**EIA Report Complete for Suncor Energy Inc.'s Proposed Meadow Creek West In Situ Project**

Dear Helene de Beer,

In support of the Integrated Application No. 1899100, the Alberta Energy Regulator (AER) and appropriate government departments have reviewed the environmental impact assessment (EIA) report received on October 3, 2017 and supplemental information request responses received on January 23, 2018, April 13, 2018 and July 18, 2018, and have determined that the content of the report meets the terms of reference issued on April 17, 2017.

Please be advised that I have deemed the EIA report complete pursuant to Section 53 of *EPEA*.

By copy of this letter, Suncor Energy Inc. (Suncor) is hereby informed of the EIA report completeness determination and that this determination *does not* represent acceptance or approval of the proposed project. The EIA report will now be considered further by the AER for a decision as to whether the project may proceed in the regulatory process. Suncor may be required to provide additional project information to the AER in order for the necessary regulatory decisions to be made and potential approvals issued.

Please contact me if you have any questions or wish to discuss the review of the EIA report.

Sincerely,

Jon Keeler, P.Eng.  
Manager, In Situ North  
(Designated Director under *EPEA*)

JK/rm
