Communicable diseases reportable by NDR or other form

Reference list for MOHs and designates

Diseases in red are reportable by fastest means possible (FMP) from MOH to CMOH

Acute Flaccid Paralysis
Amoebiasis
Anaplasmosis
Anthrax
Arboviral Infections – including:
- California Serogroup
  - Jamestown Canyon Virus
  - Snowshoe Hare Virus
- Chikungunya Virus
- Dengue
- Eastern Equine Encephalitis
- Flavivirus (Other)
- Japanese Encephalitis
- Powassan Encephalitis
- St. Louis Encephalitis
- West Nile Virus
- Western Equine Encephalitis
- Yellow Fever
- Zika Virus

Babesiosis
Botulism
Brucellosis
Campylobacteriosis
Carbapenemase-Producing Organisms
Chancroid
Chlamydia
Cholera (O1, O139)
Coronavirus, COVID-19
Coronavirus, MERS/SARS
Creutzfeldt-Jakob disease
Cryptosporidiosis
Cyclosporiasis
Cytomegalovirus, Congenital
Diphtheria
Ebola Virus Disease
Escherichia coli (Shiga toxin-producing or STEC)
Giardiasis
Gonorrhea
Haemolytic Uremic Syndrome
Haemophilus influenzae, Invasive *(*non-serotype b)
Haemophilus influenzae, Invasive (serotype b)
Hantavirus
Hepatitis A
Hepatitis B, Acute & Chronic
Hepatitis C, Acute & Chronic
Hepatitis E
Herpes Simplex, Neonatal
Histoplasmosis
Human Immunodeficiency Virus
Influenza, Avian
Influenza, Seasonal
Legionellosis
Leprosy
Listeriosis
Lyme Disease
Lymphogranuloma Venereum
Malaria
Measles
Meningococcal Disease, Invasive
Mpox
Mucopurulent Cervicitis
Mumps
Non-Gonococcal Urethritis
Paratyphoid Fever
Pertussis
Plague
Pneumococcal Disease, Invasive
Poliomyelitis
Psittacosis
Q Fever
Rabies
Rare or Emerging Communicable Disease[1]
Respiratory Syncytial Virus
Rickettsial Infections
Rubella
Rubella, Congenital Infection / Syndrome
Salmonellosis
Severe Acute Respiratory Infection
Shellfish Poisoning
Shigellosis
Smallpox
Streptococcal Disease, Invasive Group A
Subacute Sclerosing Panencephalitis
Syphilis (includes Congenital)
Tetanus
Toxoplasmosis, Congenital
Trichinosis
Tuberculosis
Tularemia
Typhoid Fever
Varicella (Chickenpox), Hospitalized or Congenital/Neonatal
Vibrio cholerae (non-O1, non-O139)
Vibrio parahaemolyticus
Viral Haemorrhagic Fevers
- Argentine Haemorrhagic Fever
- Crimean Congo Haemorrhagic Fever
- Lassa Fever
- Marburg Haemorrhagic Fever
- Rift Valley Viral Haemorrhagic Fever

Yersiniosis

Outbreaks / epidemics of any communicable disease are reportable to the Chief Medical Officer of Health.

For more information on reporting forms and submission timelines, refer to
https://www.alberta.ca/notifiable-disease-guidelines.aspx

[1] Rare or emerging communicable diseases are identified by the Chief Medical Officer of Health under section 14 of the Communicable Diseases Regulation
