## Review Engagement Report

To the Members of the Legislative Assembly

I have reviewed 1 of 2 performance measures in the Ministry of Education's Annual Report Update 2014-2015. The reviewed performance measure is the responsibility of the ministry and is prepared based on the following criteria:

- Reliability—The information used in applying performance measure methodology agrees with underlying source data for the current and prior years' results.
- Understandability-The performance measure methodology and result is presented clearly.
- Comparability-The methodology for performance measure preparation is applied consistently for the current and prior years' results.
- Completeness-The goal, performance measure and related target match those included in the ministry's budget 2014.

My review was made in accordance with Canadian generally accepted standards for review engagements and, accordingly, consisted primarily of inquiry, analytical procedures and discussion related to information supplied to me by the ministry.

A review does not constitute an audit and, consequently, I do not express an audit opinion on the performance measure. Further, my review was not designed to assess the relevance and sufficiency of the reviewed performance measure in demonstrating ministry progress towards the related goal.

Based on my review, nothing has come to my attention that causes me to believe that the one performance measure identified as reviewed by the Office of the Auditor General in the ministry's annual report update 2014-2015 is not, in all material respects, presented in accordance with the criteria of reliability, understandability, comparability and completeness as described above.
[Original signed by Merwan N. Saher, FCA]
Auditor General
November 3, 2015
Edmonton, Alberta

Note: The performance measure reviewed by the Office of the Auditor General is noted with an asterisk (*) on the Performance Measures Summary Table.

## Results Analysis

## Performance Highlights

- The percentage of students achieving the acceptable standard on Language Arts diploma examinations did not meet the performance target for 2014-15 while the percentage of students achieving the standard of excellence met the target. The percentage of students achieving the acceptable standard has increased from 86.5 per cent in 2010-11 to 87.6 per cent in the current year, due primarily to the improvement in the results for English Language Arts 30-1. The overall proportion of students achieving the standard of excellence also increased, from 9.9 per cent in 2010-11 to 11.4 per cent in 2014-15.
- The percentages of students achieving the acceptable standard and the standard of excellence in diploma examinations have increased since 2010-11 for Social Studies 30-1, Biology 30, Chemistry 30, Physics 30 and Science 30. The proportions of students achieving the acceptable standard and the standard of excellence have decreased for Social Studies 30-2.
- Provincial achievement test results in Language Arts did not meet 2014-15 targets at the acceptable standard or the standard of excellence. The percentage of students that achieved the acceptable standard has decreased over time from 81.3 per cent in 2010-11 to 79.6 per cent in 2014-15, while the proportion of students who achieved the standard of excellence has decreased from 17.2 per cent to 16.6 per cent in 2014-15.
- Provincial achievement test results in Mathematics did not meet 2014-15 targets at the acceptable standard or the standard of excellence. The percentage of students that achieved the acceptable standard has decreased over time from 69.8 per cent in 2010-11 to 69.3 per cent in 2014-15, while the proportion of students who achieved the standard of excellence has decreased from 17.5 per cent to 15.9 per cent in 2014-15.
- The percentage of students achieving the acceptable standard in provincial achievement tests has remained stable for Science 6 and decreased for Science 9, Social Studies 6 and Social Studies 9 . The percentage of students achieving the standard of excellence has increased for Science 9 and Social Studies 9, and remained stable for Science 6 and Social Studies 6.
- The substantial gap between testing results for self-identified First Nations, Métis and Inuit (FNMI) students and the results for all students remains a key challenge for the KindergartenGrade 12 education system. No targets were set in the 2014-17 Business Plan for Language Arts diploma examination results for self-identified FNMI students. The overall percentage of self-identified FNMI students achieving the acceptable standard in 2014-15 was 84.5 per cent, a rate that has been stable over time. The proportion of self-identified FNMI students achieving the standard of excellence has increased from 4.4 per cent in 2010-11 to 7.1 per cent in 2014-15.
- The percentage of self-identified FNMI students achieving the acceptable standard in diploma examinations has increased for Chemistry 30, Physics 30 and Social Studies 30-1, remained stable for Biology 30 and Science 30, and decreased for Social Studies 30-2. The proportion achieving the standard of excellence has increased for Biology 30 and Chemistry 30, remained stable for Physics 30, Science 30 and Social Studies 30-1, and decreased for Social Studies 30-2.
- No targets were set in the 2014-17 Business Plan for Language Arts provincial achievement test results for self-identified FNMI students. The proportion of self-identified FNMI students who achieved the acceptable standard has remained stable from 2010-11 to 2014-15, with a percentage of 62.4 per cent in the current year. The percentage of self-identified FNMI
students that achieved the standard of excellence, 5.8 per cent in the current year, has remained stable over the same period.
- Over the past five years, the self-identified FNMI participation rate for Language Arts provincial achievement tests, which is the proportion of enrolled self-identified FNMI students that write the tests, has risen steadily from 80.9 per cent in 2010-11 to 83.4 per cent in 2014-15.
- No targets were set in the 2014-17 Business Plan for Mathematics provincial achievement test results for self-identified FNMI students. The proportion of self-identified FNMI students who achieved the acceptable standard has increased from 2010-11 to 2014-15, with a percentage of 46.1 per cent in the current year. The percentage of self-identified FNMI students that achieved the standard of excellence, 4.6 per cent in the current year, has remained stable over the same period.
- Over the past five years, the self-identified FNMI participation rate for Mathematics provincial achievement tests, which is the proportion of enrolled self-identified FNMI students that write the tests, has risen steadily from 80.5 per cent in 2010-11 to 83.8 per cent in 2014-15.
- Alberta Education is currently working with education partners to modernize provincial curriculum (programs of study, assessments, learning and teaching resources). To this end, the ministry is piloting new Student Learning Assessments to replace Grade 3 Provincial Assessment Tests. These new assessments are to better inform student learning by collecting valuable information at the beginning of the school year, while also including interactive approaches to help educators and parents understand how well students can apply what they have learned.

