

Backcountry Trail Flood Rehabilitation Program

Rail Trail

Competition Date: July 2015

Website Information

Further information on the program, as well as an interactive web map can be found by visiting:

- [Backcountry Trail Flood Map](#)

It is also encouraged to visit the web map before heading into the backcountry within the program area. Trails which are under construction or under a temporary closure are updated weekly so you can Know Before You Go.

Rail Trail

The Rail Trail was badly eroded by the 2013 flood event and had gullies up a meter deep. To avoid the ruts, users created undesigntated reroutes that passed onto private property. In July 2015, the local BTFR trail crew rerouted the trail off of the private property and installed a native timber bridge over a small creek.
