Healthy Eating for Children and Youth in Schools

A booklet to help you understand the Alberta Nutrition Guidelines for Children and Youth

✓ Easy to read
✓ Simple steps
✓ Everyday ideas
Schools can help children and youth eat healthy food

What’s inside this booklet?

About this booklet

Healthy food is important for children and youth

Schools can help children and youth eat healthy food

Identify healthy food

✓ Use Canada’s Food Guide (CFG)
✓ Learn about serving sizes
✓ Read labels on food
✓ Use the Alberta Food Rating System from the Alberta Nutrition Guidelines for Children and Youth

What is the Food Rating System?

- Choosing vegetables and fruit
- Choosing grain products
- Choosing milk and alternatives
- Choosing meat and alternatives
- Choosing packaged mixed dishes

Make sure healthy choices are available

✓ Healthy drinks
✓ Healthy snacks
✓ Make a school food policy

Resources

Appendix: Nutrition Guidelines for mixed dishes

© 2014 Government of Alberta
About this booklet

Who is this booklet for?
This easy to read booklet is for students, volunteers and others to support the use of the Alberta Nutrition Guidelines in schools.
- elementary schools
- junior high schools
- high schools
- multi-level schools

This booklet is also for parents and other people who are raising children.

Food guidelines for schools
Healthy food is important for children and youth. Schools can help children eat healthy food.

Schools can follow the *Alberta Nutrition Guidelines for Children and Youth*. The guidelines are from the Alberta government. This booklet will help you understand these guidelines.

You can view and print a PDF of the guidelines (online only).
Go to: www.healthyalberta.com
Healthy food is important for children and youth

Why is healthy food important for children and youth?

- It helps their bodies grow. It helps to form strong teeth, bones and muscles.
- It helps their brains develop.
- It helps protect them against diseases now and in the future.
- It helps them have energy all day long.
- It helps them develop healthy eating habits for life.

Healthy bodies come in different sizes and shapes!
Schools can help children and youth eat healthy food

Many schools provide food for children and youth. For example:

☞ Some schools sell food and drinks in vending machines.

☞ Some schools have canteens, snack shacks or cafeterias.

☞ Some schools provide food and drinks at special events. For example: dances or sports events.

How can schools help children and youth eat healthy food?

1. First, schools can learn how to identify healthy foods and drinks. For example:

☞ In this booklet, you can practice reading food labels.

<table>
<thead>
<tr>
<th>Nutrition Facts</th>
</tr>
</thead>
<tbody>
<tr>
<td>Per 1/2 cup (85 g)</td>
</tr>
<tr>
<td>Amount</td>
</tr>
<tr>
<td>Calories</td>
</tr>
<tr>
<td>Fat</td>
</tr>
<tr>
<td>Saturated</td>
</tr>
<tr>
<td>Trans</td>
</tr>
<tr>
<td>Cholesterol</td>
</tr>
</tbody>
</table>

INGREDIENTS: DURUM WHOLE WHEAT SEMOLINA

2. Next, schools can make sure healthy foods and drinks are available. For example:

☞ In this booklet, you can learn how to make school nutrition policies for vending machines and snack shacks.

☞ Start with small changes.
Use Canada’s Food Guide (CFG)

Canada’s Food Guide has 4 food groups. Look at the boxes below.

Canada’s Food Guide uses a colour for each food group. For example: yellow for grain products. Look for these 4 colours in this booklet.

Watch for coloured checkmarks (√) and circles (●).

Vegetables and fruit

Milk and alternatives

Grain products

Meat and alternatives
Schools should help students follow Canada’s Food Guide

At mealtime

Encourage students to choose from all 4 food groups. For example:

Lunch

✓ cucumber
✓ pita
✓ milk
✓ salmon

At snacktime

Encourage students to choose from 2 food groups. For example:

✓ berries
✓ yogurt

Every day

Encourage students to choose a variety of food within each food group. For example:

Vegetables and fruit

✓ orange juice
✓ leafy salad
✓ raisins
✓ carrots
✓ apple
✓ banana

You can order copies of *Eating Well with Canada’s Food Guide*. You can get the guide in English, French and other languages. There are also food guides for First Nations, Inuit and Métis. See page 47 of this booklet for more information.
Learn about serving sizes

How many servings?

*Canada’s Food Guide (CFG)* recommends the number of servings children and youth need to eat every day. The number of servings is different for different ages.

<table>
<thead>
<tr>
<th>Children ages 5 to 8</th>
<th>Here is an example:</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>3 servings</td>
<td></td>
</tr>
</tbody>
</table>
How big is one serving?

In *Canada’s Food Guide (CFG)*, different types of food have different serving sizes. Here are some examples:

**One CFG serving of milk and alternatives**

- **250 mL (1 cup) milk**
- **175 mL (¾ cup) yogurt**
- **50 g (1½ ounces) cheese**

- Each food is a different amount. But they are all **one serving** of milk and alternatives.

**One CFG serving of vegetables and fruit**

- **1 small or medium fruit**
- **125 mL (½ cup) fruit sauce**
- **40 g (¼ cup) dried fruit**

- Each food is a different amount. But they are all **one serving** of vegetables and fruit.

**Use these icons**

These icons will help you remember the serving sizes for different foods.

- **baseball = 250 mL (1 cup)**
- **tennis ball = 175 mL (¾ cup)**
- **hockey puck = 125 mL (½ cup)**
- **2 golf balls = 60 mL (¼ cup)**
- **2 erasers = 50 g (1½ ounces)**

You will see the icons in this booklet. For example:

- **One serving of cheese (50 g) is about the size of 2 erasers.**
- **One serving of dried fruit (¼ cup) is about the size of 2 golf balls.**
Read labels on food

Many foods come in packages, bags and boxes. In Canada, these packaged foods must have labels.

The labels have important information. For example, you can find a Nutrition Facts table and a list of ingredients.

What should you look for on labels?

Look at the Nutrition Facts table

The Nutrition Facts table shows important nutrients that are in the food. The table also shows how much of these nutrients are in the food.

For example:

☞ How much fat does this yogurt have?
☞ How much sodium (salt) does it have?
☞ How much sugar does it have?

What do the symbols mean?

$g =$ grams

$mg =$ milligrams

$mL =$ millilitres

Nutrition Facts

Per 1/2 cup (175 mL)

</tr>
<tr>
<td>Iron 0 %</td>
<td></td>
</tr>
</tbody>
</table>

It takes time to learn how to read labels. You will practice reading labels throughout this booklet.
Nutrition Facts are for one serving size. What is the serving size on this Nutrition Facts table?

**Per 10 crackers (20 g)**

- The serving size is 20 g.

**Number of servings**

Remember that Canada’s Food Guide (CFG) recommends the number of servings people need to eat every day.

For example:

- Children ages 5 to 8 need 4 servings of grain products.
- Children ages 9 to 12 need 6 servings of grain products.

**How big is one serving?**

Canada’s Food Guide recommends how big one serving should be. For example, one CFG serving of crackers is 20 to 25 g.

- Look at the serving size on the Nutrition Facts table above. Is the serving size about the same as the CFG serving size? **Yes.**

**Always remember**

Nutrition Facts are for **one serving**. But the serving size on the Nutrition Facts table may be different from the CFG serving size.

You will practice comparing serving sizes on pages 17, 21, 27 and 32.
What are Daily Values?

Daily Values give you information about the nutrients in one serving. The Daily Values are for **adults**.

Health Canada has an easy way to understand Daily Values:

- 5% Daily Value or less means the food has a little of this nutrient. 15% Daily Value or more means the food has a lot.

Does one serving of this oatmeal have a little or a lot of calcium? **A little**.

### Daily Values for children and youth

Except for calcium and vitamin D, Daily Values on Nutrition Facts tables do not apply to children and youth.

Look at the list of ingredients

**The order is important**

Packaged foods have a list of ingredients. The order is very important. The first ingredient is the largest by weight.

Here is a list of ingredients for an apple drink.

**INGREDIENTS:** WATER, SUGAR, CONCENTRATED APPLE JUICE, MALIC ACID, NATURAL FLAVOUR, ASCORBIC ACID, COLOUR.

What is the first ingredient? **Water**. It is the largest ingredient by weight. Sugar is the second ingredient.

---

**The type of ingredients is important**

It is important to look at the type of ingredients in foods.

Is this macaroni made from 100% whole grain? **Yes**.

**INGREDIENTS:** DURUM WHOLE WHEAT SEMOLINA.

Is this macaroni made from 100% whole grain? **No**.

**INGREDIENTS:** ENRICHED WHEAT FLOUR.
Use the Alberta Food Rating System

What is the Food Rating System?

The Alberta Food Rating System is part of the Alberta Nutrition Guidelines for Children and Youth. The Food Rating System puts foods into 3 groups:

1. **Choose Most Often**
2. **Choose Sometimes**
3. **Choose Least Often**

Look at the examples below.

---

**Choose Most Often group**

There are many Choose Most Often foods. Here are some examples:

- Fruits
- Vegetables
- Whole grains
- Nuts
- Soy
- Low-fat milk

---

**Choose Sometimes group**

Examples:

- Cereals
- Popcorn
- Yogurt
- Baked goods
- Soft drinks

Choose Most Often and Choose Sometimes foods can look the same. But Choose Sometimes foods have more fat, sugar or salt. Use the Food Rating System to make healthy choices.

---

**Choose Least Often group**

Examples:

- Chips
- Ice cream
- Doughnuts
- Hamburgers
- Soft drinks
- Apple drinks
- Coca

Use the Food Rating System to choose foods that have:

- less fat
- less sugar
- less salt
The Nutrition Guidelines have recommendations for foods and drinks that can be served and sold in schools. For example: in vending machines, snack shacks, canteens and cafeterias.

