Economy recovering as expected

Alberta economic growth is recovering as expected. Overall, the forecast for real GDP growth in 2018 remains unchanged at 2.7%.

The Alberta Activity Index is now above its pre-recession peak. Oil prices, energy activity and exports have strengthened more than expected.

Exports are expected to continue expanding into 2019, and household earnings are also estimated to strengthen. Real GDP is forecast to grow 2.7% next year, slightly higher than the 2.5% growth estimated in budget.

Improved oil prices and corporate earnings are translating, slowly, to an increase in conventional energy investment. For example, rigs drilling in 2018 is averaging nearly 7% higher than 2017 so far this year. It is expected that non-conventional investment growth will turn positive in 2019, the first year of growth since 2014.

Alberta's labour market is also improving, with employment growth notable in the higher-earnings goods sector and in full-time positions. Employment is expected to expand 1.9% in 2018, roughly in line with the Budget 2018 estimate. Overall activity in the household and construction sectors is slightly below budget estimates though.

Deficit and borrowing lower

The 2018-19 deficit is now forecast at $7.8 billion, $1 billion lower than Budget 2018:

- Total revenue of $49.1 billion is forecast, up $1.2 billion from budget, due primarily to higher personal income tax, resource revenue and federal transfers, partially offset by lower investment income.

- Total expense of $56.3 billion is forecast, up $146 million from Budget 2018. Expense increases are mainly related to capital grants re-profiled from 2017-18 and funded using federal infrastructure program dedicated revenue.

- 2018-19 Capital Plan spending is forecast to be largely unchanged from budget, with projects from 2017-18 re-profiled or carried-over into this year essentially offset by projects re-profiled from 2018-19 to future years, based on progress.

- Mainly as a result of the lower deficit, borrowing for the Fiscal Plan and Capital Plan is now projected to be $1.3 billion lower than initially estimated in Budget 2018.

Alberta Economic Activity

Year-over-year % change

Substantial uncertainty remains, with significant volatility in oil prices and the light-heavy oil price differential, as well as ongoing global market and geopolitical risks.
2018–19 First Quarter Fiscal Update

Fiscal Plan Highlights

A deficit of $7.8 billion is forecast for 2018-19, $1 billion lower than estimated in Budget 2018, due primarily to higher revenue.

Total revenue of $49.1 billion is forecast, up $1,191 million from budget. Higher resource revenue, personal income taxes and federal transfers are partly offset by lower investment income.

Total expense of $56.3 billion has increased $146 million from budget:

- Operating expense (excluding Climate Leadership Plan - CLP) is $52 million higher, reflecting increases for advocacy regarding the Trans Mountain pipeline, a contract for highway maintenance, the Victims of Crime Fund, the plebiscite regarding the 2026 Calgary Olympic bid, and several dedicated revenue programs. CLP operating expense is $5 million lower due to a reallocation to CLP capital grants.
- Capital grant expense has been increased by a net $129 million, mainly from re-profiling federally-funded municipal infrastructure programs, and a transfer from capital investment.
- Other expense is down $31 million, due to lower debt servicing costs mainly from reduced borrowing.

The Capital Plan is in line with budget, at $6.4 billion. Decreases from re-profiling of health, transportation and housing projects to future years are offset by re-profiling of the federally-funded municipal grants from 2017-18, and by capital investment carry-overs from 2017-18.

Direct borrowing for the Fiscal Plan is estimated at $5.8 billion, $1,228 million lower than budget, due primarily to the lower forecast deficit. Direct borrowing for the Capital Plan is forecast at $3.7 billion, a decrease of $79 million from budget, due mainly to additional federal cash transfers.

Revenue and Expense Highlights

**Total Revenue** is forecast to be $49.1 billion, $1.2 billion higher than estimated in *Budget 2018*.

- Resource revenue of $4.7 billion is forecast, $908 million higher than budget, mainly from higher oil prices and a lower US-Canadian dollar exchange rate. The West Texas Intermediate (WTI) oil price is assumed to average US$61 per barrel for the fiscal year. While prices have averaged US$68.40 from April 1 to August 20, significant uncertainty remains. As it is early in the fiscal year, and substantial risk remains, the WTI price is only being increased by US$2 from *Budget 2018*. The US-Canadian dollar exchange rate is forecast to average 78 US$/Cdn$, two cents below the budget estimate.

