

Eligible waters for domestic fishing licences

Alberta lakes and rivers where domestic fishing licences are available

The Government of Alberta is responsible for managing our Province's fish resources. This includes as a first priority the proper management and conservation of fish stocks in order to ensure an abundance of fish in the future.

In Alberta, the right of First Nations' people defined as "Indians" under the *Indian Act* to fish for food is recognized in law and by government policy. The Government of Alberta is committed to sustaining the Indian food fishery within the constraints of fish conservation obligations. Domestic fishing licences are made available to Indians, as well as recognized Métis harvesters and other persons who can demonstrate a need.

Below is the list of lakes and rivers for which domestic fishing licenses are available. Please be advised that this list may be updated from time to time. For more information, please contact the nearest Alberta Environment and Parks office.