**Recommendations for foods served and sold in schools**

There are different recommendations for different types of schools. See below.

<table>
<thead>
<tr>
<th>Elementary schools</th>
<th>Multi-level schools</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of food should be from the <strong>Choose Most Often</strong> group.</td>
<td>100% of food should be from the <strong>Choose Most Often</strong> group.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Junior high schools</th>
<th>High schools</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least 60% of food should be from the <strong>Choose Most Often</strong> group.</td>
<td>At least 50% of food should be from the <strong>Choose Most Often</strong> group.</td>
</tr>
<tr>
<td>Up to 40% of food can be from the <strong>Choose Sometimes</strong> group.</td>
<td>Up to 50% of food can be from the <strong>Choose Sometimes</strong> group.</td>
</tr>
</tbody>
</table>

**Note:** Cafeterias should use **Choose Most Often** ingredients when they prepare food.

A sample vending machine for a junior high school

- 60% **Choose Most Often** foods
- 40% **Choose Sometimes** foods

On pages 14 to 39, you will learn how to use the Food Rating System. You will learn how to choose foods from the **Choose Most Often** group and the **Choose Sometimes** group.

Use Alberta’s Food Rating System

© 2014 Government of Alberta
Use the Food Rating System—choosing vegetables and fruit

Pages 14 and 15 will help you choose vegetables and fruit from the Choose Most Often group.

Page 16 will help you choose vegetables and fruit from the Choose Sometimes group.

You will practice reading a label for vegetables and fruit on page 17.

Choose Most Often

100% fresh and dried

How big is one CFG serving?

- 1 small or medium vegetable or fruit
- 125 mL (½ cup) vegetables or fruit
- 40 g (¼ cup) dried fruit with no added sugar
- 250 mL (1 cup) leafy salad

Most fresh vegetables and fruit do not have labels. All fresh and dried vegetables and fruit are healthy!

Canned and frozen

How big is one CFG serving?

- 125 mL (½ cup) vegetables or fruit
- 125 mL (½ cup) fruit sauce

Read the label

The food should be 100% vegetables or fruit. One serving should have:

- no more than 100 mg of sodium
- no added sugar and no artificial sweeteners
**Dried fruit or vegetable bars and snacks**

**How big is one CFG serving?**

- 14 g dried fruit bar (or dried fruit and vegetable bar)
- 20 g dried fruit snacks

**Read the label**

The food should be 100% vegetables or fruit. One serving should have:
- no more than 100 mg of sodium
- no more than 20 g of sugars
- no added sugar and no artificial sweeteners

**Baked with added fat**

**How big is one CFG serving?**

- 50 g (½ cup) vegetables or fruit, baked from fresh or frozen
- 125 mL (½ cup) whole vegetable or fruit product

**Read the label**

One serving should have:
- no more than 5 g of fat
- no more than 2 g of saturated fat
- no trans fat
- no more than 100 mg of sodium
- no added sugar and no artificial sweeteners

**Juice**

**How big is one CFG serving?**

- 125 mL (½ cup) juice

**Read the label**

The juice should be 100% juice. One serving should have:
- no more than 100 mg of sodium
- no added sugar and no artificial sweeteners

**Tip:** Check labels for artificial sweeteners. Some examples: aspartame, sorbitol, sucralose.

**Did you know?** The Food Rating System uses the same serving sizes as *Canada’s Food Guide.*
## Choose Sometimes

### Processed vegetables and fruit

**How big is one CFG serving?**

- 125 mL (½ cup) frozen or canned vegetables or fruit
- 125 mL (½ cup) juice
- 125 mL (½ cup) fruit sauce
- 40 g (60 mL or ¼ cup) dried fruit with added sugar
- 14 g fruit and vegetable bar
- 20 g dried fruit or vegetable snacks
- 125 mL (½ cup) vegetable or fruit product
- 250 mL (1 cup) salad
- 125 mL (½ cup or 50 g) baked vegetable or fruit product

**Read the label**

One serving should have:
- no more than 10 g of fat
- no more than 4 g of saturated fat
- no trans fat
- no more than 300 mg of sodium
- no more than 16 g of sugars* and no artificial sweeteners

**Exception**

* One serving of dried fruit or dried fruit/vegetable snacks must have less than 30 g of sugars.
Let’s look at a label—vegetables and fruit

### Apple sauce

**Step 1:** One CFG serving of fruit sauce is 125 mL (½ cup).

These Nutrition Facts are for 125 mL (½ cup).

Are the serving sizes the same? Yes. This means it is easy to use the Food Rating System with this food.

**Step 2:** What does the Food Rating System recommend for fruit sauce? See page 14 for Choose Most Often and page 16 for Choose Sometimes.

