

## PUBLIC NOTICE

### FINAL TERMS OF REFERENCE FOR COAL VALLEY RESOURCES INC.'S PROPOSED ROBB TREND PROJECT ENVIRONMENTAL IMPACT ASSESSMENT

#### ALBERTA ENVIRONMENT

On August 4, 2011, Alberta Environment issued final Terms of Reference for the Environmental Impact Assessment report for Coal Valley Resources Inc.'s (CVRI) proposed Robb Trend Project. In 2005, CVRI completed the expansion of the Coal Valley Mine and coal processing plant to 4 million clean tonnes per year. This project doubled the coal wash plant capacity and added additional mining equipment. Three areas of future mining activity were identified at the time of the expansion. The "Mercoal West" and "Yellowhead Tower" have already completed the required regulatory process and were approved for active mining. The company is proposing to proceed with the applications required to allow mining in the last of the three areas, the "Robb Trend" area. The proposed project would be located within the Yellowhead County, in proximity to the community of Robb, in Township 49, Range 21, W5M.

Copies of the Terms of Reference are available from:
