This document provides you with all of the questions asked in the 2019-2020 Climate and Environment Student Action Challenge application form. When you are ready to submit your application, complete the form at www.alberta.ca/student-action-challenge.aspx.

Before submitting an application, please review the following important notes:

- Applications close promptly at **December 6, 2019 at 4:30 pm**. Late applications will not be accepted.
- All applications require a complete budget. Download the budget template from the Student Action Challenge website.
- The application form cannot be saved to return to at a later date, so please store your answers in a separate document and submit them all together when you are ready to apply.

The following questions are asked in the application.

1. **Application for: (Choose one.)**
   - Up to $500
   - Up to $1,000

2. **Project name.**

3. **School/association.**

4. **School/association contact information:**
   - Mailing address
   - Phone

5. **Supervising adult contact information.**
   Please notify Student.Action@gov.ab.ca if this person changes throughout the course of the project.
   - Name
   - Phone
   - Email
   - Role/position

6. **Is there anyone else who should be sent updates about this application? If so, list their name(s) and email address(es) here.**
   This could be another teacher or a student actively involved in the project.

7. **Authorizing authority's contact information (e.g. Principal)**
   Schools must have their principal's approval.
   - Name
   - Phone
   - Email

8. **How many students will actively participate in the project?**

9. **Grade level(s) of student participants.**

10. **Our project: (Choose the most applicable option.)**
    - Reduces human impact on the natural environment.
      For example, teaching others environmental education, planting a rain garden, or creating a pathway to reduce erosion in an area.

    - Restores or enhances an aspect of the natural environment.
      For example, increasing native plant or animal habitat to support biodiversity in an area.

    - Reduces the carbon footprint of a group.
      For example, reducing energy use or changing food, transportation, or waste habits.

11. **What will the results of your project will be?**
    Briefly describe how your project will achieve the goal specified in the previous question.

    Word count expectations: *25-50 words for an application for up to $500, 50-100 words for an application for up to $1,000.*

12. **Briefly describe the activities you will do as part of this project.**
    Please include approximate timelines, activities, and outline who will be involved at each stage.

    Word count expectations: *50-150 words for an application for up to $500, 100-300 words for an application for up to $1,000.*

13. **How will you measure the impact your project has on the environment?**
    Consider qualitative, quantitative and traditional ecological knowledge methods.

    Word count expectations: *50-150 words for an application for up to $500, 100-250 words for an application for up to $1,000.*

14. **What makes your project unique?**
    Describe what inspired your project and how your project is different than what others are doing in schools across Alberta.

    Word count expectations: *25-50 words for an application for up to $500, 30-100 words for an application for up to $1,000.*

15. **How will you collaborate with or involve others in the project?**
    This could include others in your school or other schools, community groups or experts, or others outside your community.

    Word count expectations: *25-50 words for an application for up to $500, 30-100 words for an application for up to $1,000.*

16. **How will you share your experiences and results with others?**
    This should include updates to the Climate and Environment Student Action Challenge online website. It could also include school/class presentations or other forms of outreach.

    Word count expectations: *25-50 words for an application for up to $500, 30-100 words for an application for up to $1,000.*

17. **How will your project leave a legacy?**
    How will your project continue after the school year is complete?

    Word count expectations: *25-50 words for an application for up to $500, 30-100 words for an application for up to $1,000.*

18. **Project budget.**
    Please submit your project budget using the downloadable template, found at <u>https://talkaep.alberta.ca/climate-and-environment-student-action-challenge</u>.
