

ACKNOWLEDGEMENTS

Chapters A and B were prepared under the direction of the Highway Geometric Design Guide Advisory Group, Alberta Transportation. The committee included members from the department representing various functional areas related to highways such as Roadway Engineering, Planning, Highway Operations, Bridge Engineering and Regional Transportation. Individual chapter subcommittees researched and prepared recommendations for the various topics included in the chapters. External support was provided by the Highway Geometric Design Guide Task Group, which was comprised of volunteers from the Consulting Engineers of Alberta.

Members of the Advisory Group, chapter subcommittees and Task Force that contributed to this document are listed below:
