### Endnotes:

For Rimbey-Rocky Mountain House-Sundre, the total non-response rate (TNR) for the short-form census questionnaire is 6.9% and for the long-form census questionnaire is 12.4%. The TNR reflects only total non-response, meaning all questions were unanswered or the returned questionnaire did not meet minimum content. The TNR is an indication of data quality, where a smaller TNR suggests a lower risk of non-response bias and therefore, more reliable figures and estimates. When the TNR is 50% or above, the data should be used with caution. The TNR is identified for each region.

Data in this report have been specifically tabulated from the 2021 Census of Canada, by allocation of the Statistics Canada block face reference points to Alberta Provincial Electoral Division.

Income statistics presented in this report are based on 25% sample data from the 2021 Census. Statistics Canada has also released income statistics from the 100% data. As such, income statistics for Alberta in this report may not match data presented elsewhere.

- \* Totals may not add to 100% due to random rounding.
  - \*\* 100% data (short-form census questionnaire)
  - \*\*\* 25% sample data (long-form census questionnaire)
- (1) Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman). The category men+ includes men (and/or boys), as well as some non-binary persons. Women+ includes women (and/or girls), as well as some non-binary persons.
  - (2) All persons aged less than 15 are considered as never married and not living common law.
  - (3) Census family households are those that include at least one census family. Non census family households are either one person living alone or a group of two or more persons who live together but do not constitute a census family. Census family households may be differentiated based on the presence of additional persons (that is, persons not in a census family). There is no age restriction on children. Multigenerational households include: households where there is at least one person who is both the grandparent of a person in the household and the parent of another person in the same household; households where there is at least one person who is both the child of a person in the household and the grandchild of another person in the same household. Multiple-census-family households and one-census-family households exclude multigenerational households.
  - (4) Census family structure refers to the combination of relatives that comprise a census family.
  - (5) Language spoken most often at home refers to the language the person speaks most often at home at the time of the Census. More than one language can be reported if the languages are spoken equally often. For a person who lives alone, this is the language in which they feel most comfortable. For a child who has not yet learned to speak, this is the language spoken most often to the child at home.
  - (6) Refers to whether the person can conduct a conversation in the language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.
  - (7) Includes persons who identify as First Nations (North American Indian), Métis and/or Inuk (Inuit) and/or those who report being Registered or Treaty Indians (that is, registered under the Indian Act of Canada), and/or those who report having membership in a First Nation or Indian band. Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain reserves and settlements.
  - (8) Includes persons who are not First Nations, Métis or Inuk (Inuit) but who report having Registered or Treaty Indian status and/or Membership in a First Nation or Indian band.
  - (9) Includes Canadian citizens by birth and naturalization, including those with multiple citizenships. Persons who are stateless are included in 'Not Canadian citizens'.
  - (10) Persons who are Canadian citizens by birth.
  - (11) Persons who are, or who have ever been, landed immigrants or permanent residents and were admitted to Canada on or prior to May 11, 2021. Immigrants who have obtained Canadian citizenship by naturalization are included in this category. 'Period of immigration' refers to the period in which the immigrant first obtained landed immigrant or permanent resident status.
  - (12) Includes persons from another country with a usual place of residence in Canada and who have a work or study permit or who are refugee claimants. Family members living with work or study permit holders are also included, unless these family members are already Canadian citizens, landed immigrants or permanent residents.
  - (13) The location is specified according to geographic boundaries current at the time of data collection, not the geographic boundaries at the time of birth.
  - (14) 'Visible minority' refers to whether a person is a visible minority or not, as defined by the Employment Equity Act ("persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour."). The abbreviation "n.i.e." includes persons who provided responses that are classified as a visible minority, but that cannot be classified with a specific visible minority group.