## Performance Measures Summary Table

Selecting measures and setting targets to assess, report and improve upon the performance of the Early Childhood Services to Grade 12 education system is key to being accountable for results. The performance measures and targets for 2014-15 are established in the Ministry of Education Business Plan for 2014-17.

Targets are considered met if the current result is not significantly different from the target value using statistical tests. Depending on the performance measure, this significant difference may vary. The table below presents a summary of performance measures reported in the Discussion and Analysis of Results section, pages 9-41, including:

- 2014-15 target and results
- change over time (five-year trend).

| Goal/Performance Measures |  | Prior Years' Results |  |  |  | Target | Current Actual |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | Success for every student |  |  |  |  |  |  |
| 2.a | Percentages of students who achieved standards on grade 6 and 9 provincial achievement tests: ${ }^{1}$ <br> Language Arts, <br> acceptable <br> all students excellence |  |  |  |  |  |  |
|  |  | $\begin{aligned} & 81.3 \% \\ & 17.2 \% \\ & 2010-11 \end{aligned}$ | $\begin{aligned} & 80.3 \% \\ & 16.8 \% \\ & 2011-12 \end{aligned}$ | $\begin{gathered} 80.5 \% \\ 15.5 \% \\ 2012-13 \end{gathered}$ | $\begin{gathered} 79.5 \% \\ 16.0 \% \\ 2013-14 \end{gathered}$ | $\begin{aligned} & \text { 82.8\% } \\ & \text { 18.7\% } \end{aligned}$ | $\begin{aligned} & 79.6 \% \\ & 16.6 \% \\ & 2014-15 \end{aligned}$ |
|  | Mathematics, acceptable <br> all students excellence | $\begin{aligned} & 69.8 \% \\ & 17.5 \% \\ & 2010-11 \end{aligned}$ | $\begin{gathered} 70.5 \% \\ 17.2 \% \\ 2011-12 \end{gathered}$ | $\begin{gathered} 70.5 \% \\ 17.1 \% \\ 2012-13 \end{gathered}$ | $\begin{aligned} & 70.2 \% \\ & 16.3 \% \\ & 2013-14 \end{aligned}$ | $\begin{aligned} & 70.9 \% \\ & 17.5 \% \end{aligned}$ | $\begin{aligned} & 69.3 \% \\ & 15.9 \% \\ & 2014-15 \end{aligned}$ |
| 2.b* Percentages of students who achieved standards on Language Arts diploma examinations: ${ }^{2}$ |  |  |  |  |  |  |  |
|  |  | $\begin{gathered} 86.5 \% \\ 9.9 \% \\ 2010-11 \end{gathered}$ | $\begin{gathered} 87.6 \% \\ 11.2 \% \\ 2011-12 \end{gathered}$ | $\begin{gathered} 87.4 \% \\ 10.7 \% \\ 2012-13 \\ \hline \end{gathered}$ | $\begin{aligned} & 88.6 \% \\ & 12.4 \% \\ & 2013-14 \end{aligned}$ | $\begin{aligned} & \text { 87.9\% } \\ & \text { 11.5\% } \end{aligned}$ | $\begin{aligned} & 87.6 \% \\ & 11.4 \% \\ & 2014-15 \end{aligned}$ |

*Indicates Performance Measure that has been reviewed by the Office of the Auditor General
The performance measure indicated with an asterisk ( ${ }^{*}$ ) was selected for review by ministry management based on the following criteria established by government:

- enduring measures that best represent the goal,
- measures for which new data is available, and
- measures that have well established methodology.

Notes: For information on assessing change over time and target achievement, please refer to Endnote A, page 42.
For information on the methodology employed in the test measures please refer to Endnote B, pages 43-45
${ }^{1}$ Results for 2012-13 have been restated to exclude students that did not write Provincial Achievement Tests because of the flooding in southern Alberta in 2013.
${ }^{2}$ Historical results for diploma examinations have been revised due to the implementation of the Provincial Approach to Student Information (PASI) which has provided a more complete rendering of students writing exams throughout the school year.

## Discussion and Analysis of Results

## GOAL 2

## Success for Every Student

Success for every student means that students are engaged and demonstrate ethical citizenship and entrepreneurship, while being proficient in literacy and numeracy, and have achieved Alberta's student learning outcomes. The ministry, in cooperation with stakeholders and partners, assists students in achieving success by providing flexible programming options designed to address the diversity of student needs. The ministry supports First Nations, Métis and Inuit student success by raising awareness of their unique needs; developing culturally relevant learning resources and programming opportunities; focusing on continuous improvement though appropriate accountability mechanisms; and working collaboratively with First Nations, Métis and Inuit communities.

## Goal 2 Performance Measures

## 2.a Overall Achievement Test Results in Language Arts

## Rationale

- Overall student achievement of standards on provincial achievement tests is a sound indicator of whether elementary and junior high students are achieving high standards in Language Arts, an important outcome for Alberta's K-12 education system.

## Target

- The targets for overall Language Arts provincial achievement test results at the acceptable standard and at the standard of excellence were not met.

## Discussion

- Overall results in Language Arts are calculated as an average of the results in the following seven subjects weighted by the number of individuals that were enrolled:
- English Language Arts 6 and 9
- French Language Arts 6 and 9
- Français 6 and 9
- English Language Arts 9 (Knowledge and Employability)
- Overall results in Language Arts at the acceptable standard and at the standard of excellence have declined over time.
- To support student learning in core subjects, the ministry provides programs of study and implementation guides for teachers and develops or authorizes learning resources for students in all grades and subjects.

## Discussion (continued):

- From 2010-11 to 2014-15, the overall participation rate for students taking Language Arts provincial achievement tests has remained stable.

