**Re: Proposed Sasol Canada GTL Project  
EPEA Application No. 001-00329786  
Water Act No. 00329881**

---

Dear Mr. Nel:

The Environmental Impact Assessment (EIA) report for the proposed Sasol Canada GTL Project has now been deemed complete pursuant to Section 53 of the *Environmental Protection and Enhancement Act* (EPEA). Alberta Environment and Sustainable Resource Development and associated government agencies have reviewed the EIA report received on May 8, 2013, and Supplemental Information Request Response received on February 7, 2014 and have determined that the content of the report meets the Terms of Reference published on November 26, 2012.

This determination of EIA Completeness **does not** represent acceptance or approval of the proposed project. The EIA report will be referred to the Minister of Environment and Sustainable Resource Development, who will issue a decision as to whether the project may proceed further in the regulatory process. Sasol may be required to provide additional project information to the Minister in order for the necessary regulatory decisions to be made and will be required to provide additional information to ESRD if/when potential approvals are being drafted.

If you have any questions about the ESRD Approvals process, please contact Mohammad Habib at (780) 415-9629.

Sincerely,

**Original signed by:**
