Alberta Learning has identified overall strategic issues that will have a major impact on the direction of the Ministry. These issues help to refine the direction of the business plan and have generated strategies to help the Ministry achieve its goals.

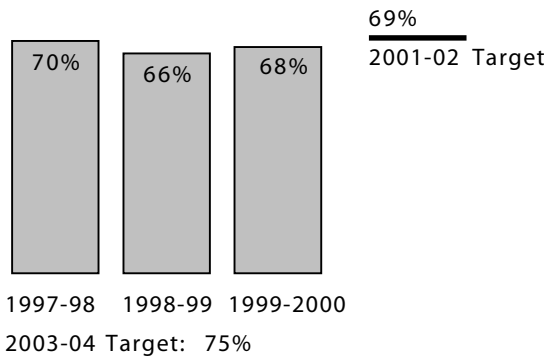

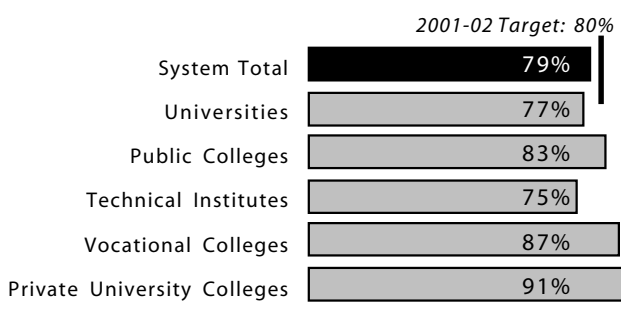

1. **Leadership:** Alberta Learning has a leadership role in ensuring the learning system is moving towards the mission of lifelong learning in the face of changing roles, responsibilities and increased choices. This will be achieved by continuing to develop departmental and system capability to anticipate, prepare for and respond in an evolving and complex environment. An important component of developing capacity is to improve mechanisms to capture stakeholder and client priority needs.
2. **Meeting Demand and Expectations:** The growing global market, and learning expectations of Albertans, places increased demand on the learning system to continue to provide quality and appropriate learning opportunities. Alberta Learning will be addressing the issue of balancing learning expectations of Albertans with learning system priorities.
3. **Achieve Outcomes for Continuous Improvement:** To ensure Alberta's learning system continues to improve and make progress towards its vision and goals, the measurement system must respond to a changing environment. This involves using results from meaningful outcome measures to make strategic decisions and ensure the learning system is accountable.
4. **Enhancing Information Management and Delivery:** Alberta Learning has a leadership role in ensuring the learning system takes advantage of global knowledge and learning tools by making optimal use of technology.

In calculating the result based on total enrolments, students for whom test results are not available (absent, excused or withheld) are included. These students are excluded in the students writing calculation.

The acceptable standard percentages include the standard of excellence percentages.

Student results on the grade 9 achievement tests in language arts and mathematics are reported annually by the provincial government as proxy measures of literacy and numeracy.
