# Methodology

---

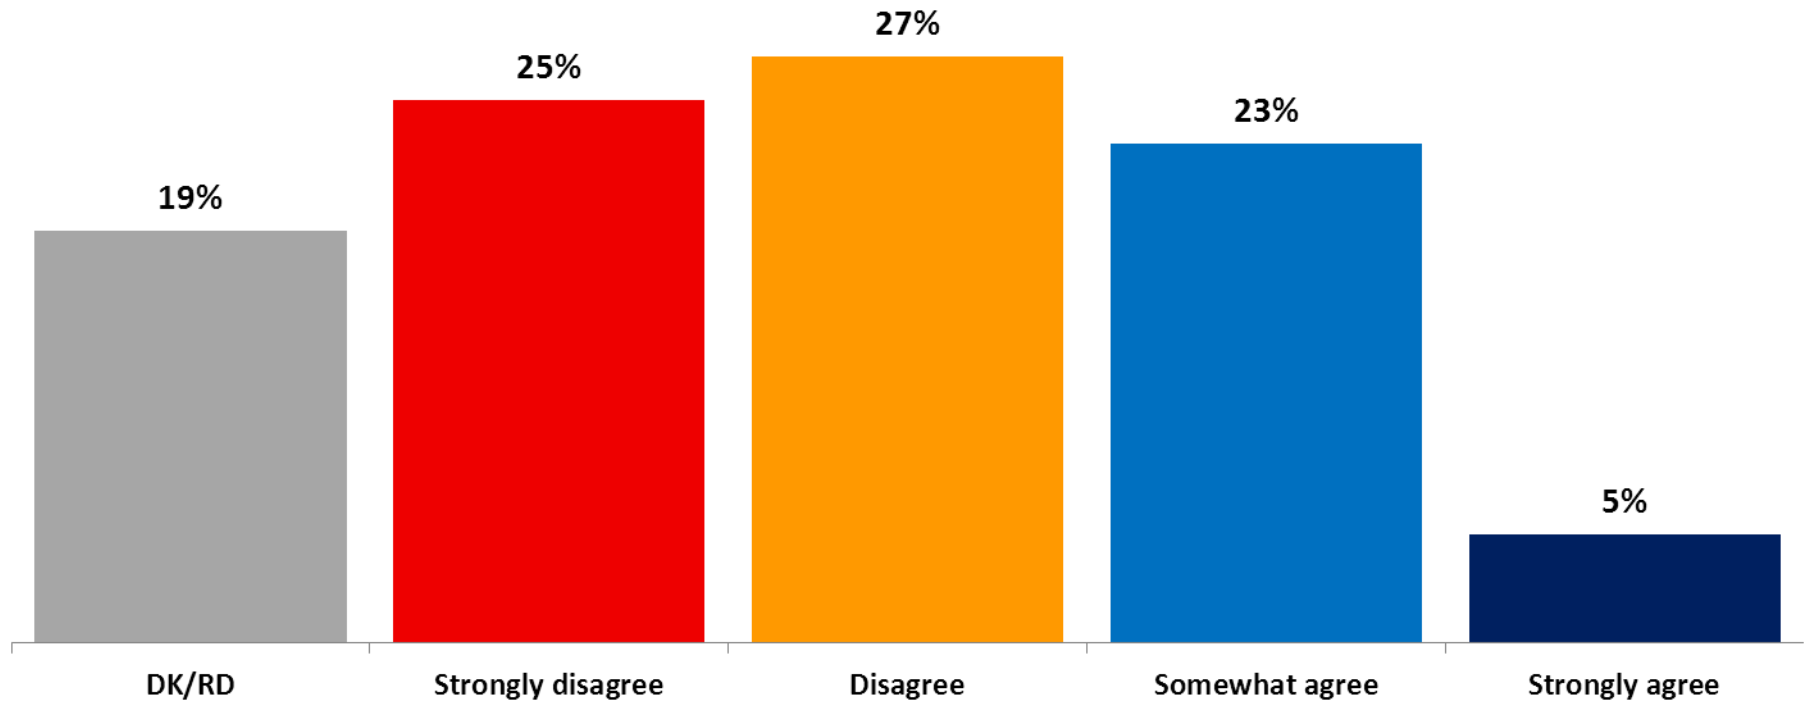

Firm	Fieldwork dates	Sample size	Margin of error
Environics	March 8-17, 2013	1,003 Albertans	± 3.1%, 19 times out of 20

- Only one respondent per household was eligible to complete this survey.
- The sample has been weighted by age, gender and region using the latest available Statistics Canada Census data to reflect the actual demographic composition of the population.
- The margin of error will be larger within each sub-grouping of the sample.
- Results are expressed as percentages unless otherwise noted. Results may not add to 100% due to rounding or multiple responses.
- Graphs and tables may not always total 100% due to rounding values rather than any error in data. Sums are added before rounding numbers.