Participation Rates for Language Arts Provincial Achievement Tests (in percentages)

| Subject | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Grade 6 |  |  |  |  |  |
| English Language Arts | 91 | 91 | 91 | 90 | 91 |
| French Language Arts | 97 | 97 | 98 | 98 | 98 |
| Français | 98 | 98 | 98 | 97 | 97 |
| Grade 9 |  |  |  |  |  |
| English Language Arts | 89 | 89 | 88 | 88 | 89 |
| English Language Arts (Knowledge and Employability) | 82 | 80 | 80 | 80 | 82 |
| French Language Arts | 97 | 97 | 97 | 97 | 96 |
| Français | 98 | 96 | 96 | 95 | 95 |
| Overall Language Arts |  |  |  |  |  |
|  | 90.2 | 90.1 | 90.1 | 89.7 | 90.0 |

[^0]
## Source: Alberta Education

## Note:

- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.

## 2.a Achievement Test Results in Language Arts by Individual Subject for Students in Grades 6 and 9

## Rationale

- Student results on provincial achievement tests in each grade and subject provide detailed information on whether elementary and junior high students are achieving high standards in Language Arts, an important outcome for Alberta's K-12 education system.

## Target

- Targets for individual Language Arts subject results were not set in the 2014-17 Business Plan.

## Discussion

- The proportion of students achieving the acceptable standard has decreased over time for French Language Arts 6 and 9, English Language Arts 9 and English Language Arts 9 (Knowledge and Employability). Results for English Language Arts 6 have remained stable.
- The proportion of students achieving the standard of excellence has decreased over time for French Language Arts 6 and 9, English Language Arts 9 and English Language Arts 9 (Knowledge and Employability) and has increased for English Language Arts 6.
- As adult literacy studies are not conducted regularly, Grade 9 results in Language Arts are regarded as indicators of literacy. Students who achieve the acceptable standard have developed the foundational skills needed to become literate adults. As indicated above, results at the acceptable standard have decreased over time for French Language Arts 9 and English Language Arts 9.
- Note that the flooding in southern Alberta in the summer of 2013 resulted in a reduction of approximately one-third in the number of students writing the Grade 9 English Language Arts Provincial Achievement Test, and this may have impacted the overall provincial result for that year. Caution needs to be exercised when comparing this result with current and prior years.

## Percentages of Students in Grades 6 and 9 who Achieved Standards on Provincial Achievement Tests in Language Arts

| Subject | Standard | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 | $\begin{aligned} & \text { Targets } \\ & \text { 2014-15 } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grade 6 |  |  |  |  |  |  |  |
| English Language Arts | excellence acceptable | $\begin{aligned} & 19 \\ & 83 \end{aligned}$ | $\begin{aligned} & 18 \\ & 83 \end{aligned}$ | $\begin{aligned} & 16 \\ & 83 \end{aligned}$ | $\begin{aligned} & 18 \\ & 82 \end{aligned}$ | $\begin{aligned} & 20 \\ & 83 \end{aligned}$ |  |

${ }^{1}$ Results for 2012-13 have been restated to exclude students that did not write Provincial Achievement Tests because of the flooding in southern Alberta in 2013.

Source: Alberta Education

Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.
- See Endnote A, page 42, for information on assessing results relative to targets, and results over time.
- See Endnote B, Provincial Achievement Tests, page 43-44.

## 2.a Overall Achievement Test Results in Mathematics

## Rationale

- Overall student achievement of standards on provincial achievement tests is a sound indicator of whether elementary and junior high students are achieving high standards in Mathematics, an important outcome for Alberta's K-12 education system.

## Target

- The targets for overall Mathematics provincial achievement test results at the acceptable standard and at the standard of excellence were not met.

## Discussion

- Overall results in Mathematics are calculated as an average of the results in the following three subjects weighted by the number of individuals that were enrolled:
- Mathematics 6 and 9
- Mathematics 9 (Knowledge and Employability)
- Overall results in Mathematics at the acceptable standard and at the standard of excellence have declined over time.
- To support student learning in core subjects, the ministry provides programs of study and implementation guides for teachers and develops or authorizes learning resources for students in all grades and subjects.

Overall Percentages of Students who Achieved Standards in Mathematics Provincial Achievement Tests

Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall Mathematics results are a weighted average based on total enrolment in Grades 6 and 9 Mathematics courses.
- See Endnote A, page 42, for information on assessing results relative to targets, and results over time.
- See Endnote B, Provincial Achievement Tests, pages 43-44.

## Discussion (continued):

- From 2010-11 to 2014-15, the overall participation rate for students taking Mathematics provincial achievement tests has remained stable.

Participation Rates for Provincial Achievement Tests in Mathematics (in percentages)

|  | Subject | $\mathbf{2 0 1 0 - 1 1}$ | $\mathbf{2 0 1 1 - 1 2}$ | $\mathbf{2 0 1 2 - 1 3}^{1}$ | 2013-14 | 2014-15 |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Grade 6 | Mathematics | 91 | 91 | 91 | 91 | 91 |
| Grade 9 |  | 89 | 90 | 89 | 89 | 89 |
|  | Mathematics | 87 | 87 | 88 | 86 | 86 |
| Mathematics <br> (Knowledge \& Employability) | $\mathbf{9 0 . 1}$ | $\mathbf{9 0 . 3}$ | $\mathbf{9 0 . 0}$ | $\mathbf{8 9 . 8}$ | $\mathbf{9 0 . 0}$ |  |
| Overall Mathematics |  |  |  |  |  |  |

${ }^{1}$ Results for 2012-13 have been restated to exclude students that did not write Provincial Achievement Tests because of the flooding in southern Alberta in 2013.

## Source: Alberta Education

## Note:

- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.

## 2.a Achievement Test Results in Mathematics by Individual Subject for Students in Grades 6 and 9

## Rationale

- Student results on provincial achievement tests in each grade and subject provide detailed information on whether elementary and junior high students are achieving high standards in Mathematics, an important outcome for Alberta's K-12 education system.

