

SCHEDULE 1

Water Conservation Objective

The Water Conservation Objective (WCO) for the Cataract Creek is a rate of flow not to be less than 90% of the flow recorded at the water Survey of Canada Station No. 05BL022 (Cataract Creek near Forestry Road) any given point in time. It means that the licence holder shall only divert up to 10% of the flow recorded at the water Survey of Canada Station No. 05BL022 (Cataract Creek near Forestry Road) any given point in time.

Up-to-date water flow information is available most of the year at Alberta Environment's website:
<https://rivers.alberta.ca>
