

## SCHEDULE 1

### Water Conservation Objective

The Water Conservation Objective (WCO) on the West Arrowwood Creek is a rate of flow that is the existing instream objective increased by 10%.

Existing instream objective on West Arrowwood Creek are as follows:

Value (CUBIC METRES PER SECOND)	Value (CUBIC FEET PER SECOND)
0.142	5.0

Water Conservation Objective (WCO) on West Arrowwood Creek are as follows:

Value (CUBIC METRES PER SECOND)	Value (CUBIC FEET PER SECOND)
0.156	5.5

The above Water Conservation Objective is to be met at the Water Survey of Canada Station No. 05BM014 (West Arrowwood Creek near Arrowwood).

Up-to-date water flow information is available most of the year at Alberta Environment's website:
