

Have you seen **Wild Boar** > **At Large?**

Wild boar, when not being raised as livestock on a farm, are considered to be “at large” and are an invasive pest in Alberta. They are not native to Alberta and cause damage to our land, crops and ecosystems.

We need your help!

Help us learn more about the movements and location of wild boar at-large, to help reduce the damage they cause.

Please call 310-FARM (3276) if you:

- See a wild boar at-large (not kept as livestock on a properly fenced farm)
- See evidence of wild boar – tracks, droppings, digging or rolling around
- Know about a vehicle collision with a wild boar
- Have other information about wild boar at-large
- Would like more information