## Target

- Targets for individual Mathematics subject results were not set in the 2014-17 Business Plan.

## Discussion

- The proportion of students achieving the acceptable standard has decreased over time for Mathematics 9 and Mathematics 9 (Knowledge and Employability), while the proportion for Mathematics 6 has remained stable.
- The proportion of students achieving the standard of excellence has decreased over time for Mathematics 6, while the proportion for Mathematics 9 (Knowledge and Employability) has remained stable. The proportion of students achieving the standard of excellence has increased for Mathematics 9.
- Note that the flooding in southern Alberta in the summer of 2013 resulted in a reduction of approximately one-third in the number of students writing the Grade 9 Mathematics Provincial Achievement Test, and this may have impacted the overall provincial result for that year. Caution needs to be exercised when comparing this result with current and prior years.

Percentages of Students in Grades 6 and 9 who Achieved Standards on Provincial Achievement Tests in Mathematics

| Subject | Standard | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 | $\begin{aligned} & \text { Targets } \\ & \text { 2014-15 } \end{aligned}$ |

## Supplementary Information:

## Other Subjects

## Discussion

- From 2010-11 to 2014-15, the participation rates for students taking Provincial Achievement Tests in subjects other than Mathematics and Language Arts have remained stable.
- The proportion of students achieving the acceptable standard has remained stable since 2010-11 for Science 6 and decreased for Science 9 and Science 9 (Knowledge and Employability).
- The proportion of students achieving the standard of excellence has increased since 2010-11 for Science 9 and remained stable for Science 6 and Science 9 (Knowledge and Employability).
- The proportion of students achieving the acceptable standard has decreased since 2010-11 for Social Studies 6 and 9, and Social Studies 9 (Knowledge and Employability).
- The proportion of students that achieved the standard of excellence has increased since 2010-11 for Social Studies 9, remained stable for Social Studies 6, and declined for Social Studies 9 (Knowledge and Employability).

|  | acceptable | 62 | 64 | 65 | 62 | 57 |

[^2]Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Provincial Achievement Tests, pages 43-44.

## Supplementary Information:

## Overall First Nations, Métis and Inuit (FNMI) Achievement Test Results in Language Arts

## Rationale:

- Overall FNMI student achievement of standards on provincial achievement tests is a sound indicator of whether self-identified FNMI elementary and junior high students are achieving high standards in Language Arts, an important outcome for Alberta's K-12 education system.

## Target:

- Targets were not set for self-identified FNMI students in the 2014-17 Business Plan.

## Discussion:

- Overall results in Language Arts are calculated as an average of the results in the following seven subjects, weighted by the number of individuals that were enrolled (Note that Français 9 was excluded from the calculations as less than six students wrote the test):
- English Language Arts 6 and 9
- French Language Arts 6 and 9
- Français 6 and 9
- English Language Arts 9 (Knowledge and Employability)
- Overall FNMI results in Language Arts at the acceptable standard and at the standard of excellence have remained stable over time.

Overall Percentages of Self-Identified FNMI
Students who Achieved Standards in
Language Arts Provincial Achievement Tests

Source: Alberta Education

## Notes:

- The results reported are solely based on students who identified themselves as Indian/First Nations, Métis, and Inuit. These students may not be fully representative of the population of Aboriginal students. Discretion should be applied when interpreting the results over time.
- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall Language Arts results are a weighted average based on total enrolment in Grades 6 and 9 Language Arts courses.
- Due to the flooding in southern Alberta in the summer of 2013, the number of students writing the Grade 9 English Language Arts Provincial Achievement Test was reduced and this may have impacted the overall average for that year.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Provincial Achievement Tests, pages 43-44.

## Discussion (continued):

- From 2010-11 to 2014-15, the overall participation rate for self-identified FNMI students taking Language Arts provincial achievement tests increased from 80.9 per cent to 83.4 per cent.

FNMI Participation Rates for Language Arts Provincial Achievement Tests (in percentages)

| Subject | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Grade 6 |  |  |  |  |  |
| English Language Arts | 86 | 87 | 87 | 86 | 87 |
| French Language Arts | 97 | 95 | 98 | 92 | 94 |
| Français | * | * | * | * | 100 |
| Grade 9 |  |  |  |  |  |
| English Language Arts | 76 | 76 | 79 | 79 | 80 |
| English Language Arts (Knowledge \& Employability) | 73 | 70 | 76 | 77 | 75 |
| French Language Arts | 95 | 100 | 92 | 97 | 89 |
| Français | * | n/a | * | * | * |
| Overall Language Arts |  |  |  |  |  |
|  | 80.9 | 81.4 | 83.3 | 82.5 | 83.4 |

[^3]
## Source: Alberta Education

Notes:

- An asterisk (*) indicates suppression has been applied because fewer than six students wrote the test, while $\mathrm{n} / \mathrm{a}$ indicates no selfidentified FNMI students wrote the test.
- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.

## FNMI Achievement Test Results in Language Arts by Individual Subject for Students in Grades 6 and 9

## Rationale:

- Self-identified FNMI student results on provincial achievement tests in each grade and subject provide detailed information on whether self-identified FNMI elementary and junior high students are achieving high standards in Language Arts, an important outcome for Alberta's K-12 education system.

## Target:

- Targets were not set for self-identified FNMI students in the 2014-17 Business Plan.

## Discussion:

- The proportion of self-identified FNMI students achieving the acceptable standard and the standard of excellence has increased for English Language Arts 6 and remained stable for English Language Arts 9.
- As adult literacy studies are not conducted regularly, Grade 9 results in Language Arts are regarded as indicators of literacy. Self-identified FNMI students who achieve the acceptable standard have developed the foundational skills needed to become literate adults. As indicated above, results at the acceptable standard have remained stable for English Language Arts 9.
- Note that the flooding in southern Alberta in the summer of 2013 resulted in a reduction in the number of students writing the Grade 9 English Language Arts Provincial Achievement Test, and this may have impacted the overall result for that year.