**Step 3:** Now compare the Nutrition Facts for this apple sauce with the Food Rating System recommendations in Step 2. For example:

- Does this apple sauce have less than 100 mg of sodium (Choose Most Often)?
- Does it have less than 300 mg of sodium (Choose Sometimes)?

Finish comparing this apple sauce with the Choose Most Often and Choose Sometimes recommendations.

**Step 4:** This apple sauce is:

- [*] a Choose Most Often food
- [ ] a Choose Sometimes food
- [ ] Neither

---

</table>

**INGREDIENTS:** APPLES, ASCORBIC ACID.

Is this fruit sauce 100% fruit? Yes.
There is no added sugar.
Use the Food Rating System—choosing grain products

Pages 18 and 19 will help you choose grain products from the **Choose Most Often** group.

Page 20 will help you choose grain products from the **Choose Sometimes** group.

You will practice reading a label for grain products on page 21.

### Choose Most Often

**Whole grain cereal, breads and pasta**

**How big is one CFG serving?**

- 35 g bread, bun, naan, roti, pita, wrap, pizza crust or baked bannock
- ½ bagel (45 g)
- 20 g to 25 g crackers
- 2 medium rice cakes
- 175 mL (¾ cup) or 175-190 g hot cereal
- 250 mL (1 cup) or 30 g cold cereal
- 125 mL (½ cup) cooked or 43 g uncooked grains or pasta
- 125 mL cooked (or 25 g uncooked) brown, wild or brown parboiled rice
- 125 mL (½ cup) cooked congee or polenta
- 500 mL (2 cups) air-popped popcorn

**Read the label**

One serving should have:

- no more than 3 g of fat
- no more than 1 g of saturated fat
- no trans fat
- no more than 140 mg of sodium
- 2 g of fiber or more
- no more than 8 g of sugars
- and no artificial sweeteners
### Whole grain baked products

**How big is one CFG serving?**

- ½ muffin (35 g)
- 35 g quickbread
  (For example: banana bread.)
- 30 to 38 g granola bar
  or cookies
- 35 g pancake or waffle

**Read the label**

The baked food should be made with whole grains. One serving should have:

- no more than 5 g of fat
- no more than 2 g of saturated fat
- no trans fat
- no more than 200 mg of sodium
- 2 g of fiber or more
- no more than 10 g of sugars and no artificial sweeteners

### Baked whole grain products with vegetables and fruit

**How big is one CFG serving?**

- ½ muffin (35 g)
- 35 g quickbread
  (For example: banana bread.)
- 30 to 38 g granola bar
  or cookies
- 30 to 35 g (⅓ cup or 80 mL)
  granola type cereal
- 35 g pancake or waffle

**Read the label**

The baked food should be made with whole grains. One serving should have:

- no more than 5 g of fat
- no more than 2 g of saturated fat
- no trans fat
- no more than 200 mg of sodium
- 2 g of fiber or more
- no more than 12 g of sugars and no artificial sweeteners
Cereals and grain products and baked goods

<table>
<thead>
<tr>
<th>How big is one CFG serving?</th>
<th>Read the label</th>

Let’s look at a label—grain products

**Crackers**

**Step 1:** One CFG serving of crackers is **20 to 25 g**.

These Nutrition Facts are for **20 g**.

Are the serving sizes about the same? **Yes.** This means it is easy to use the Food Rating System with this food.

**Step 2:** What does the Food Rating System recommend for crackers? See page 18 for **Choose Most Often** and page 20 for **Choose Sometimes**.

**Step 3:** Now compare the Nutrition Facts for these crackers with the Food Rating System recommendations in Step 2. For example:

- Do these crackers have 3 g of fat or less (**Choose Most Often**)?
- Do they have 10 g of fat or less (**Choose Sometimes**)?

Finish comparing these crackers with the **Choose Most Often** and **Choose Sometimes** recommendations.

**Step 4:** These crackers are:
- a **Choose Most Often** food
- a **Choose Sometimes** food
- Neither

**INGREDIENTS:** WHOLE GRAIN WHEAT, SOYABEAN OIL, SALT.

Whole grain wheat is the first ingredient in the list.
Use the Food Rating System—choosing milk and alternatives

Pages 22 to 24 will help you choose milk and alternatives from the **Choose Most Often** group.

Pages 24 to 26 will help you choose milk and alternatives from the **Choose Sometimes** group.

You will practice reading a label for milk and alternatives on page 27.

---

The information on these pages is from the *Alberta Nutrition Guidelines for Children and Youth*.

