

Alberta Provincial
Electoral Divisions

Summary Tables

Compiled from the 2016 Census of Canada

Introduction

This report produced by the Office of Statistics and Information presents select summary statistics for Alberta and Provincial Electoral Divisions (PED). A PED is a territorial unit represented by an elected Member to serve in the Alberta Provincial Legislative Assembly. The statistics in this report are based on the electoral boundaries that will be in effect for the 2019 Provincial General Election.

Select characteristics of the PED of Alberta are described with statistics from the 2016 Census of Canada, including: age groups, language, citizenship, immigration, visible minorities, household types, Aboriginal identity, education, labour force characteristics and income.

Users are advised to refer to the endnotes of this profile for further information regarding data quality and definitions.

West Yellowhead	5.7	50,580	3,220	8,515	4,440	14,820	14,315	5,260

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Figures may exclude data for incompletely enumerated Indian reserves or settlements.

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Figures may exclude data for incompletely enumerated Indian reserves or settlements.

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Language spoken most often at home, excluding institutional residents, only includes single responses. 2016 Census language data are largely consistent over time with 2011 Census language data.

² Percentage of the population in private households that are citizens aged 18 or older.

³ Immigrants are persons who are, or have ever been, landed immigrants or permanent residents. Immigrants who have obtained Canadian citizenship by naturalization are included in this category. This category includes immigrants who landed in Canada on or prior to May 10, 2016.

⁴ Refers to whether a person belongs to a visible minority group as defined by the *Employment Equity Act*. Under the *Act*, visible minorities are “persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour.”

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Includes those who reported being an Aboriginal person and/or Registered Indian status and/or membership in a First Nation/Indian band.

² Census family is defined as a married couple and the children, if any, of either and/or both spouses; a couple living common law and the children, if any, of either and/or both partners; or a lone parent of any marital status with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. A couple may be of opposite or same sex. Children may be children by birth, marriage, common-law union or adoption regardless of their age or marital status as long as they live in the dwelling and do not have their own married spouse, common-law partner or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Highest level of education a person has successfully completed and measures the broader concept of 'Educational Attainment'. A person who has completed one type of certification will not necessarily have completed the certification below it in the hierarchy. For example, a person with a trades certificate may not have completed a high school certification.

Vermilion-Lloydminster-Wainwright	4.0	17,460	341,978	85.5	74.7	8.4
West Yellowhead	5.7	19,130	348,410	87.1	74.4	10.5

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ The median dollar amount expected by owners if their dwelling were to be sold (for non-farm, non-reserve private dwellings).

² Labour force status reported during the week of May 1-7, 2016. Population 15 and over.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Total income refers to monetary receipts from certain sources (e.g., employment income, government transfer, Old Age Security, income from investment, spousal support, etc.), before income taxes and deductions, during calendar year 2015.

² Median total income is calculated for those who are at least 15 years of age and who have an income (positive or negative).

* Totals may not add to 100% due to random rounding.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

¹ Economic family refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law union, adoption or a foster relationship.

² Includes all private households.

³ Median total income of all economic family members, before income taxes and deductions for the calendar year of 2015. Total income refers to monetary receipts from certain sources (e.g., employment income, government transfer, Old Age Security, income from investment, spousal support, etc.), before income taxes and deductions, during calendar year 2015.

⁴ Median total income of all household members, before income taxes and deductions for the calendar year of 2015.

** The global non-response rate (GNR) combines both complete non-response (household) and partial non-response (question) into a single rate. The GNR is an indication of data quality, where a smaller GNR suggests greater accuracy and a lower risk of non-response bias. When the GNR is 50% or above, the data are suppressed. The GNR is identified for each region. A higher GNR indicates the need for user caution.

*** Income information for the 2016 census was gathered solely from administrative data sources. Users should caution when comparing 2016 Census income estimates to the NHS, other household income surveys, admin data or earlier census data due to methodological differences. For more information see Income Reference Guide, Census of Population, 2016.

¹ The low-income measure after tax (LIM-AT) is a fixed percentage (50%) of median-adjusted after-tax income of households. The household after-tax income is adjusted to take economies of scale into account. The adjustment for different household sizes reflects the fact that a household's needs increase, but at a decreasing rate, as the number of members increases. LIM-AT is not related or comparable to the low-income cut-offs (LICO) in the 2006 Census.
