Peace River Oil Sands Projects

DISCLAIMER:
This map excludes active projects with production of less than 1,000 barrels of bitumen in the last six months.

Locations are approximate and may not represent the full extent of project areas. Leased Oil Sands Area information is shown to the nearest quarter section, and therefore may appear to include minerals not owned by the Alberta Crown and/or Minerals Reserved From Disposition.

The data represented was obtained from the source information listed and other sources as noted. The project data and information has been reviewed but was not independently verified. Leased Oil Sands Area information is shown to the nearest quarter section, and therefore may appear to include minerals not owned by the Alberta Crown and/or Minerals Reserved From Disposition. The Government of Alberta assumes no responsibility for discrepancies as time of use.

PROJECT STATUS DEFINITION:
Operating (20)
Construction (3)
Approved (3)
Announced (0)

Mining
Primary/EOR
These projects utilize the natural energy available in the reservoirs (in some cases supplemented by natural gas or CO2 injection) to produce bitumen.

Open Pit Mining
These projects utilize open pit mining methods to remove bituminous ore, which is subsequently processed to recover bitumen.

Experimental
These projects operate on a (non-commercial) pilot scale and use innovative methods to recover bitumen.