- Bitumen royalties are forecast to be $605 million higher than budget, while crude oil royalties are up $203 million. The light-heavy oil price differential has been very volatile, widening to over US$30 recently. The forecast is for the differential to average US$24 per barrel for the fiscal year, US$1.60 wider than budget.

- Natural gas and by-products royalties have increased by $50 million, due mainly to lower producer costs and the impact of higher oil prices on by-product royalties. The natural gas Alberta Reference Price forecast has been decreased by 30 cents, to Cdn$1.70 per gigajoule.

- Personal income tax revenue is forecast at $11.7 billion, an increase of $333 million from budget, due primarily to higher-than-expected 2017 assessments, which elevates the base used to forecast 2018 revenue and requires a positive $169 million prior-years’ adjustment (the 2017 portions of 2016-17 and 2017-18 revenue were under-reported).

- Corporate income tax revenue is forecast at $4.6 billion, unchanged from budget.

- Other tax revenue is forecast at $6.9 billion, a $16 million decrease from budget, due primarily to the impact on the 2018-19 forecast of lower-than-expected 2017-18 insurance premiums taxes.

- Federal transfers of $8.3 billion are forecast, $98 million higher than estimated in *Budget 2018*, primarily from re-profiling $95 million in municipal infrastructure programs from 2017-18, and for additional projects under the National Housing Strategy and the Investing in Canada Infrastructure Program.

- Investment income is forecast at $2.7 billion, $152 million lower than the *Budget 2018* estimate, due to slightly weaker market returns in the first quarter of the fiscal year, and to reduced Alberta Capital Finance Authority (ACFA) net income from lower payments on loan swaps (a similar impact on debt swaps decreases debt servicing costs).

- Total revenue from other sources is forecast at $10.1 billion, $18 million higher than budget. A $25 million improvement in Balancing Pool net income and slight increases in ATB Financial fees (payment-in-lieu-of-taxes and deposit guarantee fee), are partly offset by a $13 million reduction in Alberta Petroleum Marketing Commission net income as the North West Redwater Partnership upgrader commercial start-up is now expected in October instead of June.

**Total Expense** is forecast to be $56.3 billion, $146 million higher than estimated in *Budget 2018*.

- Total operating expense is forecast at $48.8 billion, $47 million higher than *Budget 2018*. Increases of $31 million for a public advocacy campaign on the benefits to Canadians of the Trans Mountain pipeline project, $10 million for transitioning a highway maintenance contract, $5 million from the Victims of Crime Fund, $2 million for a plebiscite on Calgary’s 2026 Olympic bid, and $4 million offset by revenue, mainly in federal funding re-profiled from 2017-18 for Early Learning and Child Care, are partly offset by a reduction of $5 million in Climate Leadership Plan (CLP) operating expense due to transfers to CLP capital grants.

- Total capital grants of $2.3 billion are forecast, a net increase of $129 million from budget. Main increases include: $95 million re-profiled from 2017-18 in federal funding for municipal grants (Clean Water and Wastewater Fund; Public Transit Infrastructure Fund; Gas Tax Fund); $8 million added for Investing in Canada Infrastructure projects; $21 million transferred from capital investment for housing projects; $5 million for flood mitigation; a net $5 million in CLP grants transferred from CLP operating expense. These are partially offset by a $4 million reduction in the Basic Municipal Transportation Grant, due to lower-than-estimated fuel consumption in Edmonton and Calgary in 2017.

- General debt servicing costs have decreased by $29 million, consisting of a $20 million reduction from lower Fiscal Plan borrowing and a $9 million reduction in ACFA costs. Capital Plan debt servicing costs are down $2 million also due to lower borrowing.

