DRAW RULES

The following table lists the fish draws available.

Type of Special Walleye Licence Draws Available	Restrictions on Applying for These Draws	Maximum Applications Allowed
Walleye (Class A)	<ul style="list-style-type: none"> An Alberta Resident may apply for all 3 draws but may only be drawn in one. 	1 application for each from this list of 3.
Walleye (Class B)	Draws will be conducted in this order: <ul style="list-style-type: none"> Walleye (Class A) first, Walleye (Class B) second, and Walleye (Class C) third. 	
Walleye (Class C)	<ul style="list-style-type: none"> Applicants drawn in a walleye draw will be eliminated from the subsequent draws. 	

WIN: All applicants must have a 10-digit **Wildlife Identification Number (WIN)**, including those under 16 years of age, over 65 years of age, First Nations and Métis people. A WIN can be purchased online or at any licence issuer for \$8.00 plus GST and is valid for 5 years.

Age: There is no age restriction.

Residency: The draws are available to residents of Alberta only.

Eligibility: A resident of Alberta is not eligible to apply if their fishing privileges are under suspension or cancellation. An applicant must be eligible to hold an Alberta Sportfishing Licence at time of application.

Application Cost: A price of \$3.04 (plus GST) is charged for each application and is non-refundable.

Group Applications: A maximum of 4 applicants may apply together. A group making a joint application for a draw is only charged for one application. To make a group application, you only need to apply once for the entire group, listing the WIN of each applicant. If drawn, those who applied as a group will be drawn as a group, and each angler will then be authorized to purchase a Special Walleye Licence.

Draw Priority: The WIN is used to identify a draw applicant's priority. In the first year (2006), all draw applicants entered the draws with a 0 priority. A draw applicant's priority increases when the draw application is not drawn and will be reset to 0 once their application has been drawn. Priority will be accumulated, tracked and used in the draw selection from the initial draw (2006). The priority for a group application will be based on the individual applicant whose priority is lowest.

Choices: An applicant can indicate up to three lake choices for each draw. The exception is if you choose "999". If you do not want to be drawn but want to increase your draw priority, use "999" as your first and only draw choice on your draw application. Normal draw application restrictions apply regarding eligibility.

You can view last year's Special Licence Draws Summary Report. This report provides statistics on the number of applications, number of licences available and your chances (%) of being drawn. The website is srd.alberta.ca or mywildalberta.com.

TAGGING INSTRUCTIONS

A walleye that is retained must be tagged immediately through the gill cavity and mouth with the paper tag and wire provided with the Special Walleye Licence.

To tag your walleye:

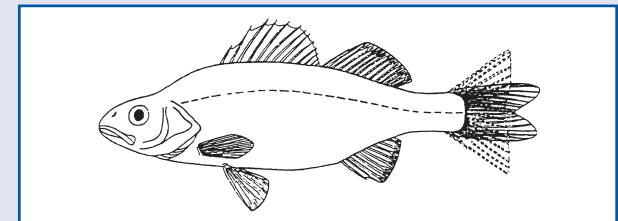

- Spread the ends of the wire loop slightly apart and insert an end into one side of the mouth, pushing it back toward the gill opening on the same side until it protrudes out from the gill cover. Note: you may have to squeeze the wire ends close together again.
- Remove the backing from the adhesive paper tag.
- Place the open end of the wire loop flat against one half of the adhesive side of the tag and fold the other half over, so that the adhesive sides are pressed together evenly and firmly, with the wire secured between.
 - Note: the open portion of the wire loop must be completely covered by the tag.**

MEASURING FISH LENGTH

It is best to immediately release fish that are close to legal length rather than subjecting the fish to extra handling for the taking of a more accurate measurement. Flexible tape measures may be used provided only the straight-line length of the fish is measured without including the curvature of the body in the length of the fish. It's a good idea to have a fish measuring stick with you and to place it beside the fish before lifting the fish from the water.

Length – The total length (maximum) of a fish is measured from the tip of the nose or jaw to the tip of the tail fin, with the tail pinched.