---

### Choose Most Often

#### Milk

**How big is one CFG serving?**

- 250 mL (1 cup) milk (skim, 1% or 2% milk)

#### Fortified soy beverage

**How big is one CFG serving?**

- 250 mL (1 cup) soy beverage

---

**Read the label**

One serving should have:

- no more than 5 g of fat
- no more than 3 g of saturated fat
- no more than 0.3 g of trans fat
- no more than 120 mg of sodium
- no more than 12 g of sugars and no artificial sweeteners
- 8 g of protein or more
- at least 30% DV of calcium
- at least 44% DV of vitamin D

**Read the label**

One serving should have:

- no more than 5 g of fat
- no more than 1 g of saturated fat
- no trans fat
- no more than 120 mg of sodium
- no more than 9 g of sugars and no artificial sweeteners
- 6 g of protein or more
- at least 30% DV of calcium
- at least 44% DV of vitamin D
Yogurt or kefir (from milk)

How big is one CFG serving?

- 175 mL (¾ cup)

Read the label

One serving should have:
- no more than 3 g of fat
- no more than 2 g of saturated fat
- no more than 0.3 g of trans fat
- no more than 120 mg of sodium
- no more than 12 g of sugars and no artificial sweeteners
- 6 g of protein or more
- at least 15% DV of calcium

Soygurt (like yogurt but made from soy)

How big is one CFG serving?

- 175 mL (¾ cup)

Read the label

One serving should have:
- no more than 3 g of fat
- no more than 1 g of saturated fat
- no trans fat
- no more than 50 mg of sodium
- no more than 9 g of sugars and no artificial sweeteners
- 6 g of protein or more
- at least 15% DV of calcium

Cottage cheese

How big is one CFG serving?

- 125 mL (½ cup or 115 g)

Read the label

One serving should have:
- no more than 5 g of fat

Remember! The Food Rating System uses the same serving sizes as Canada’s Food Guide.
Hard or soft cheese (from milk)

How big is one CFG serving?

• 50 g

Read the label

One serving should have:

- no more than 10 g of fat
- no more than 6 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 350 mg of sodium for hard
- no more than 200 mg of sodium for soft
- 8 g of protein or more

Fortified soya loaf and slices (like cheese)

How big is one CFG serving?

• 50 g

Read the label

One serving should have:

- no more than 5 g of fat
- no more than 1 g of saturated fat
- no trans fat
- no more than 350 mg of sodium
- 6 g of protein or more

Choose Sometimes

Flavoured milk

How big is one CFG serving?

• 250 mL (1 cup) skim, 1% or 2%

Read the label

One serving should have:

- no more than 6 g of fat
- no more than 4 g of saturated fat
- no more than 0.3 g of trans fat
- no more than 200 mg of sodium
- no more than 21 g of sugars and no artificial sweeteners
- 5 g of protein or more
- at least 30% DV of calcium
- at least 44% DV of vitamin D
Yogurt, yogurt drink, cottage cheese

How big is one CFG serving?

- 175 mL (⅜ cup) yogurt
- 200 mL (0.8 cup) yogurt drink
- 125 mL (½ cup) cottage cheese

Read the label

One serving should have:

- no more than 5 g of fat
- no more than 3 g of saturated fat
- no more than 0.3 g trans fat
- no more than 120 mg of sodium
- no more than 20 g of sugars and no artificial sweeteners
- 5 g of protein or more

Hard or soft cheese (from milk)

How big is one CFG serving?

- 50 g

Read the label

One serving should have:

- no more than 20 g of fat
- no more than 10 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 450 mg of sodium for hard cheese
- no more than 350 mg of sodium for soft cheese
- 6 g of protein or more

Pudding (from milk)

How big is one CFG serving?

- 125 mL (½ cup)

Read the label

One serving should have:

- no more than 3 g of fat
- no more than 2 g of saturated fat
- no more than 0.3 g of trans fat
- no more than 200 mg of sodium
- no more than 20 g of sugars and no artificial sweeteners
- 4 g of protein or more
- at least 10% DV of calcium
Flavoured soy beverage

How big is one CFG serving?

- 250 mL (1 cup)

Note: The soy beverage must be fortified.

Read the label

One serving should have:
- no trans fat
- no more than 150 mg of sodium
- no more than 20 g of sugars and no artificial sweeteners
- 5 g of protein or more
- at least 30% DV of calcium
- at least 44% DV of vitamin D

Soygurt (like yogurt but made from soy)

How big is one CFG serving?

- 175 mL (¾ cup)

Read the label

One serving should have:
- no more than 5 g of fat
- no more than 1 g of saturated fat
- no trans fat
- no more than 120 mg of sodium
- no more than 20 g of sugars and no artificial sweeteners
- 5 g of protein or more
- at least 15% DV of calcium

Fortified soya loaf and slices (like cheese)

How big is one CFG serving?

- 50 g

Read the label

One serving should have:
- no more than 8 g of fat
- no more than 2 g of saturated fat
- no trans fat
- no more than 400 mg of sodium
- 6 g of protein or more
Let’s look at a label—milk and alternatives

Chocolate milk

Step 1: One CFG serving of milk is 1 cup (250 mL).

These Nutrition Facts are for 1 cup (250 mL).

Are the serving sizes the same? Yes.