- *Budget 2018* included $206 million for disaster assistance, comprising $200 million unallocated, $5 million for the 2013 flood and $1 million for the 2016 Wood Buffalo wildfire. The first quarter forecast remains unchanged from budget, though some of the $200 million will be needed for spring flooding and early summer wildfire activity. Once firmer costs are known, likely by the second quarter, the forecast will be updated.
Assets and Liabilities

Financial Assets of $71.5 billion are forecast for March 31, 2019, an increase of $0.5 billion from 2018.

- Heritage Fund, endowment and other fund assets are increasing by $0.5 billion, from inflation-proofing and net income retention.
- The balance in the Contingency Account on March 31, 2018 was $1.7 billion. The forecast is for all of this cash to be withdrawn to fund the 2018-19 deficit, after making various cash adjustments, including differences between accrued revenue and expense and actual cash receipts and outlays, income retained by various funds and entities, and cash borrowing. More details are provided on page 10.
- Assets of the Agriculture Financial Services Corporation (AFSC) and Alberta Capital Finance Authority (ACFA) are increasing $1.1 billion, primarily from increased municipal lending activity and retention of net income. This is partly offset by corresponding $0.8 billion increase in liabilities.
- Cash of $55 million in the Capital Plan financing account is being withdrawn to fund capital spending.
- Other financial assets are increasing a net $0.6 billion.

Liabilities of $99.8 billion are forecast for March 31, 2019, an increase of $9.5 billion from 2018, but lower than expected in Budget 2018.

Fiscal Plan and Capital Plan liabilities on March 31, 2019 are forecast at $52.9 billion. This is $1.3 billion lower than estimated in Budget 2018.

- Liabilities for capital projects are $3.7 billion higher than they were at March 31, 2018, due to direct borrowing of $3.7 billion, alternative financing of $92 million, less principal repayments on completed private-public partnership projects (P3s) of $64 million.
- Direct borrowing for the Fiscal Plan in 2018-19 is now forecast to be $5.8 billion, $1.2 billion lower than estimated in budget.
- AFSC and ACFA liabilities are increasing $0.8 billion, more than offset by their increased assets.
- Other liabilities are decreasing by $0.5 billion, while government obligations for pension plan liabilities are down $0.3 billion.

Net financial debt (the difference between financial assets and liabilities) on March 31, 2019 is estimated to be $28.3 billion.

Capital and other non-financial assets of $50.3 billion are forecast for March 31, 2019, a $1.2 billion net increase from March 31, 2018. This reflects: addition of $4.2 billion in capital assets less $2.5 billion in amortization; addition of $1 billion in inventory assets (e.g. vaccines, highway maintenance gravel) less consumption of $1 billion; and a net increase of $0.5 billion in deferred capital contributions.

Net Assets of $21.9 billion are forecast for March 31, 2019, a $7.8 billion decrease from 2018, reflecting the deficit for 2018-19.

### Capital Plan Highlights

2018-19 Capital Plan spending is forecast to be $6.4 billion, almost identical to the Budget 2018 estimate. Decreases in school, health and housing projects are due to re-profiling projects to future years based on progress. These decreases are essentially offset by re-profiling and carrying-over of projects from 2017-18 into 2018-19, including federally-funded municipal programs.

Factors impacting project progress include the pace of construction, project scope, land conditions, timing related to tendering, planning and permitting, and rate of project identification, approval and construction under federal programs. Direct borrowing of $3.7 billion is forecast, a decrease of $79 million from budget. The decrease is due mainly to a large portion of the re-profiling from 2017-18 relating to federally-funded municipal programs, and an additional $55 million in the Capital Plan financing account, partly offset by a lower contribution from Alberta Social Housing Corporation and a $36 million reduction in alternative financing this year as 2017-18 progress on the Calgary ring road was accelerated.

