Firms Pre-Qualified to Provide QA, Mix Design and Pavement Smoothness Testing Services

Pre-Qualification Categories

- **QA (Grading, Base, Paving)**

  Required to provide QA testing services on all regular construction projects (except Superpave).

- **QA (Superpave)**

  Required to provide QA testing services on an all Superpave projects.

- **Marshall Mix Design**

  Required for firms providing Marshall mix designs on all projects.

- **Superpave Mix Design**

  Required for firms providing Superpave mix designs on all projects.

- **Pavement Smoothness**

  All paving projects now specify the use of High-Speed Inertial Profilers and International Roughness Index (IRI) acceptance criteria. Each inertial profiler and operator is to be tested each year by completing a minimum of five runs over an IRI verification test site. The test data is to be forwarded to Technical Standards Branch where it will be evaluated for accuracy and repeatability. Information on the location of the sites and suitable testing times will be provided each Spring.
