Physical Condition of Government Owned or Supported Facilities, Alberta

- In 2014-2015, 75% of government-owned and operated facility space was rated in good condition, 24% in fair condition and 1% in poor condition. Overall, there was a three percent increase in space in good condition compared to 2013-2014 and ten percent higher than the target. These changes are the result of 40,000m² of new space being added, and 93,600m² of space being removed for planned dispositions, major building renovations or transfer of ownership to other jurisdictions.
- In 2014-2015, 86% of health facility space was rated in good condition, 13% in fair condition and 1% in poor condition. The results are a substantial improvement from 2013-2014. The 2014-2015 results saw an eleven-percentage-point increase of health facilities in good condition, an eight-percentage-point decrease of health facilities in fair condition, and a three-percentage-point decrease of health facilities in poor condition. There were 37 facilities where the condition of the facilities was corrected due to data entry errors made in 2013-2014, the majority of these changes moved space that was previously identified as fair into the good category. The replacement values were updated for 40 facilities, resulting in more space being categorized in good condition.
- For 2014-2015, 73% of post-secondary space was rated in good condition, 25% in fair condition, and 2% in poor condition. The 2014-2015 results have stayed fairly constant compared to 2013-2014. The average age of post-secondary facilities is 33 years and 55 percent are more than 30 years old. As a result of current funding levels, facility conditions have remained stable. While this measure rests with Alberta Infrastructure, Alberta Innovation and Advanced Education holds the budget for post-secondary facility projects.
- In 2014-2015, 56% of school space was rated in good condition, 43% in fair condition and 1% in poor condition. The 2014-2015 results show no significant change compared to 2013-2014 results. The average age of school facilities is 45 years and 79 percent are more than 30 years old. School facilities are maintained through Infrastructure Maintenance and Renewal funding as well as operating maintenance. Modernization and replacement projects are either grant funded to the jurisdictions or directly managed by Alberta Infrastructure. While this measure rests with Alberta Infrastructure, Alberta Education holds the budget for school capital projects, including capital maintenance and renewal.
