Appendix

All definitions are from the Guide to the Labour Force Survey, Statistics Canada – Catalogue no. 71-543-GIE.

Employment Rate: The number of persons employed expressed as a percentage of working age population (WAP).

Full-time Employment: Those persons who usually work 30 hours or more per week at their main or only job.

Industry: The general nature of the business carried out by the employer for whom the respondent works (main job only).

Labour Force: The labour force is composed of the portion of the WAP who, during the reference week, were employed or unemployed. The reference week is defined as the week containing the 15th day of the month in which information is collected for the Labour Force Survey.

Occupation: The kind of work persons 15+ years were doing during the reference week, as determined by the kind of work reported and the description of the most important duties of the job. If the individual did not have a job during the reference week, the data relates to the previous job, if that job was held in the past year.

Part-time Employment: Consists of all other persons who usually work less than 30 hours per week.

Participation Rate: The total labour force expressed as a percentage of the WAP. This measure represents the proportion of the WAP that is either employed or actively seeking employment.

Unemployment Rate: The number of unemployed persons expressed as a percentage of the labour force.

Working Age Population: Those persons 15+ years, except persons living on Indian reserves, inmates of institutions, and full-time members of the Canadian Armed Forces.
