What's New for October 2017?

This section outlines any changes to the data, calculations or measures compared to the May 2017 release.

Data Updates

- New year of results for Provincial Achievement Tests.
- New year of results for Diploma Examinations.
- Diploma Examination aggregate results recalculated to include new courses (Mathematics 30-1 and 30-2).

Diploma Examinations: Mathematics 30-1/30-2

- Caution should be used when interpreting evaluations and results over time for Mathematics 30-1/30-2, as equating was not in place until the 2016/17 school year. Alberta Education does not comment on province wide trends until it has five years of equated examination data.

Impact of May to June 2016 Fires and June 2013 Flood in Alberta

- Participation in Provincial Achievement Tests was impacted by the flooding in June 2013 (Grade 9 only) and by the fires in May to June 2016. Caution should be used when interpreting trends over time for the province and those school authorities affected by these events.
- Participation in Diploma Examinations was impacted by the flooding in June 2013 and by the fires in May to June 2016. Caution should be used when interpreting trends over time for the province and those school authorities affected by these events.

Achievement Evaluation

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the 3 year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the 5 achievement evaluation levels for each measure.

Safe and Caring	0.00 - 77.62	77.62 - 81.05	81.05 - 84.50	84.50 - 88.03	88.03 - 100.00

Notes:

1. For all measures except Drop Out Rate: The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.
2. Drop Out Rate measure: As "Drop Out Rate" is inverse to most measures (i.e. lower values are "better"), the range of values at each evaluation level is interpreted as greater than the lower value and less than or equal to the higher value. For the Very High evaluation level, values range from 0% to less than or equal to the higher value.

Improvement Table

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes.

The table below shows the definition of the 5 improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range
Declined Significantly	3.84 + (current < previous 3-year average)
Declined	1.00 - 3.83 (current < previous 3-year average)
Maintained	less than 1.00
Improved	1.00 - 3.83 (current > previous 3-year average)
Improved Significantly	3.84 + (current > previous 3-year average)

Overall Evaluation Table

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation. The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

Improvement	Achievement				
	Very High	High	Intermediate	Low	Very Low
Improved Significantly	Excellent	Good	Good	Good	Acceptable
Improved	Excellent	Good	Good	Acceptable	Issue
Maintained	Excellent	Good	Acceptable	Issue	Concern
Declined	Good	Acceptable	Issue	Issue	Concern
Declined Significantly	Acceptable	Issue	Issue	Concern	Concern

Category Evaluation

The category evaluation is an average of the Overall Evaluation of the measures that make up the category. For the purpose of the calculation, consider an Overall Evaluation of Excellent to be 2, Good to be 1, Acceptable to be 0, Issue to be -1, and Concern to be -2. The simple average (mean) of these values rounded to the nearest integer produces the Category Evaluation value. This is converted back to a colour using the same scale above (e.g. 2=Excellent, 1=Good, 0=Intermediate, -1=Issue, -2=Concern).

1. Data values have been suppressed where the number of respondents/students is fewer than 6. Suppression is marked with an asterisk (*).
2. Achievement Evaluation is not calculated for courses that do not have sufficient data available, either due to too few jurisdictions offering the course or because of changes in tests.
3. Participation in Provincial Achievement Tests was impacted by the flooding in June 2013 (Grade 9 only) and by the fires in May to June 2016. Caution should be used when interpreting trends over time for the province and those school authorities affected by these events.

Measure Evaluation Reference - Achievement Evaluation

Province: Alberta

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the 3 year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the 5 achievement evaluation levels for each measure.

Notes:

1. The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.
2. Achievement Evaluation is not calculated for courses that do not have sufficient data available, either due to too few jurisdictions offering the course or because of changes in tests.

Measure Evaluation Reference - Improvement and Overall Evaluation Table

Province: Alberta

Improvement Table

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes.

The table below shows the definition of the 5 improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range
Declined Significantly	3.84 + (current < previous 3-year average)
Declined	1.00 - 3.83 (current < previous 3-year average)
Maintained	less than 1.00
Improved	1.00 - 3.83 (current > previous 3-year average)
Improved Significantly	3.84 + (current > previous 3-year average)

Overall Evaluation Table

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation.

The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

	Achievement				
	Very High	High	Intermediate	Low	Very Low
Improved Significantly	Excellent	Good	Good	Good	Acceptable
Improved	Excellent	Good	Good	Acceptable	Issue
Maintained	Excellent	Good	Acceptable	Issue	Concern
Declined	Good	Acceptable	Issue	Issue	Concern

Measure Evaluation Reference - Achievement Evaluation

Province: Alberta

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the 3 year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th, and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the 5 achievement evaluation levels for each measure.

Measure Evaluation Reference - Improvement and Overall Evaluation Table

Province: Alberta

Improvement Table

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes.

The table below shows the definition of the 5 improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range
Declined Significantly	3.84 + (current < previous 3-year average)
Declined	1.00 - 3.83 (current < previous 3-year average)
Maintained	less than 1.00
Improved	1.00 - 3.83 (current > previous 3-year average)
Improved Significantly	3.84 + (current > previous 3-year average)

Overall Evaluation Table

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation.

