

Non-Certified Appliances and Equipment Require Special Inspection and Approval

PURPOSE

This bulletin provides contact information for certification and inspection bodies currently operating in Alberta.

DISCUSSION

In Alberta, under the *Safety Codes Act*, the inspection and approval of non-certified gas-fired appliances and equipment is to be conducted by nationally recognized certification bodies or inspection bodies accredited by the Standards Council of Canada.

A special inspection is not intended to be used as a means to accept appliances and equipment when certified products of similar type are available.

INTERPRETATION

All equipment related to gas systems for use in Alberta must be tested and certified by a certification body accredited by the Standards Council of Canada, or inspected and accepted by an inspection body accredited by the Standards Council of Canada, and the equipment must bear evidence of having been accepted in the manner authorized by the certification body or inspection body.

REGULATION REFERENCES

Gas Code Regulation AR 111/2010

Gas systems equipment

- 3(1)** No person shall manufacture, install, sell or offer for sale any equipment related to gas systems for use in Alberta unless the equipment has been
- (a) tested and certified by a certification body accredited by the Standards Council of Canada, or
 - (b) inspected and accepted by a certification body or an inspection body accredited by the Standards Council of Canada, and the equipment bears evidence of having been accepted in the manner authorized by the certification body or inspection body.
- (2)** If a code, standard or body of rules respecting gas systems that is declared in force under the Act refers to approved equipment, that equipment must meet the requirements of this section.

Issue of this STANDATA is authorized by
the Gas Administrator