Step 2: What does the Food Rating System recommend for flavoured milk? See page 24 for Choose Sometimes. Flavoured milk is not a Choose Most Often food.

Step 3: Now compare the Nutrition Facts for this chocolate milk with the Food Rating System recommendations in Step 2. For example:

Does this milk have 21 g of sugars or less?

Finish comparing this milk with the Choose Sometimes recommendations.

Step 4: This chocolate milk is:

☐ a Choose Most Often food
☒ a Choose Sometimes food
☐ Neither

This chocolate milk has added sugar and salt.

INGREDIENTS: PARTLY SKIMMED MILK, SUGAR, COCOA POWDER, SALT, CARRAGEENAN, COLOUR, ARTIFICIAL FLAVOUR, VITAMIN A PALMITATE, VITAMIN D3.
Use the Food Rating System—choosing meat and alternatives

Pages 28 to 30 will help you choose meat and alternatives from the **Choose Most Often** group.

Page 31 will help you choose meat and alternatives from the **Choose Sometimes** group.

You will practice reading a label for meat and alternatives on page 32.

---

**Examples of meats**

- beef
- pork and ham
- lamb
- bison
- wild game (wild meat)*
  For example: deer, elk, rabbit.

* Wild meat must be prepared at a federally inspected plant.

---

**Examples of fish**

- tuna
- salmon
- cod
- mackrel
- herring
- sardines
- shrimp
- crab
- squid

---

**Examples of poultry**

- chicken
- turkey
- duck
- goose

---

**Examples of alternatives**

- eggs
- legumes
- tofu
- nuts

---

**Remember!** The Food Rating System uses the same serving sizes as *Canada’s Food Guide*. 

---

© 2014 Government of Alberta
Choose Most Often

Meat, fish and poultry

**How big is one CFG serving?**
- 75 g (2.5 ounces) cooked or canned meat, fish or poultry
- 125 mL (½ cup) ground cooked meat or poultry

**Read the label**
One serving should have:
- no more than 10 g of fat
- no more than 3 g of saturated fat
- no more than 0.5 g trans fat
- no more than 200 mg of sodium
- 14 g of protein or more

**Tip:** Choose lean meats. Cut off extra fat before you cook the meat. Drain off fat after you cook the meat.

Deli meats (luncheon meats)

Here are some examples of deli meats:
- sliced sandwich meat
- sausage

**How big is one CFG serving?**
- 75 g (2.5 ounces) or 125 mL (½ cup) cooked

**Read the label**
One serving should have:
- no more than 5 g of fat
- no more than 3 g of saturated fat
- no more than 0.5 g trans fat
- no more than 350 mg of sodium
- 10 g of protein or more

**Tip:** Watch out for salt and fat in deli meats. Too much salt and fat are not healthy.
Use Alberta’s Food Rating System

Alternatives

How big is one CFG serving?

- 2 eggs
- 175 mL (¾ cup) legumes (soaked, cooked or canned)
- 175 mL (¾ cup or 150 g) tofu
- Nuts and seeds, plain and unsalted
  - about 20 almonds (60 mL or 36 g)
  - about 10 walnuts or pecans (25 g)
- About 46 peanuts (60 mL or 37 g)
- 30 mL (2 tbsp.) nut butter
  (For example: peanut, cashew, or almond butter.)

Read the label

One serving should have:
- no more than 10 g of fat*
- no more than 3 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 200 mg of sodium**
- no added sugar and no artificial sweeteners
- 6 g of protein or more

Exceptions
- *Nuts, seeds and nut/seed butters can have more fat. But the fat must be natural (not added).
- **Nuts, seeds and nut/seed butters should have no added sodium (salt).

Note: Some students may be allergic to peanuts or nuts. Does your school have a food allergy policy?
Choose Sometimes

Meat, fish and poultry

How big is one serving?
- 75 g (2.5 oz.) cooked or canned
- 125 mL (½ cup) ground cooked

Read the label
One serving should have:
- no more than 10 g of fat
- no more than 6 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 400 mg of sodium
- 7 g of protein or more

Deli meats

How big is one serving?
- 75 g (2.5 ounces)
  or 125 mL (½ cup) cooked

Read the label
One serving should have:
- no more than 10 g of fat
- no more than 6 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 400 mg of sodium
- 7 g of protein or more

Alternatives

How big is one serving?
- 2 eggs
- 175 mL (¾ cup) legumes
  (soaked, cooked or canned)
- 175 mL (¾ cup or 150 g) tofu
- Nuts and seeds
  For example:
  - about 20 almonds (36 g)
  - about 10 walnuts or pecans (25 g)
- About 46 peanuts (60 g or 37 g)
- 30 mL (2 tbsp.) nut butter
  (For example: peanut, cashew,
  or almond butter.)