Percentages of Self-Identified FNMI Students in Grades 6 and 9 who Achieved Standards on Provincial Achievement Tests in Language Arts

| Subject | Standard | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 |

## Supplementary Information:

## English as a Second Language (ESL) Students Achievement Test Results in English Language Arts

## Discussion:

- The goal of ESL programs is to provide students with planned systematic instruction and support that will enable them to speak the English language fluently, further their education and become productive and contributing members of Albertan and Canadian society. ESL programming is funded for both Canadian-born and foreign-born students.
- The proportion of ESL students that achieved standards on English Language Arts Provincial Achievement Tests has remained stable over time at both the acceptable standard and the standard of excellence.
- Targets were not set for ESL students in the 2014-17 Business Plan.

Overall Percentages of ESL Students who Achieved Standards in English Language Arts Provincial Achievement Tests

Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall English Language Arts results are a weighted average based on total enrolment in Grades 6 and 9 English Language Arts courses.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Provincial Achievement Tests, pages 43-44.

## Discussion (continued):

- The participation rate for ESL students taking English Language Arts provincial achievement tests, 88.5 per cent in the current year, has remained stable over time.

ESL Participation Rates for English Language Arts Provincial Achievement Tests (in percentages)

| Subject | 2010-11 | 2011-12 | 2012-13 ${ }^{1}$ | 2013-14 | 2014-15 |

## Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Knowledge and Employability courses are designed for students who meet enrollment criteria and learn best through experiences that integrate essential and employability skills in occupational contexts.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Provincial Achievement Tests, pages 43-44.

## 2.b Diploma Examination Results In Language Arts

## Rationale:

- Student results on diploma examinations are a solid indicator of whether high school students are achieving high standards.
- The language arts diploma examination measure is an aggregate of four Language Arts courses. This reflects a focus on fundamental literacy skills, an important outcome for Alberta's K-12 education system.

## Targets:

- The target for overall Language Arts results at the acceptable standard was not met; the target at the standard of excellence was met.

## Discussion:

- The Language Arts measure is an average of the results in the following four subjects, weighted by the total number of individuals that wrote each of the exams:
- English Language Arts 30-1
- English Language Arts 30-2
- French Language Arts 30-1
- Français 30-1
- The proportion of students achieving the acceptable standard in Language Arts has increased over time, primarily due to higher results in English Language Arts 30-1.
- The proportion of students achieving the standard of excellence in Language Arts has increased over time, primarily due to higher results in English Language Arts 30-1 and 30-2.

Overall Percentages of Students who Achieved Standards in Language Arts Diploma Examinations

## Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall results for language arts are a weighted average of results for the four language arts subjects.
- See Endnote A, page 42, for information on assessing results relative to targets, and results over time.
- See Endnote B, Diploma Examinations, pages 44-45.

## Discussion (continued):

- Results at the acceptable standard have improved over time for English Language Arts 30-1, and have remained stable for English Language Arts 30-2.
- Results at the standard of excellence have improved over time for English Language Arts 30-1 and 30-2.

Percentages of Students Writing Language Arts Diploma Examinations who Achieved Standards

| Subject | Standard | 2010-11 ${ }^{1}$ | 2011-12 ${ }^{1}$ | 2012-13 ${ }^{1}$ | 2013-14 ${ }^{1}$ | 2014-15 | Targets <br> 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| English Language Arts 30-1 | excellence | 10 | 11 | 10 | 12 | 11 |  |
|  | acceptable | 85 | 86 | 86 | 88 | 87 |  |
| English Language Arts 30-2 | excellence | 9 | 11 | 11 | 13 | 11 |  |
|  | acceptable | 89 | 90 | 89 | 90 | 89 |  |
| French Language Arts 30-1 | excellence | 14 | 13 | 12 | 15 | 10 |  |
|  | acceptable | 95 | 96 | 95 | 97 | 95 |  |
| Français 30-1 | excellence | 20 | 19 | 18 | 29 | 17 |  |
|  | acceptable | 94 | 97 | 97 | 99 | 95 |  |
| Overall Language Arts | excellence | 9.9 | 11.2 | 10.7 | 12.4 | 11.4 | 11.5 |
|  | acceptable | 86.5 | 87.6 | 87.4 | 88.6 | 87.6 | 87.9 |

${ }^{1}$ Historical results for diploma examinations have been revised due to the implementation of the Provincial Approach to Student Information (PASI) which has provided a more complete rendering of students writing exams throughout the school year.

## Source: Alberta Education

Notes:

- The percentages of students who achieved the acceptable standard include the percentages of students who achieved the standard of excellence.
- Equating of diploma examinations has been phased in over the past number of years making results directly comparable from year to year for the equated tests. Results are comparable for all years reported from 2010-11 to 2014-15 for English Language Arts 30-1 and 30-2, but not for French Language Arts 30-1 and Français 30-1.
- Overall results for language arts are a weighted average of results for the four language arts subjects.
- See Endnote A, page 42, for information on assessing results relative to targets and results over time.
- See Endnote B, Diploma Examinations, pages 44-45.

## Supplementary Information:

## Other Subjects

## Discussion:

- The proportion of students that achieved the acceptable standard has increased since 2010-11 for Social Studies 30-1, Biology 30, Chemistry 30, Physics 30 and Science 30; the proportion has declined for Social Studies 30-2.
- The proportion of students that achieved the standard of excellence has increased since 2010-11 for Social Studies 30-1, Biology 30, Chemistry 30, Physics 30 and Science 30; the proportion has declined for Social Studies 30-2.