Economic Outlook

Recovery remains on track

Alberta’s economic recovery remains on pace through the first half of 2018. The Alberta Activity Index (AAX) is tracking 3.0% higher than 2017 through May and has moved above its pre-recession peak. Stronger-than-expected oil prices and solid business activity have lifted the forecast for nominal GDP, a broad measure of income, up from 4.7% at Budget to 5.8%. However, household spending growth has been weaker than expected compared with Budget, which is offsetting gains in other sectors. As a result, the forecast for 2018 real GDP remains unchanged from Budget at 2.7%. In 2019, ongoing strength in exports, a modest improvement in investment and continued population and earnings growth are expected to support real GDP growth of 2.7%, slightly stronger than the 2.5% forecast at Budget.

Despite the solid outlook for Alberta’s economy, heightened uncertainty about US trade policies and the impact they may have on growth and investment is creating headwinds. While Alberta’s exposure to recently announced trade tariffs is smaller than a number of provinces, an escalation of trade actions poses some downside risk to the economic outlook.

Oil prices strengthen

Rising global demand and tightening supply due to heightened geopolitical risks have driven oil prices higher since Budget. So far this fiscal year, North American benchmark West Texas Intermediate (WTI) crude has averaged around US$68/bbl. Market expectations are that WTI prices will be higher this fiscal year compared with Budget.

Alberta’s Western Canadian Select (WCS) has shared in the price appreciation, averaging just under US$50/bbl in the first quarter. However, ongoing pipeline constraints and increased oil sands production have widened the light-heavy (L/H) price differential. Additionally, WCS prices have displayed more volatility than WTI, with daily price changes ranging across a 30-percentage-point-wide spectrum since the end of 2017-18, versus 10 percentage points (ppts) for WTI. With oil sands production continuing to expand, the L/H differential is expected to remain under pressure.

Exports driving recovery

Growing exports are leading Alberta’s economic recovery in 2018 (Figure 1). Through the first six months of the year, international merchandise exports are up 11% compared to the same period in 2017. Oil prices have played a significant role but non-energy exports are also near all-time highs, with volumes up roughly 8% over the first half of 2017. Strong growth in shipments of food and beverage, forestry and machinery and equipment products, especially, is helping offset a downward revision to oil production due to the power outage at Syncrude. Real exports are forecast to grow 4.9% in 2018 and 3.7% in 2019.

Corporate earnings improve

With oil prices higher than anticipated and economic momentum spreading, Alberta producers are seeing higher returns than estimated at Budget. Corporate earnings are now forecast to rise 31%, up 12 ppts from Budget. Exporters are additionally benefiting from a weaker than expected Canadian dollar. Consequently, the Loonie has averaged $0.77 USD/CAD through the first four months of the fiscal year, nearly three cents lower than the Budget forecast. The 2018 exchange rate forecast has been lowered to $0.78 USD/CAD.

Energy investment looking up

With improving corporate profits, energy investment prospects are beginning to shift. Rigs drilling jumped 20% in July compared with last year and are averaging almost 7% higher year-to-date. As a result, conventional investment is expected to rise approximately 9% in 2018, almost entirely offsetting the decline in non-conventional investment. Next year is also anticipated to bring modest growth to oilsands investment, the first year of growth since 2014. Along with a continued increase in conventional investment, oil and gas investment growth is anticipated to lead overall business investment 3.2% higher in 2019.
Economic Outlook

Non-energy investment lags
The completion of several major projects and elevated commercial vacancies continue to weigh on commercial and industrial construction. In addition, tariffs and higher wood prices are raising input costs and construction prices. As forecast at Budget, non-energy investment is expected to fall about half a percentage point in 2018 and trail overall business investment in 2019.

Labour market advancing
Alberta’s labour market continues to improve (Figure 2). While employment growth has moderated, earnings have picked up.

Figure 2. Cumulative change in Alberta employment since trough (June 2016)

With year-to-date employment growth slowing from 2.0% at the beginning of the year to 1.7% through July, employment growth for 2018 has been revised from 2.0% at Budget to 1.9%. The unemployment rate is forecast slightly lower at 6.7% due in part to slower growth in the number of people joining the labour force.