Read the label
One serving should have:
- no more than 10 g of fat*
- no more than 6 g of saturated fat
- no more than 0.5 g of trans fat
- no more than 400 mg of sodium
- no more than 3 g of sugars and
  no artificial sweeteners
- 7 g of protein or more

Exception
* Nuts, seeds and nut/seed butters
  can have more fat. But the fat must
  be natural (not added).
Let’s look at a label—meat and alternatives

Almonds

Step 1: One CFG serving of almonds is 36 g (about 20 almonds).

These Nutrition Facts are for 60 g.

Are the serving sizes the same? No. This means you have to do some math.

\[ \frac{36}{60} = 0.6 \]

One CFG serving of almonds is 0.6 times the serving size for these Nutrition Facts.

Step 2: What does the Food Rating System recommend for almonds? See page 30 for Choose Most Often and page 31 for Choose Sometimes.

Step 3: Compare the Nutrition Facts for these almonds with the Food Rating System recommendations in Step 2.

Remember, the serving size on this package of almonds is more than the CFG serving size. You must multiply the numbers on the Nutrition Facts table by 0.6.

One CFG serving of these almonds has:

- no added fats
- no trans fat, no sodium, no added sugar and no artificial sweeteners
- 7.8 g of protein (13 g x 0.6 = 7.8 g)

Step 4: These almonds are:

☒ a Choose Most Often food
☐ a Choose Sometimes food
☐ Neither

INGREDIENTS: ALMONDS.
Use the Food Rating System—choosing packaged mixed dishes

Some packaged foods have ingredients from more than one food group. These foods are called mixed dishes. For example:
- burritos
- casseroles
- frozen dinners
- pizzas
- sandwiches
- smoothies
- soups

The Food Rating System has recommendations for packaged mixed dishes. The Food Rating System uses 3 groups of mixed dishes:
1. meat, fish or poultry based
2. vegetarian based
3. soups

The recommendations look like Nutrition Facts tables. Look at the example on the right.

On pages 34 to 39, you will practice using the Food Rating System for mixed dishes.

Note: The tables for mixed dishes are at the back of this booklet.

Meat/Fish/Poultry Based

<table>
<thead>
<tr>
<th>Nutrition Facts</th>

Step 4: Compare the Nutrition Facts for the burrito with the recommendations in the 2 tables above. For example:

- Is the amount of protein in the burrito greater than or equal to 10 g? Yes.

Step 5: This burrito is:
- a Choose Most Often dish
- a Choose Sometimes dish
- Neither
Healthy drinks

Water first
Children and youth need to drink water every day. Water should always be available.

Does your school let students have water bottles at their desks?

Healthy drinks
Healthy drinks should be available at school. For example:

- water
- milk (skim, 1%, 2%)
- fortified soy beverages
- 100% fruit juices
- 100% vegetable juices (low salt)

Milk with meals
Encourage students to drink milk or a fortified soy beverage with meals.

Not too much juice
Remember that one CFG serving of juice is only 125 mL (½ cup).

Encourage students to eat vegetables and fruit more often than juice.

Avoid sugary drinks
Many drinks have lots of sugar and few nutrients. For example:

- fruit drinks
- fruit punches
- sports drinks
- ice slushes

These drinks are not healthy for children and youth. They are **not** Choose Most Often foods.

Avoid caffeine
Encourage students to avoid drinks with caffeine. For example:

- black tea
- coffee
- pop with caffeine
- energy drinks
### How much sugar is in 1 cup (250 mL) of these drinks?

<table>
<thead>
<tr>
<th>Choose Most Often</th>
<th>1% milk: 12 g of natural sugar</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% orange juice: 28 g of natural sugar</td>
<td></td>

<table>
<thead>
<tr>
<th>Choose Least Often</th>
<th>fruit punch: 28 g of sugar</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>added sugar</td>
</tr>
</tbody>
</table>

|                                   | cola: 40 g of sugar               |
|                                   | added sugar                       |

4 g of sugar = 1 sugar cube (1 teaspoon)

### Serving sizes

Many sugary drinks come in large bottles and cups. These drinks have a lot of sugar. For example:

- One litre of pop might have 96 grams of sugar!
- One litre of ice slush might have 133 grams of sugar!

### Healthy drinks

Make sure healthy drinks are available at your school.
Healthy drinks

Vending machines: drinks

Does your school have a policy about healthy drinks in vending machines? Here are some things to think about.

Possible drinks for school vending machines

Choose Most Often group

- water
- milk (skim, 1% or 2%)
- fortified soy beverages
- 100% fruit juice

Choose Sometimes group

- chocolate milk or other flavoured milk
- flavoured fortified soy beverages
- 100% vegetable juice (low salt)

Remember to read the labels. Look for added sugar and salt.

What size should drinks be?
Water can be any size. Juice and other drinks should be no more than 1 to 2 CFG servings. For example:

- ½ cup (125 mL) apple juice
- 1 cup (250 mL) orange juice
- 1 cup (250 mL) milk

Encourage students to drink water throughout the day.
Encourage students to choose healthy drinks.
Many schools sell snacks in vending machines, canteens and snack shacks. How can you make sure healthy snacks are available in your school? Here are some tips.