Percentages of Students Writing Diploma Examinations other than Language Arts who Achieved Standards

| Subject | Standard | 2010-11 ${ }^{1}$ | 2011-12 ${ }^{1}$ | 2012-13 ${ }^{1}$ | 2013-14 ${ }^{1}$ | 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Mathematics 30-1 | excellence | - | - | 36 | 28 | 32 |
|  | acceptable | - | - | 81 | 75 | 76 |
| Mathematics 30-2 | excellence | - | - | 10 | 15 | 15 |
|  | acceptable | - | - | 70 | 71 | 74 |
| Social Studies 30-1 | excellence | 15 | 17 | 15 | 14 | 16 |

| Physics 30 | excellence | 28 | 30 | 30 | 34 | 36 |
|  | acceptable | 77 | 81 | 81 | 83 | 84 |
| Science 30 | excellence | 21 | 22 | 26 | 25 | 27 |
|  | acceptable | 80 | 80 | 84 | 85 | 84 |

${ }^{1}$ Historical results for diploma examinations have been revised due to the implementation of the Provincial Approach to Student Information (PASI) which has provided a more complete rendering of students writing exams throughout the school year.

Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the percentages of students who achieved the standard of excellence.
- A dash (-) indicates data are not available.
- Equating of diploma examinations has been phased in over the past number of years making results directly comparable from year to year for the equated tests. Results are comparable for Biology 30 since 2005-06, Science 30 and Chemistry 30 since 2010-11, Social Studies 30-2 since 2011-12, Social Studies 30-1 since 2012-13 and Physics 30 since 2013-14.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Diploma Examinations, pages 44-45.

## Supplementary Information:

## First Nations, Métis and Inuit (FNMI) Diploma Examination Results in Language Arts

## Rationale:

- Self-identified FNMI student results on diploma examinations are a solid indicator of whether self-identified FNMI high school students are achieving high standards.
- The language arts diploma examination measure is an aggregate of four Language Arts courses. This reflects a focus on fundamental literacy skills, an important outcome for Alberta's K-12 education system.

## Targets:

- Targets were not set for self-identified FNMI students in the 2014-17 Business Plan.

## Discussion:

- The Language Arts measure is an average of the results in the following four subjects, weighted by the total number of individuals that wrote each of the exams:
- English Language Arts 30-1
- English Language Arts 30-2
- French Language Arts 30-1
- Français 30-1
- Results for Français 30-1 have not been included because fewer than six self-identified FNMI students wrote the exam.
- The proportion of self-identified FNMI students achieving the acceptable standard has been stable over time.
- The proportion of self-identified FNMI students achieving the standard of excellence increased from 2010-11 to 2011-12 and has remained stable since 2011-12.

Overall Percentages of Self-Identified FNMI Students who Achieved Standards in Language Arts Diploma Examinations

Source: Alberta Education
Notes:

- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- Overall results for language arts are a weighted average of results for the four language arts subjects.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Diploma Examinations, pages 44-45.

## Discussion (continued):

- Results at the acceptable standard have been stable over time for English Language Arts 30-1 and $30-2$.
- Results at the standard of excellence have improved over time for English Language Arts 30-1 and remained stable for English Language Arts 30-2.

Percentages of Self-Identified FNMI Students Writing Language Arts Diploma Examinations who Achieved Standards

| Subject | Standard | 2010-11 ${ }^{1}$ | 2011-12 ${ }^{1}$ | 2012-13 ${ }^{1}$ | 2013-14 ${ }^{1}$ | 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| English Language Arts 30-1 | excellence | 1 | 5 | 4 | 5 | 5 |
|  | acceptable | 79 | 75 | 75 | 80 | 80 |
| English Language Arts 30-2 | excellence | 7 | 9 | 7 | 10 | 8 |
|  | acceptable | 88 | 88 | 88 | 88 | 87 |
| French Language Arts 30-1 | excellence | 0 | 5 | 0 | 7 | 3 |
|  | acceptable | 96 | 86 | 100 | 93 | 94 |
| Français 30-1 | excellence | n/a | n/a | n/a | * | * |
|  | acceptable | n/a | n/a | n/a | * | * |
| Overall Language Arts | excellence | 4.4 | 7.5 | 5.7 | 8.0 | 7.1 |
|  | acceptable | 84.9 | 82.8 | 82.5 | 84.9 | 84.5 |

${ }^{1}$ Historical results for diploma examinations have been revised due to the implementation of the Provincial Approach to Student Information (PASI) which has provided a more complete rendering of students writing exams throughout the school year.
Source: Alberta Education

## Notes

- The results reported are based solely on students who identified themselves as Indian/First Nations, Métis, and Inuit.
- These students may not be fully representative of the population of Aboriginal students. Discretion should be applied when interpreting the results over time.
- The percentages of students who achieved the acceptable standard include the students who achieved the standard of excellence.
- An asterisk (*) indicates suppression has been applied because fewer than six self-identified FNMI students wrote the test, while $\mathrm{n} / \mathrm{a}$ indicates no self-identified FNMI students wrote the test.
- Equating of diploma examinations has been phased in over the past number of years, making results directly comparable from year to year for the equated tests. Results are comparable for all years reported from 2010-11 to 2014-15 for English Language Arts 30-1 and 30-2, but not for French Language Arts 30-1 and Français 30-1.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Diploma Examinations, page 44-45.

## Supplementary Information:

## Other Subjects (FNMI Students)

## Discussion:

- The proportion of students achieving the acceptable standard has increased since 2010-11 for Social Studies 30-1, Chemistry 30 and Physics 30, and remained stable for Biology 30 and Science 30; the proportion has declined for Social Studies 30-2.
- The proportion of students achieving the standard of excellence has increased since 2010-11 for Biology 30 and Chemistry 30, and remained stable for Social Studies 30-1, Physics 30 and Science 30; the proportion has declined for Social Studies 30-2.

