Labour Market Notes

Solid momentum in labour market

Alberta

- Employment marches on. Employment in the province increased (+15,900 month-over-month or m/m) in April, leading the country in jobs growth.
- **Private sector leads growth.** Full-time positions led employment gains (+9,800 m/m), while part-time jobs also contributed (+6,100 m/m) in April. The majority of these positions were in the private sector (+15,000 m/m).
- Services sector employment jumps. Employment in service-producing sectors increased (+17,500 m/m), propelled by gains in wholesale and retail trade (+11,200 m/m), and further supported by health care & social assistance and transportation & warehousing. Some close-contact industries continued to lag, including information & culture and other services, while accommodation & food had a modest increase.
- Goods sector employment down. After a large jump in January, goods sector employment waned for the third consecutive month (-1,400 m/m). Broad-based declines outweighed a small uptick in agriculture.
- Lower unemployment rate and participation rate. With the employment gains, the unemployment rate dropped to 5.9%. The participation rate declined to 69.2% as the working age population increased faster than the labour force in April.
- Labour underutilization inches down. With the increase in jobs, the labour underutilization rate dipped to 13.5%. The number of Albertans who wanted a job but did not look for one declined 8.1% m/m. However, those who were employed but worked zero hours or less than half of their usual hours during the reference week increased 14,600 (+12% m/m) to 141,400.
- Wages tick up. The average hourly wage in Alberta increased 0.9% m/m to \$33.25, and was up 1.8% from the same time period a year ago.

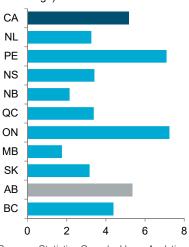

Canada

- **National employment moderates.** Nationally, employment increased by 15,300 in April, with growth in five provinces, led by Alberta.
- **Unemployment rate falls.** With the employment gains, the national unemployment rate fell to 5.2% in April, the lowest rate on record since comparable data became available in 1976.
- Wages grow. The national average hourly wage rate edged up to \$31.06 (+0.5% m/m), up 3.3% compared to a year ago.

EMPLOYMENT GROWTH BY PROVINCE
