Framework for Student Learning

Competencies for Engaged Thinkers and Ethical Citizens with an Entrepreneurial Spirit
Framework for Student Learning

Competencies for Engaged Thinkers and Ethical Citizens with an Entrepreneurial Spirit
Introduction

Several major initiatives including but not limited to *Inspiring Education: A Dialogue with Albertans*, *Setting the Direction for Special Education in Alberta, Speak Out: The Alberta Student Engagement Initiative* and *Literacy First: A Plan for Action*, have provided Albertans with an opportunity to participate in dialogues about the kind of education that students will need in the 21st century.

Following up on the results of these initiatives and dialogues with Albertans, Alberta Education has begun the implementation of six interrelated action agendas outlined in *Alberta Education Action Agenda 2011–14*. *Action on Curriculum* is focused on the standards, guidelines and processes for curriculum development and the competencies that Alberta students will need to demonstrate in order to meet the opportunities and challenges of the future.

The *Framework for Student Learning: Competencies for Engaged Thinkers and Ethical Citizens with an Entrepreneurial Spirit* is the result of a review of educational literature and research and other provincial and international frameworks for learning, and online consultations and face-to-face engagements with educators, parent groups, students, teachers, school administrators, researchers, employers and non-governmental organizations. These activities confirmed among other things, general support for the competencies, described in *Inspiring Action on Education* (2010), that contribute to an inclusive education system and success for all students. Embedding competencies in curriculum will enable educators to develop engaging and relevant learning experiences for Alberta students.

The *Framework for Student Learning: Competencies for Engaged Thinkers and Ethical Citizens with an Entrepreneurial Spirit* is a foundational element for the review and replacement of the student learning outcomes in the current Ministerial Order (MO) on the *Goals and Standards Applicable to the Provision of Basic Education*. The Framework and the new MO, along with revised standards, guidelines and processes, will provide direction for the development of future curriculum (programs of study, assessment, and learning and teaching resources).
Framework for Student Learning

The Framework for Student Learning outlines the relationships among literacy, numeracy, competencies and subject/discipline areas essential for students to become engaged thinkers and ethical citizens with an entrepreneurial spirit.

This is one of many possible graphics that could be used to illustrate the Framework for Student Learning.
Student

The student is at the centre of all decisions and discussions related to curriculum.

Literacy and Numeracy

Literacy and numeracy are foundational to student learning. Being literate and numerate means going beyond the basic skills of reading, writing and solving simple arithmetic problems to acquiring, creating, connecting and understanding information.

The following statements reflect students’ ideas and comments made in various engagements. They represent how students might describe what they value, know and are able to do:

I am creative in using different ways of communicating in different situations. In my everyday life, I can use mathematical information and ideas that are represented in a variety of ways.

I see the need for a broad range of competencies in my daily life, both inside and outside of school.

Competencies

A competency is an interrelated set of attitudes, skills and knowledge that is drawn upon and applied to a particular context for successful learning and living. Competencies are developed over time and through a set of related learner outcomes. The following competency groupings contain descriptions of the attitudes, skills and knowledge that contribute to students becoming engaged thinkers and ethical citizens with an entrepreneurial spirit.

Critical Thinking, Problem Solving and Decision Making

Alberta students review, analyze and assess information from a variety of sources and points of view. They use application, analysis, evaluation and conceptualization as appropriate for the context. As critical thinkers, they use metacognition to reflect on their thinking and recognize strengths and weaknesses in their reasoning and in the positions presented by others. Students have the confidence and capacity to solve a range of problems, from simple to complex and including novel to ill-defined, related to their learning, their work or their personal lives. They use multiple approaches to solving a problem and understand that a problem can have several solutions. They use a variety of resources in arriving at a solution and use the knowledge and experience gained to inform their ability to solve problems and make decisions in the future.

To build my knowledge, I reflect on my own thinking and am open to new ideas. I can see the strengths and weaknesses of my own point of view and in the points of view of others. I believe in my ability to solve problems and make good decisions.
Creativity and Innovation

Alberta students are optimistic, curious and open to new and diverse ideas. They appreciate the creative works of others, value aesthetic expression and demonstrate initiative, imagination, spontaneity and ingenuity in a range of creative processes. They generate original ideas and recognize when a new or existing idea or product can be applied to a specific context. They recognize and accept mistakes as part of the creative process and as an opportunity to learn. Students demonstrate flexibility and adaptability in response to change. They embrace ambiguity and uncertainty and are willing to take risks, and demonstrate initiative, resiliency and perseverance when faced with obstacles and challenges.

Social, Cultural, Global and Environmental Responsibility

Alberta students are responsible and contribute positively to the quality and sustainability of their environment, communities and society. They appreciate social, cultural, economic and environmental interconnectedness and diversity, demonstrate stewardship, and respect the rights and beliefs of others within local and global communities. Their potential to contribute to their communities, including as volunteers, is enhanced through their personal understanding of place and their ability to value fairness, equity and the principles of a democratic society. As active participants in their local and global community, they act responsibly and ethically in building and sustaining communities. In developing their identity, learners see themselves as individuals and as active agents of a broader world.

Communication

Alberta students understand and interpret the thoughts, ideas and emotions of others and express themselves clearly and effectively, in appropriate ways, for different audiences and for a variety of purposes within local and global communities. Depending on the context, they choose the appropriate medium through which to communicate. They communicate formally and informally within literary, mathematical, scientific, social and artistic contexts. They use a variety of verbal and nonverbal modes to communicate with people from diverse cultural backgrounds. Students demonstrate the ability to listen with purpose and interact respectfully with others, read for information and enjoyment, and speak and write appropriately.
Digital and Technological Fluency

Alberta students competently use information and communication technologies as tools in a variety of digital environments and media. Students access information from a variety of sources to learn individually or with others, to communicate, to come to new understandings, to inform problem solving, and support decision making. They are aware of current and emerging information and communication technologies and choose with confidence the appropriate technology for a defined purpose. Students can access, understand and manipulate digital information creatively and effectively for learning, for communication and for sharing and creation. They use technology critically and safely, and in an ethically responsible manner.

I use technologies as tools to learn by myself or to share with others. They help me find information, communicate with others, solve problems and make decisions. I know how to choose the right technology for my needs and how to use it safely and properly.

Lifelong Learning, Personal Management and Well-being

Alberta students understand that learning is a lifelong endeavour. They use their talents and passions to contribute to their communities and manage their strengths and areas in need of improvement. They manage the various roles they have in life, and balance school, work and other life priorities. They seek opportunities for personal and professional growth, explore career possibilities and plan accordingly as they confront challenges and adapt to change. They are self-directed and self-aware, using this knowledge to make responsible personal choices and decisions. They demonstrate understanding of the importance of education, safety, financial literacy and personal wellness, with commitment to lifestyle choices based on healthy attitudes and actions. Students take ownership of, and responsibility for, their emotional, intellectual, physical, spiritual and social well-being.

Learning is happening all around me, and I know that it is important to use my unique talents and passions. I need to understand how I learn best, and where I need to improve. The different parts of my life and my relationships need to be balanced if I am to be successful. Making strong, responsible decisions and planning for my future will help me have a safe, happy and healthy future.

Collaboration and Leadership

Alberta students demonstrate leadership in their personal lives and in their communities. They seek to provide guidance, inspire others to action and direct or influence others to achieve a shared purpose or vision. They build respectful, caring and effective relationships to manage conflict and differences and to seek consensus in the pursuit of common goals. They accept responsibility for their actions as individuals and share responsibility as team members. In a team situation, they work with others to influence, motivate and mentor all members. They show flexibility in being able to work with a diversity of people in varying situations. As leaders, they use their influence and powers responsibly and keep the interests of the larger community and group in mind.

I try to be a positive role model by showing respect, building good relationships and cooperating with others. I accept responsibility for my actions. I understand that when working with people I need to be flexible and share responsibility. These are good leadership skills that can influence, guide and motivate others.
Subject/Discipline Areas

**Subject** and discipline areas are organized bodies of knowledge that have unique ways by which knowledge is created, changed, verified, communicated and generalized. Subject areas provide a context for the development of competencies and opportunities for interdisciplinary learning. The learning outcomes within a subject or discipline help students to develop and gain a deeper understanding and appreciation of competencies.

Vision, Values and Mission

Alberta Education’s vision and values guide the Ministry and its partners in the transformation of ECS–12 education in Alberta.

**Vision**

*All students are inspired to achieve success and fulfillment as engaged thinkers and ethical citizens with an entrepreneurial spirit.*

*Alberta Education Action Agenda 2011–14*

*Inspiring Education: A Dialogue with Albertans* provided more information about the three “E’s” by stating that the education system should strive to instill the following qualities and abilities in our youth.

- **Engaged Thinker**: who thinks critically and makes discoveries; who uses technology to learn, innovate, communicate, and discover; who works with multiple perspectives and disciplines to identify problems and find the best solutions; who communicates these ideas to others; and who, as a life-long learner, adapts to change with an attitude of optimism and hope for the future.

- **Ethical Citizen**: who builds relationships based on humility, fairness and open-mindedness; who demonstrates respect, empathy and compassion; and who through teamwork, collaboration and communication contributes fully to the community and the world.

- **Entrepreneurial Spirit**: who creates opportunities and achieves goals through hard work, perseverance and discipline; who strives for excellence and earns success; who explores ideas and challenges the status quo; who is competitive, adaptable and resilient; and who has the confidence to take risks and make bold decisions in the face of adversity.

*Inspiring Education: A Dialogue with Albertans*

Text for the three “E’s” updated.
Values

The vision is based on the values of opportunity, fairness, citizenship, choice, diversity and excellence.

*Alberta Education Action Agenda 2011–14*

Mission

Collaborate to inspire every student to engage in high quality, inclusive learning opportunities needed to develop competencies required to contribute to an enriched society and a sustainable economy.

*Education Business Plan 2011–14*
Appendix

Engagements with Educational Partners and Communities on the Framework for Student Learning and Competencies (2010–2011)

Inspiring Action Transformation Guide (August 2010)
- Education stakeholders (students, the Alberta Teachers’ Association [ATA], parents, industry, post-secondary institutions and Alberta Education staff) provided responses to questions on competencies in this online guide.