Percentages of Self-Identified FNMI Students Writing Diploma Examinations other than Language Arts that Achieved Standards

| Subject | Standard | 2010-11 ${ }^{1}$ | 2011-12 ${ }^{1}$ | 2012-13 ${ }^{1}$ | 2013-14 ${ }^{1}$ | 2014-15 |

## English as a Second Language (ESL) Students Diploma Examination Results in English Language Arts

## Discussion:

- The goal of ESL programs is to provide students with planned systematic instruction and support that will enable them to speak the English language fluently, further their education and become productive and contributing members of Albertan and Canadian society. ESL programming is funded for both Canadian-born and foreign-born students.
- Targets were not set for ESL students in the 2014-17 Business Plan.
- The proportions of ESL students that achieved the acceptable standard and the standard of excellence in English Language Arts diploma examinations have increased over time.
- ESL results at the acceptable standard have improved over time for English Language Arts 30-1 and remained stable for English Language Arts 30-2.
- ESL results at the standard of excellence have improved over time for English Language Arts 30-1 and 30-2.

Percentages of ESL Students Writing English Language Arts Diploma Examinations who Achieved Standards

| Subject | Standard | 2010-11 ${ }^{1}$ | 2011-12 ${ }^{1}$ | 2012-13 ${ }^{1}$ | 2013-14 ${ }^{1}$ | 2014-15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

${ }^{1}$ Historical results for diploma examinations have been revised due to the implementation of the Provincial Approach to Student Information (PASI) which has provided a more complete rendering of students writing exams throughout the school year.

## Source: Alberta Education

## Notes:

- The percentages of students who achieved the acceptable standard include the percentages of students who achieved the standard of excellence.
- A dash (-) indicates that data are not available.
- Equating of diploma examinations has been phased in over the past number of years making results directly comparable from year to year for the equated tests. Results are comparable for Biology 30 since 2005-06, Science 30 and the new Chemistry 30 since 2010-11, Social Studies 30-2 since 2011-12, and Social Studies 30-1 since 2012-13, but results are not comparable for French Language Arts 30-1 and Français 30-1.
- See Endnote A, page 42, for information on assessing results over time.
- See Endnote B, Diploma Examinations, pages 44-45.

## Endnotes for Performance Measures

## Endnote A: <br> Technical Notes

## Assessing Results Over Time

Changes over time are assessed with a Chi-square statistical test for measures based on tests of student learning. The test determines whether the difference between two proportions is significant. The calculation of Chi-square is based on the difference between what was observed and what would be expected assuming that the proportions were the same. Under a simple test of proportions, a Chi-square value of 1 represents a difference of one standard deviation, while a Chisquare value of 3.84 is significant at the $5 \%$ level. Discussion of results over time for the non-survey measures is supported by this test of significant difference.

## Assessing Results Relative to Targets

Performance targets set expectations for results within specific time frames and are the basis for planning improvements and assessing results that are within the sphere of influence of the ministry and school authorities. They are an important way to gauge whether the education system is improving or falling behind in obtaining desired results in key areas. Targets clearly establish desired levels of performance better than recent performance, to be attained within a specific timeframe. Targets are quantifiable and expressed in numerical terms, such as percentages or ratios. They are used as a key tool to drive, measure, improve and manage performance.

For measures based on achievement tests, diploma exams and administrative data, the Chi-square statistical test is used to determine whether the result is significantly different from the target. The magnitude of the difference required between the result and the target for each test to establish significance depends on the sample size, e.g., the number of students writing an exam, and the proportion, e.g., the percentage of students meeting standards.

## Trend Lines

Although not appearing in the annual report, trend lines are an aid to interpreting the results for measures reported in the annual report. Trend lines augment data interpretation techniques already in use such as the calculation of confidence intervals, which is used to determine the significance of changes in measure results over time.
Trend lines are used to develop an expected value for a current result given historical results. The expected value can then be compared with the actual result. In this way, trend lines provide a useful method of understanding year-to-year fluctuations and shift the focus from smaller year-to-year changes to providing information about the direction of results over the longer-term. In particular it is of interest whether results are tracking towards the performance target for the measures that have not met targets. Discussion of results over time for measures with at least three data points are supported by trend lines. The type of trend line used is selected based on an informed interpretation of the data series underlying the trend. Logarithmic trend lines are appropriate for proportional data, i.e., data expressed as percentages of a whole, and therefore ranging between 0 per cent and 100 per cent, such as the performance measures in this report. A logarithmic trend line is a best-fit straight line that is most useful when the rate of change in the data increases or decreases quickly, then levels out. The leveling out can be seen in the results for some measures in the report, along with examples of year-toyear increases or decreases on other measures.

A logarithmic trend line is calculated using the following formula:
$Y=c \ln (x)+b$, where $c$ and $b$ are constants and $\operatorname{In}()$ is the natural logarithm function and $x$ is the year of the series.

## Endnote B: Methodology for Performance Measures

Described below are the methodologies used to calculate the measures that are derived from provincial assessments of student learning and from other information about Alberta students in the Ministry of Education's data systems.

## Definition of Alberta Student

Starting with 2013-14, the definition of an Alberta student is an individual who is registered as of September 30 of the school year in a school located in Alberta, where "school" means a structured learning environment through which an education program is offered to a student by: a board (includes public, separate, Francophone, Lloydminster); an operator of a private school; an early childhood services (ECS) program private operator; the operator of a charter school; a parent giving a home education program; the Minister. It also includes other Alberta-located educational institutions providing ECS to Grade 12 curriculum instruction, specifically Federal (First Nations schools and those operated by Corrections Canada); and provincial authorities (such as the four former Alberta Vocational Colleges).

From 2008-09 to 2012-13, the definition of an Alberta Education student is an individual who is 19 years of age or younger on September 1 of the school year and is registered as of September $30^{\text {th }}$ of the school year in an Alberta Education School operated by a public, separate, francophone, charter or accredited funded private school authority. The definition includes children registered in an ECS program in an Alberta Education School operated by a public, separate, francophone, charter or accredited funded private school authority or approved private ECS operator as of September 30 of the school year.