**Placement**

- Put the healthiest snacks at eye level in vending machines. In the canteen or snack shack, make healthy snacks visible.

**Size**

- Make sure that individual snacks are not too big. Check *Canada’s Food Guide* for recommended serving sizes.

**Price**

- Healthy snacks should not cost more than less healthy snacks.

**Advertising**

- Make sure that posters and flyers in your school show only healthy snacks.

---

**Special events**

Schools often provide snacks at special events. For example:

- at dances
- on sports days

Make healthy snacks clearly visible at special events. Provide only small portions of less healthy snacks.

**Small steps**

- Start with small, simple changes. It will take time for students and staff to learn about the Nutrition Guidelines.
- It might take time to find vendors who can supply healthier snacks.
Does your school have a policy about healthy snacks in vending machines? Does the policy follow the Nutrition Guidelines for your type of school? See page 13.

Have you checked the Nutrition Facts for each food in your school’s vending machines? Are they Choose Most Often or Choose Sometimes foods?

**Using a non-refrigerated vending machine**

Here are some good choices for a non-refrigerated vending machine.

**Choose Most Often examples:**
- almonds, plain and unsalted
- apple chips (100% fruit)
- diced fruit in 100% fruit juice
- dried fruit/vegetable bar (100% fruit)
- fruit sauce (unsweetened)
- raisins

**Choose Sometimes examples:**
- diced fruit with added sugar
- granola bar with chocolate chips
- nuts with added salt
- tuna salad kit

**Using a refrigerated vending machine**

Here are some good choices for a refrigerated vending machine.

**Choose Most Often examples:**
- fresh fruit
- raw vegetables
- whole wheat crackers and hard cheese
- yogurt from milk or soygurt

**Choose Sometimes examples:**
- flavoured yogurt from milk or soygurt
Snack shacks and canteens: healthy snacks

Does your school have a policy about healthy snacks for snack shacks and canteens? Here are some good food choices.

Always check the food labels. Use the Nutrition Guidelines to help you choose healthy snacks.

Refrigerated foods

Choose Most Often examples:
- boiled eggs
- celery with peanut butter topped with raisins
- fresh fruit
- homemade smoothie
- raw vegetables
- whole wheat crackers and hard cheese
- yogurt from milk or soygurt

Choose Sometimes examples:
- flavoured yogurt from milk or soygurt
- yogurt drink
- yogurt and granola

Non-refrigerated foods

Choose Most Often examples:
- almonds, plain and unsalted
- apple chips (100% fruit)
- whole wheat bagel, small
- dried fruit/vegetable bar (100% fruit)
- fresh fruit
- fruit sauce (unsweetened)
- instant oatmeal (no sugar added)
- popcorn (plain, air-popped)
- raisins

Choose Sometimes examples:
- diced fruit/vegetables with added sugar
- graham crackers (reduced fat)
- granola bar
- oatmeal cookie
- low fat microwave popcorn
- tuna salad kit

Make a school food policy

How can you serve and sell healthy food at your school? Start by making a food policy. Here are 5 steps you can follow.

Step 1 — Form a committee
Ask people from different groups to be part of a food policy committee. For example, you can ask:

- students
- parents
- teachers
- vendors

Step 2 — Talk about goals
Talk about what you want to do. For example:

- Why do we need a food policy?
- What changes do we want to make?
- What are the steps we need to take?
- How long will it take to make the changes?

Step 3 — Write your policy
Decide on the most important issues. For example:

- vending machines, snack shacks and canteens
- portion sizes
- food prices
- adults modelling healthy eating

Step 4 — Decide on a plan
Give students, teachers and staff time to change the way they choose foods. Start with small, simple changes.

Step 5 — Evaluate the changes
Check on how the food policy is working. Use a questionnaire to ask students, teachers and parents about the changes. For example:

- Have you changed the way you choose foods?
- Are there enough healthy choices in the vending machines?
- What other changes would be good?

To do in January

- January 3: Remove pop from vending machines.
- January 16: Start selling fresh fruit at the canteen.
- January 27: Food Policy Committee meeting
Resources

Eating Well with Canada’s Food Guide
You can get Eating Well with Canada’s Food Guide in English or French. You can also get the guide in 10 different languages. There are also food guides for First Nations, Inuit and Métis.

There are 3 ways to get the guide.
1. You can view it on your computer screen.
2. You can print a PDF copy of the guide.
3. You can order a copy of the guide.

Go to:

Alberta Nutrition Guidelines for Children and Youth
The Alberta Nutrition Guidelines for Children and Youth has information to help schools serve healthy food.

Food safety
The Canadian Partnership for Consumer Food Safety Education has a website with food safety tips. You can view and print a PDF of the tips.