College of Alberta School Superintendents Fall Conference (November 5, 2010)
- This annual conference included participants from 2Learn.ca, Alberta Education, the ATA, the Alberta School Boards Association (ASBA), the College of Alberta School Superintendents (CASS), Alberta school authorities (public, separate and Francophone), charter schools and the University of Alberta.

Alberta Teachers’ Association Curriculum Committee (January 17, 2011)
- This standing committee includes practicing Alberta teachers, members of the ATA’s Provincial Executive Council, curriculum specialists, observers from Alberta Education and CASS, and ATA staff officers.

Alberta Education’s Council on Alberta Teaching Standards (February 7, 2011)
- This People and Research Division committee includes representation from CASS, ASBA, the ATA, the Association of Alberta Deans of Education, and the Association of Independent Schools and Colleges in Alberta (AISCA).

Alberta Education’s Curriculum Policy Advisory Committee (February 23, 2011)
- This Education Program Standards and Assessment Division standing committee has representation from CASS, Alberta school authorities, the ATA, Alberta Education, students, the Council of Presidents of Colleges and Technical Institutes, ASBA, business and industry, l’Association canadienne-française de l’Alberta, Alberta Employment and Immigration, and Alberta Advanced Education and Technology.
CASS/Alberta Education Learning Symposium (March 15, 2011)
- This joint symposium on education initiatives arising from *Inspiring Education* and *Setting the Direction* had participants from 2Learn.ca, Alberta Education, the Provincial Assessment Consortia, the Government of the Northwest Territories, CASS, the ATA, Alberta school authorities (public, separate and Francophone), the Alberta Regional Professional Development Consortia, the Alberta Assessment Consortium and Renfrew Educational Services.

FNMI Education Specialist Council (March 18, 2011)
- This annual ATA event included representatives from Confederation of Treaty 6, Treaty 8 First Nations of Alberta, Treaty 7 Management Corporation, the Métis Nation of Alberta, the Métis Settlements General Council, the ATA, Alberta Advanced Education and Technology, and Alberta Education.

Alberta Education’s Action on Curriculum Research Roundtable 1 (April 11–12, 2011)
- This significant event to the development of competencies for student learning was part of the Action on Curriculum project and included representatives from Alberta school authorities (public, separate and Francophone), the Alberta Initiative for School Improvement (AISI), Alberta Education, the University of Alberta, the University of Calgary, charter schools, Save Our Fine Arts (SOFA), Triune Enterprises Inc., the University of Calgary Biogeoscience Institute, Renfrew Educational Services, Alberta Health and Wellness, the Government of the Northwest Territories, the Alberta Distance Learning Centre, Galileo Educational Network, the Alberta Council for Environmental Education, the SEEDS Foundation, the Critical Thinking Consortium, the ATA, Phoenix Home Education, Canada Safeway, Alberta Film, Harvard’s Graduate School of Education, Ambrose University College, Reading Wings Inc., Speak Out Alberta, and the Alberta Home Education Association.

Delegates spent an entire day developing a common understanding of competencies and refining the competency categories and descriptors. For more detailed information about Roundtable 1, please access the event overview at [http://education.alberta.ca/department/ipr/curriculum/engagement.aspx](http://education.alberta.ca/department/ipr/curriculum/engagement.aspx).
Alberta’s Student Engagement Initiative: Speak Out Conference (April 16, 2011)
- This third annual conference included hundreds of students from across Alberta as well as representation from the Minister’s Student Advisory Council, Alberta Education, the ATA, CASS, Alberta school authorities, and parents. At the conference, a workshop for students provided Alberta Education with the opportunity to access a good provincial view and diverse representation of students. The workshop provided an opportunity to collect information on how students obtain competencies in and out of school, and how competencies contribute to students’ development. The conference also included a workshop for chaperones, who were able to provide their perspectives on the role of competencies in students’ education.

Alberta Education’s FNMI Elder Advisory Committee (April 26, 2011)
- This standing committee consists of indigenous language and culture experts and members from the Dene Suline, Kainai Board of Education, Kee Tas Kee Now Tribal Council, Tsuut’ina Gunaha Project, Plains Cree, Meskanahk Ka-Nipa-Wit School, Piikani, Gwich’in Cree and Métis, Métis Nation of Alberta, Athabasca Tribal Council, Nakoda Nation, Kehewin Band, Métis Settlements General Council, Treaty 8 First Nations of Alberta, Dene Tha’ First Nation, Siksika Education Authority, Canadian Native Friendship Centre, and Northland School Division No. 61.

College of Alberta School Superintendents/Alberta Education Annual Conference (April 29, 2011)
- This annual joint conference includes students and participants from CASS, the ATA, Alberta Education, the Council of Presidents of Colleges and Technical Institutes, ASBA, the Alberta School Councils’ Association (ASCA), business and industry, l’Association canadienne-française de l’Alberta, Alberta Employment and Immigration, and Alberta Advanced Education and Technology.