Household earnings are forecast to be stronger than at Budget, with the majority of year-to-date employment growth coming from the higher-earning goods sector and full-time employment (Figure 3). Average weekly earnings growth for 2018 is now forecast at 2.7%, up from 2.4% at Budget. This strength is anticipated to carry into 2019, with primary household income climbing 4.7%.

Consumer prices climb
A lower Canadian dollar and rising energy prices are driving up consumer prices across Canada. In Alberta, rising gas and electricity prices have lifted Alberta’s consumer price index (CPI). This has led to a revised forecast for 2018 inflation, up 0.2 ppts to 2.3%. As the impact of these temporary factors dissipates, inflation is expected to ease to 1.9% in 2019.

Pace of household spending eases
Rising costs, tighter mortgage regulations implemented early in the year and climbing interest rates are weighing on household spending. Through July, there has been an average of 1,100 fewer (annualized) housing starts than 2017, leading to a small downward adjustment to 2018 starts forecast. While retail sales are at a record high, growth in consumer spending has been slower than anticipated, especially on durable goods such as motor vehicles. This is expected to pickup in 2019 as housing activity rises and employment and wages continue to climb higher.

Risks to the Outlook
- Monetary policy in advanced economies could tighten faster than anticipated, putting pressure on heavily indebted emerging economies. This would be a drag on global growth.
- Growing oil supplies or slowing demand globally could put downward pressure on oil prices.
- As oil production is expected to outstrip pipeline capacity starting this year, prolonged market access issues could widen the differential, impacting incomes and investment.
- The threat of protectionist trade policies pose direct risks to the trade outlook and indirect risks related to lower global growth.

<sup>a</sup> Alberta Treasury Board and Finance estimate.
Method of Consolidation

The 2018-19 First Quarter Fiscal Update and Economic Statement reports on the same scope, using the same method of consolidation, as presented in Budget 2018. This is also the same scope and consolidation approach used in the Consolidated Financial Statements in the Government of Alberta Annual Report.

The results of all government departments, funds and agencies, except those designated as government business enterprises, are consolidated on a line-by-line basis. Revenue and expense transactions between consolidated entities have been eliminated.

The accounts of provincial agencies designated as government business enterprises are included on the modified equity basis, computed in accordance with International Financial Reporting Standards applicable to those entities.

Basis of Financial Reporting

The consolidated fiscal summary reports revenue (including gains from disposal of tangible capital assets), expense (including amortization, inventory consumption, loss on disposal and write-down of tangible capital assets), and surplus / (deficit).

Revenue and expense are recorded using the accrual basis of accounting. Cash received for goods or services which have not been provided by period end is recorded as unearned revenue.

Transfers received for capital purposes, and donated capital assets, are recorded as “deferred capital contributions” when the cash or asset is received, and recognized in revenue over the related asset’s useful life (in effect matching the asset’s amortization expense).

Expense includes the province’s cash payments towards the unfunded pension liabilities, and the non-cash change in unfunded pension liabilities.

Debt servicing costs include interest payable, and amortization of issue costs and discounts / premiums on debt issues.

Compliance with Legislation

The Fiscal Planning and Transparency Act (FPTA) requires a public report on the accuracy of the Fiscal Plan for a fiscal year on or before August 31. The FPTA gives the President of Treasury Board and Minister of Finance discretion over the form of the report.

The 2018-19 First Quarter Fiscal Update and Economic Statement includes comparisons between the Budget 2018 estimates and first quarter forecasts for revenue and expense (including details and categories of each); the surplus / (deficit); the Contingency Account balance and cash adjustments; a summary balance sheet; the Capital Plan; and financing (borrowing) requirements. An updated Alberta economic outlook, with associated assumptions, is also provided.

Under the FPTA, operating expense increases, excluding those for dedicated revenue-operating expense, collective bargaining or other remuneration settlements, First Nations settlements, or increases funded by reserves of school boards, post-secondary institutions or Alberta Health Services, are limited to 1% of budgeted operating expense.

The forecast provided in this report is in compliance with the requirements of the FPTA.
