forest ecosystem
Nearby Municipalities:	17.7 km east of Newbrook
Water Bodies:	Long Lake, Lucky Lake, Saturday Lake, White Earth Creek

Livestock Management Information	
Responsible Association:	Thorhild Grazing Association (privatized April 1, 1999) Looks after livestock and maintains the tame pastures in good, productive condition. Maintains all fence lines, dugouts, one corral system and the buildings at the headquarters.
Grazing Season:	Mid-May to Mid-October
Cattle:	Approximately 8,200 Animal Unit Months (AUMs)
Minimum number of Patrons:	40 patrons
Application:	Please contact 780 645-6336 for grazing allotment application. Application deadline is January 15 th .

Within the Thorhild Provincial Grazing Reserve 9,335 acres (3,777.7 hectares) have been developed as tame pastures. The grey wooded and rocky soil is unsuitable for annual cropping. The reserve can, however, provide productive pasture on these marginal lands.

A number of environmentally sensitive areas in the reserve were left as habitat and to protect the watershed. The area between the west boundary of the reserve and Long Lake Provincial Park is held under the Ministerial Order to protect the steep slopes of Long Lake and White Earth Creek. It has been designated as the White Earth Natural Area.

Provincial Grazing Reserves are popular recreational sites for the general public. Recreational access condition information for Provincial Grazing Reserves can be found at:

- [Recreation on Agricultural Public Land](#)

You must contact the grazing reserve agrologist prior to accessing the reserve at:

- Tel: 780 645-6336