- (15) Self-identified connection or affiliation with any religious denomination, group, body, or other religiously defined community or system of belief (not limited to formal membership in a religious organization or group). For infants or children, refers to the specific religious group or denomination in which they are being raised, if any. Persons without a religious connection or affiliation can self-identify as atheist, agnostic or humanist, or can provide another applicable response.
- (16) Refers to the status of a person with regard to the place of residence on the reference day, May 11, 2021, in relation to the place of residence on the same date one year or five years earlier at the provincial level. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Non-migrants are persons who did move but remained in the same city, town, township, village or Indian reserve. Migrants include internal migrants, who moved to a different city, town, township, village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.
- (17) Includes mobile homes and other movable dwellings such as houseboats, recreational vehicles and railroad cars.
- (18) Tenure refers to whether the household owns or rents their private dwelling. The private dwelling may be situated on rented or leased land or be part of a condominium. A household is considered to own their dwelling if some member of the household owns the dwelling even if it is not fully paid for, for example if there is a mortgage or some other claim on it. A household is considered to rent their dwelling if no member of the household owns the dwelling. A household is considered to rent that dwelling even if the dwelling is provided without cash rent or at a reduced rent, or if the dwelling is part of a cooperative. For historical and statutory reasons, shelter occupancy on Indian reserves or settlements does not lend itself to the usual classification by standard tenure categories. Therefore, a special category, 'dwelling provided by the local government, First Nation or Indian band,' has been created for census purposes.
- (19) Rooms refers to enclosed areas within a private dwelling which are finished and suitable for year round living. The number of rooms in a private dwelling includes kitchens, bedrooms and finished rooms in the attic or basement. The number of rooms in a private dwelling excludes bathrooms, halls, vestibules and rooms used solely for business purposes. Partially divided rooms are considered to be separate rooms if they are considered as such by the respondent (e.g., L-shaped dining-room and living-room arrangements).
- (20) Does not include desirable remodelling or additions.
- (21) The period in time during which the building or dwelling was originally constructed and completed, not the time of any later remodeling, additions or conversions. For properties having multiple residential structures, this refers to the period in which the most recent structure was completed.
- (22) Average monthly total of all shelter expenses paid by households. For owner households, this may include mortgage payments, property taxes and condominium fees, along with the costs of electricity, heat, water and other municipal services. For renter households this may include rent and the costs of electricity, heat, water and other municipal services. For households living in a dwelling provided by the local government, First Nation or Indian band, shelter costs could include the monthly use or occupancy payment and the costs of electricity, heat, water and other municipal services.
- (23) For information on data quality for this variable, refer to the Education Reference Guide, Census of Population, 2021, Catalogue no. 98-500-X2021013. 'High (secondary) school diploma or equivalency certificate' includes only people who have this as their highest educational credential and excludes persons with a postsecondary certificate, diploma or degree. 'Non-apprenticeship trades certificate or diploma' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at colleges, institutes of technology, vocational centres and similar institutions. 'Apprenticeship certificate' includes Certificates of Apprenticeship, Certificates of Qualification and Journeyperson's designations. College, CEGEP and other non-university certificates and diplomas obtained from programs that are typically completed in less than 3 months are not included in this category. 'Earned doctorate' does not include honorary doctorates.
- (24) The main discipline or subject of learning for a person's highest completed postsecondary qualification. For more information on the CIP classification, see the Classification of Instructional Programs, Canada 2021. For information on classification and data quality for this variable, refer to the Education Reference Guide, Census of Population, 2021, Catalogue no. 98-500-X2021013. 'No postsecondary certificate, diploma or degree' includes persons who have not completed any credentials above a high school diploma.
- (25) Refers to whether a person aged 15 years and over was employed, unemployed or not in the labour force during the week of Sunday, May 2 to Saturday, May 8, 2021.
- (26) Includes self-employed persons aged 15 years and over with or without an incorporated business and with or without paid help, as well as unpaid family workers.
- (27) Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment, or who had last worked prior to January 1, 2020.
- (28) Refers to the kind of work performed by persons aged 15 years and over as determined by their kind of work and the description of the main activities in their job. The occupation data are produced according to the National Occupational Classification [NOC] 2021 Version 1.0.
- (29) Includes persons aged 15 years and over in the labour force who have worked at some point in time between January 1, 2020 and May 8, 2021.
- (30) Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment, or who had last worked prior to January 1, 2020.

- (31) Refers to the general nature of the business carried out in the establishment where the person worked. The industry data are produced according to the North American Industry Classification System (NAICS) Canada 2017 Version 3.0.
- (32) Includes unemployed persons aged 15 years and over who have never worked for pay or in self-employment, or who had last worked prior to January 1, 2020.
- (33) The main mode of transportation a person uses to travel to their place of work. The census assumes that the commute to work originates from the usual place of residence, but this may not always be the case. Sometimes, respondents may be on a business trip and may have reported their place of work or main mode of commuting based on where they were working during the trip. Some persons maintain a residence close to work and commute to their home on weekends. Students often work after school at a location near their school. As a result, the data may show unusual commutes or unusual main modes of commuting.
- (34) Full-year full-time workers are those who worked 30 hours or more per week for at least 49 weeks in 2020. For more information, see variable work activity in 2020, Dictionary, Census of Population, 2021.
- (35) Total income refers to receipts from certain sources, before income taxes and deductions, during a specified reference period (2020). Sources tend to be of a regular and recurring nature. Receipts that are included as income: employment income; net income from self-employment; child/spousal support; pensions; investments; income from government sources (i.e. old age security; covid benefits etc.). Receipts that are excluded: one-time receipts (i.e. lottery winnings, inheritances); capital gains; employers' contributions to pension plans/employment insurance.
- (36) In the context of households, total income refers to receipts from certain sources of all household members, before income taxes and deductions, during a specified reference period (2020).
- (37) In the context of economic families, total income refers to receipts from certain sources of all of its family members, before income taxes and deductions, during a specified reference period (2020). Economic family refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law union, adoption or a foster relationship.
- (38) The Low-income measure, after tax, refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase, but at a decreasing rate, as the number of members increases. Thresholds for specific household sizes are presented in Table 2.4 Low-income measures thresholds (LIM-AT and LIM-BT) for private households of Canada, 2020, Dictionary, Census of Population, 2021.
