

# Backcountry Trail Flood Rehabilitation Program

## Elbow Valley Trail Over Canyon Creek

Competition Date: April 2015

### Website Information

Further information on the program, as well as an interactive web map can be found by visiting:

- [Backcountry Trail Flood Map](#)

It is also encouraged to visit the web map before heading into the backcountry within the program area. Trails which are under construction or under a temporary closure are updated weekly so you can Know Before You Go.

## Elbow Valley Trail Over Canyon Creek

This trail is a popular non-motorized trail near the Elbow River Launch Provincial Recreation Area (PRA). It was heavily damaged during the 2013 flood and users were creating new paths wherever they could find a place to cross Canyon Creek. Log debris and steep creek banks also made crossing difficult.

In April 2015, BTFR trail crews cleared a defined path through debris and signed the trail. They also deactivated all non-designated trails across Canyon Creek to minimize disturbance..