## Results for First Nations, Métis and Inuit (FNMI) Students

Calculating results for FNMI students is possible because school jurisdictions have been required to include a voluntary FNMI selfidentification question on school registration forms for several years and to report the identifier to the ministry's student data system. Self-identification of students has increased each year. Students' FNMI self-identification information associated with their most recent school registration is used to calculate results. This provides the most complete results and reflects the student's intent to be identified.

## Results for English as a Second Language (ESL) Students

The calculation of results for ESL students is based on the number of ESL students for whom funding was provided to school authorities for ESL programming. ESL programming is designed for children/students who require additional English language supports and instruction to achieve grade level expectations in English and other subject areas. This group includes both Canadian-born and foreign-born students. Students funded for an ESL program in the year reflected in the measure are included in the ESL results. For example, Grade 6 students funded for ESL in 2014-15 are included in the Grade 6 ESL Provincial Achievement Test results.

## Provincial Achievement Tests

Students in Grades 6 and 9 write Provincial Achievement Tests annually in Language Arts and mathematics. Grades 6 and 9 students also write tests in Science and Social Studies. The achievement test results for Grades 6 and 9 provide information on how well Alberta students in public, separate, francophone, charter and accredited private schools are meeting provincial standards in the core academic subjects. Tests are developed and administered by teachers and educators and are based on the provincial curriculum. Results are reported in relation to the standards of acceptable and excellence.

A student achieving the acceptable standard in a specific grade shows an adequate understanding of the core knowledge and adequate basic skills essential to that course. A student achieving the standard of excellence consistently shows a deeper understanding of the concepts of the course by demonstrating an ability to integrate information and evaluate it from various points of view.

For each achievement test, the cut scores for the acceptable standard and the standard of excellence are set initially by a standard-setting committee of about 20 teachers using the Modified Angoff and Bookmark Standard Setting Procedures. These procedures use teachers' judgment to determine a minimum number of items a student must answer correctly - the cut score - to achieve each standard. In subsequent years, the cut scores for each test are adjusted through test equating. This ensures the standards remain constant even if test difficulty varies slightly from year to year. Whenever curriculum is revised, the standard-setting process is done again.

Results on provincial achievement tests are calculated and presented on the basis of the total number of students in each grade who demonstrated the standards. Results for mathematics, science and social studies include student results on both English and French versions of the tests. Given the large number of students in each grade (more than 40,000 ), differences in results from year to year of more than 0.4 percentage points on each test are considered significant. French Language Arts and Français courses have higher significant difference values ( 1.1 to 3.7 percentage points, depending on the number of students in each course), because fewer students are in these courses.

Not all students write the Provincial Achievement Tests. Achievement test results are not available for students who:

- were absent
- were excused from writing by the superintendent because participation would be harmful to the student or the student could not respond to the test instrument
- wrote but whose results were withheld or invalidated
- wrote only one part of the two-part Language Arts test.
It is possible that some of these students, under different circumstances, could have demonstrated achievement of standards on the test.

Participation rates in achievement tests are calculated by dividing the number of students in the grade who wrote the test by the sum of total enrolment in the grade plus the ungraded students who are in the corresponding year of schooling.

Provincial overall results in Language Arts present weighted averages based on the number of students enrolled in each Language Arts course. Test results and participation are recorded and aggregated in ministry systems. Provincial, school authority and school results are available at http://www.education.alberta.ca/admin/testing. aspx.

## Diploma Examinations

Examinations are administered in all Diploma examination courses in January, June and August each year. Examinations are also administered in selected courses in November and April. Provincial Assessments are meant to complement day-to-day classroom assessment. Results on Diploma Examinations show how well Alberta students in public, separate, francophone, charter and accredited private schools are meeting provincial expectations as outlined in the Programs of Study. Examination items are developed and standards are established by committees of
teachers. The examination design is vetted through committees of stakeholders and by a standardsetting committee of teachers.

A test equating initiative has been phased in for the Diploma Examination Program so that over time examinations are consistent and the results are comparable. The multiple-choice portion of the examinations contains a set of items common to administrations in subsequent years. By comparing the achievement of students writing in a baseline session with those writing in any subsequent administration on the common items and on the unique items, Alberta Education is able to determine whether or not the examinations are of equal difficulty. Student scores on the subsequent examinations can then be equated back to the baseline examinations to remove any influence that differences in examination difficulty may have on student scores.

Through equating, test results for a particular course are based on an identical standard and, consequently, can be directly compared over time. As a result of implementing the equating process, diploma examination results are comparable over time as follows:

- Biology 30, English Language Arts 30-1, and English Language Arts 30-2 since 2005-06
- $\quad$ Science 30 and Chemistry 30 since 2010-11
- Social Studies 30-2 since 2011-12,
- Social Studies 30-1 since 2012-13 and
- Physics 30 since 2013-14.

Diploma Examination results are reported in relation to the acceptable standard and the standard of excellence. Results for mathematics, sciences and social studies include results for both English and French versions of the tests. Provincial overall results in Language Arts present weighted averages based on the numbers of students writing Language Arts Diploma Examinations. Students achieving the acceptable standard demonstrate that they have met the basic requirements of the course. A mark of 50 per cent on the examination represents the acceptable standard in a Diploma Examination course. A mark of 80 per cent on the examination represents the standard of excellence and indicates
the student has demonstrated performance significantly beyond the minimum requirements of the course. For student marks in Diploma Examination courses from 2010-11 to 2014-15, the diploma examination mark is worth 50 per cent of the final mark in a course and the school-awarded mark contributes the other 50 per cent.

Starting from the 2009-10 school year, the written-response component has been removed from the math and science Diploma Examinations. More machine-scored items, particularly numerical response items, have been added to these examinations to maintain the same quality and standards.

Diploma Examination results are recorded and aggregated in ministry systems. Provincial, school authority and school results reports are available at http://www.education.alberta.ca/admin/testing. aspx.

[^0]:    ${ }^{1}$ Results for 2012-13 have been restated to exclude students that did not write Provincial Achievement Tests because of the flooding in southern Alberta in 2013.
