# Communicable diseases reportable by NDR or other form

## Reference list for MOHs and designates

Diseases in red are reportable by fastest means possible (FMP) from MOH to CMOH

- Acute Flaccid Paralysis
- Amoebiasis
- Anaplasmosis
- Anthrax
- Arboviral Infections – including:
  - Chikungunya Virus
  - Dengue
  - Eastern Equine Encephalitis
  - Flavivirus (Other)
  - Jamestown Canyon Virus
  - Japanese Encephalitis
  - Powassan Encephalitis
  - Snowshoe Hare Virus
  - St. Louis Encephalitis
  - West Nile Virus
  - Western Equine Encephalitis
  - Yellow Fever
  - Zika Virus
- Babesiosis
- Botulism
- Brucellosis
- Campylobacteriosis
- Carbapenemase Producing Organisms
- Chancroid
- Chlamydia (includes perinatally-acquired)
- Cholera (O1, O139)
- Coronavirus, COVID-19
- Coronavirus, MERS/SARS
- Creutzfeldt-Jakob disease
- Cryptosporidiosis
- Cyclosporiasis
- Cytomegalovirus, Congenital
- Diphtheria
- Disease in Unusual Form
- Enterovirus D68
- *Escherichia coli* (Shigatoxin-producing or STEC)
- Giardiasis
- Gonorrhea (includes perinatally-acquired)
- Haemolytic Uremic Syndrome
- *Haemophilus influenzae* - non-serotype b, Invasive
- *Haemophilus influenzae* - serotype b, Invasive
- Hantavirus
- Hepatitis, Acute/Severe of Unknown Origin in Children
- Hepatitis A
- Hepatitis B, Acute & Chronic
- Hepatitis C, Acute & Chronic
- Hepatitis E
- Herpes Simplex, Neonatal
- Histoplasmosis
- Human Immunodeficiency Virus
- Influenza, Avian
- Influenza, Seasonal
- Legionellosis
- Leprosy
- Listeriosis
- Lyme Disease
- Lymphogranuloma Venereum
- Malaria
- Measles
- Meningococcal Disease, Invasive
- MPOX
- Muco-Purulent Cervicitis
- Multisystem Inflammatory Syndrome in Children and Adolescents
- Mumps
- Non-Gonococcal Urethritis
- Paratyphoid Fever
- Pertussis
- Plague
- Pneumococcal Disease, Invasive
- Poliomyelitis
- Psittacosis
- Q Fever
- Rabies
- Rare or Emerging Communicable Disease
- Respiratory Syncytial Virus
- Rickettsial Infection
- Rubella (includes Congenital Infection / Syndrome)
- Salmonellosis
- Severe Acute Respiratory Infection
- Shellfish Poisoning
- Shigellosis
- Smallpox
- Streptococcal Disease - Group A, Invasive
- Subacute Sclerosing Panencephalitis
- Syphilis (includes Congenital)
- Tetanus
- Toxoplasmosis, Congenital
- Trichinosis
- Tuberculosis
- Tularemia
- Typhoid Fever
- Varicella (Chickenpox), Hospitalized or Congenital/Neonatal
- *Vibrio cholerae* (non-O1, non-O139)
- *Vibrio parahaemolyticus*
- Viral Hemorrhagic Fevers
  - Argentine Haemorrhagic Fever
  - Crimean Congo Haemorrhagic Fever
  - Ebola Haemorrhagic Fever
  - Lassa Fever
  - Marburg Haemorrhagic Fever
  - Rift Valley Viral Haemorrhagic Fever
- Yersiniosis