The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

	Achievement				
	Very High	High	Intermediate	Low	Very Low
Improved Significantly	Excellent	Good	Good	Good	Acceptable
Improved	Excellent	Good	Good	Acceptable	Issue
Maintained	Excellent	Good	Acceptable	Issue	Concern

Appendix – Definitions for Measures

A brief definition of each of the Accountability Pillar measures is provided below.

The **First Nations, Métis and Inuit** results reported for the Accountability Pillar only include students that self-identified as First Nations, Métis or Inuit on student registration forms. School authorities are required to report on Accountability Pillar results for First Nations, Metis, and Inuit students in their 3-year education plans and annual education results reports for the purpose of monitoring and improving education outcomes. Please ensure context and appropriate analysis are provided whenever results for self-identified First Nations, Metis and Inuit students are shared publicly.

High School Completion Rate (3-year) is the percentage of students in the grade 10 cohort¹ who have completed high school by the end of their third year, adjusted for attrition².

- High school completion is defined as: receiving an Alberta high school diploma, an IOP certificate or high school equivalency (GED); entering a post-secondary level program at an Alberta post-secondary institution; registering in an Alberta apprenticeship program; or earning credit in five grade 12 level courses, including four diploma examination courses.

Post-Secondary Transition Rate (6-year) is the percentage of students in the grade 10 cohort who have entered a post-secondary-level program at an Alberta post-secondary institution or registered in an Alberta apprenticeship program within six years of entering grade 10, adjusted for attrition.

- An estimate of out-of-province post-secondary enrollment is applied based on the numbers of funded Alberta students attending post-secondary institutions out of province.

Diploma Exam Participation Rate (4+Exams) is the percentage of students in the grade 10 cohort who have written four or more diploma exams by the end of their third year in high school, adjusted for attrition.

- Students are not considered a diploma examination participant if they do not have an examination mark.

Drop Out Rate is the percentage of students aged 14-18 registered in the K-12 system who drop out the following year, adjusted for attrition.

- An initial age specific cohort of students aged 14 to 18 is established for a given school year, excluding the following groups of students: students who registered after September 30, students with severe cognitive/multiple disabilities, students attending Hutterite colony schools, visiting/exchange students, students under other authorities (e.g. federal, Lloydminster).
- A student who was in Alberta's education system is considered to have dropped out if:
 - There is no evidence of their participation in the education system the following school year (including post-secondary and apprenticeship programs)
 - They did not complete high school (see high school completion measure for details).

Rutherford Scholarship Eligibility Rate is the percentage of Alberta grade 12 students who have met the eligibility criteria for a Rutherford Scholarship based on course marks in grades 10, 11 and/or 12.

- Students must have completed at least one grade 12 course. Students in the following categories are excluded: students who are not registered on September 30th of the school year; registered in schools under provincial and federal authorities; 20 years of age or older on September 1 of the school year; identified in the grade 12 school year as having a moderate/severe cognitive disability or severe multiple disability; identified in the grade 12 school year as exchange or visiting students; and students in Lloydminster school authorities.

Appendix – Definitions for Measures

Provincial Achievement Test (PAT) Results (Acceptable / Excellence) are based on all students in each grade (total enrollment in the grade plus the ungraded students who are in the corresponding year of schooling). Results are calculated for each test. The overall result is the average of the results for each test weighted by the number of students enrolled.

- PAT acceptable is the percentage of students who achieve the acceptable standard on grades 6 and 9 Provincial Achievement Tests.
- PAT excellence is the percentage of students who achieve the standard of excellence on grades 6 and 9 Provincial Achievement Tests.

Diploma Exam Results (Acceptable / Excellence) are based on the numbers of students writing each diploma exam. The overall diploma exam result is the average of the results for each exam weighted by the number of students writing.

- Diploma exam result (acceptable) is the percentage of students who achieve acceptable standard (i.e. a mark of 50%) on a diploma exam.
- Diploma exam result (excellence) is the percentage of students who achieve the standard of excellence (i.e. a mark of 80%) on a diploma exam.

Survey Measures

In public, separate and francophone schools all students in grades 4, 7 and 10; their parents; and all teachers are included in the survey. In charter schools and level 2 private schools students in grade 4 and above; their parents; and all teachers are included in the survey.

- The measure results for parents and teachers are calculated by aggregating the responses to all questions that comprise the measure.
- The measure result for students is calculated by first aggregating the responses to questions within each grade and then taking a simple average across grades.
- The overall measure result is calculated by taking the simple average of measure results for parents, teachers and students.

¹**Grade 10 Cohort:** Students are included in the grade 10 cohort the first school year in which they have a grade 10 registration at a public, separate, francophone, charter or private school. The following categories of students are excluded from the grade 10 cohort:

- d. students who are registered in schools under provincial and federal authorities, and Lloydminster school authorities or other out-of-province schools;
- e. students who are identified as having a moderate/severe cognitive disability or a severe multiple disability;
- f. students attending Hutterite Colony schools; and
