Labour Market Notes

Unemployment rate jumps despite job gains

Alberta

- **Employment advances.** Employment in the province increased by 12,800 month-over-month (m/m) in August after failing to gain much ground in the previous three months.
- **Private sector moves ahead.** Private sector employment advanced (+14,500 m/m) to a new high while employment in the public sector (-700 m/m) and self employment (-1,000 m/m) eased. The private sector remains the driver of employment growth, accounting for all the employment gains over the last 12 months.
- Services sector regains its footing. Employment in the services sector moved higher (+15,600 m/m) after holding flat since March. The gains were led by wholesale & retail trade and finance, insurance, real estate & leasing, which outweighed pullbacks in health care and business, building & other support services.
- **Goods sector takes a breather.** Goods sector employment eased (-2,800 m/m) following two months of solid gains. A decline in forestry, mining, oil & gas overwhelmed a pickup in construction, which continues to recover from the large drop in May.
- **Surge in part time.** Employment in part-time positions jumped in August (+29,100 m/m) after plunging to an eight-month low in the previous month. Meanwhile, full-time positions eased (-16,400 m/m) from July's all-time high.
- **Employment growth moderates.** Despite the solid monthly gain, year-overyear (y/y) employment growth continued to slow, falling from 2.2% in July to 2.0% in August, the slowest pace post-COVID.
- **Unemployment rate spikes.** The unemployment rate increased 0.6 percentage points to a three-year high of 7.7% in August, as the pace of employment gains continues to be outstripped by the historic levels of population and labour force growth.
- **Growing labour force.** Alberta's labour force grew by 29,900 m/m, spurred by the ongoing rapid growth in the population and a rebound in the participation rate.
- **Participation rate jumps.** The participation rate increased 0.5 percentage points to 69.4% in August, more than reversing the decline in July.
- Wage growth remains strong. Average hourly wages increased 0.6% m/m to \$36.41 and were up 4.4% y/y.

Canada

- **National employment moves higher.** Employment in Canada advanced (+22,100 m/m) with gains in six provinces, led by Quebec and Alberta.
- **Unemployment rate creeps up.** The national unemployment rate increased from 6.4% in July to 6.6% in August.
- Wages tick up. Nationally, average hourly wages increased 0.5% m/m to \$35.16 and were up 5.0% y/y.

EMPLOYMENT GROWTH BY PROVINCE

August 2024 vs. August 2023

ALBERTA LABOUR MARKET INDICATORS

Indicator	Latest*	
Employment	2,537,400	
month-over-month change	12,800	
year-over-year % change	2.0%	
Alberta Unemployment Rate (UR)	7.7%
