Preface

Whether it's the corner coffee shop that has always served as a local gathering place or the ornate church at the centre of town with a soaring steeple, historic places are vitally important to defining a community's sense of itself. This series of publications is designed to help Alberta's municipalities create and implement local heritage programs to protect the historic places they value and wish to preserve. The following manuals describe the steps involved in establishing a municipal heritage program, and in identifying, evaluating and developing municipal historic places. It is intended to be used by municipal staff members; elected officials and heritage advisory committees; local heritage organizations and historical societies; volunteers and business organizations; heritage conservation professionals such as planners and architects; and the owners of historic properties.

This guide, comprised of the publications listed below, have been prepared as part of the Government of Alberta's Municipal Heritage Partnership Program, which supports municipal contributions to the Alberta Register of Historic Places and the Canadian Register of Historic Places. Each publication in the series describes the processes involved in identifying, evaluating and managing locally significant historic places in Alberta.

The Historic Places Initiative, a Pan-Canadian partnership of all the Provinces and Territories together with the Federal Government, has developed tools to assist communities in achieving their goals. Alberta, as a partner in the Historic Places Initiative, gratefully recognizes the support of the Government of Canada in the production of these manuals.

Introduction

**DETAILED INSTRUCTIONS FOR COMPLETING
THE HERITAGE SURVEY FORM CAN BE FOUND
IN *Identifying Historic Places: Part 2—
Heritage Survey Field Guide*.**

A completed municipal heritage survey contains a large amount of varied information, which provides a window on a community's social and architectural history. Using the Alberta Heritage Survey Form (survey form) ensures that this information is gathered in a consistent way across the province and over time. Based on the Canadian Inventory of Historic Building Recorder Sheet, the survey form contains 75 information fields that detail a resource's location, architecture and history. Ten of these fields are coded fields. That is, the data is entered in the form of 4-digit codes, rather than words. This makes data recording and data entry much quicker and more accurate.

It is important that fieldworkers and data entry staff become familiar with the codes, especially those that are commonly used. This book provides detailed lists of the site type codes and architectural codes needed to complete the Alberta Heritage Survey Forms. It is intended as a handy reference tool, for use in the field or in the office, to identify and record important information about resources included in a heritage survey.

Alberta Heritage Survey Codes

The Alberta Heritage Survey Form is a standardized four-sheet form for recording heritage survey information. Ten of the 75 fields require the use of specific numeric codes. These fields are highlighted in blue below.

The image displays four sheets of the Alberta Heritage Survey Form, arranged in a 2x2 grid. The form is designed for recording heritage survey information and includes various fields for data entry. The first sheet (top left) is the 'SITE FORM' and contains fields for Site Name, Site Number, Site Type, and a large section for Visual Description. The second sheet (top right) is the 'Visual Description' section, featuring a grid of checkboxes for recording visual details. The third sheet (bottom left) is the 'Photographs' section, containing fields for recording photograph information. The fourth sheet (bottom right) is the 'Final Fields' section, containing fields for recording final survey information. The form is divided into sections by bold lines and includes a 'Key' section for recording specific numeric codes.

COMMONLY-USED CODES ARE LISTED IN *Appendix A of Identifying Historic Places: Part 2— Heritage Survey Field Guide* AND ARE HIGHLIGHTED WITH A **BLUE BOX** IN THE LISTS THAT FOLLOW.

The ten fields with Heritage Survey Codes are:

- Field 4: Site Type
- Field 41: Style
- Field 42: Plan Shape
- Field 43: Storeys
- Field 44: Foundation
- Field 45: Superstructure
- Field 46: Superstructure Cover
- Field 47: Roof Structure
- Field 48: Roof Cover
- Field 49: Exterior Codes

The field numbers and field names correspond to those on the Alberta Heritage Survey Form and on the Alberta Heritage Survey database.

FOR ADDITIONAL FIELD 41: STYLE CODES RELATING TO GRAIN ELEVATORS, SEE *Appendix B: Grain Elevator Codes* ON PAGE 45 OF THIS MANUAL.

Please note that the codes for Field 41: Style, which describe the formal architectural style of a resource, are found in Appendix A (see page 44 of this manual). They are included for information only. For most buildings in Alberta, it is difficult, if not impossible, to determine what, if any, particular style applies. For this reason, Field 41: Style is not routinely filled in as part of a municipal heritage survey.

Field 4: Site Type

These codes describe the site type of a resource, which is defined by its original usage. The usages are divided into 13 categories: residential, social and recreational, educational, mercantile/commercial, farming and ranching, industrial/manufacturing, transportation, communications governmental, military, medical, religious, funerary.

The Question of Style

FOR FIELD 41: STYLE CODES RELATING
TO GRAIN ELEVATORS, SEE *Appendix
B: Grain Elevator Codes* ON PAGE 45
OF THIS MANUAL.

For most buildings in Alberta it is difficult, if not impossible, to determine what, if any, particular style applies. A list of architectural styles that occur in Canada was compiled by the Canadian Inventory of Historic Building, and this list forms the basis for the current list of style codes used by the Alberta Heritage Survey. However, since the applicability of this list is rather limited for the typical municipal heritage inventory in the Alberta context, Field 41: Style is generally left blank. The exception to this rule is grain elevators (see Note at left). The following list is provided for interest more than reference.

- 9000** Second Empire

APPENDIX B:

Grain Elevator Codes

At one time, grain elevators were a common sight in Alberta. Today, they are increasingly rare. A number of codes that relate specifically to grain elevators ensure that these significant and distinctive buildings are adequately described in the Alberta Heritage Survey. These appear here, separated from the other more general codes, for easy reference and to reduce confusion.
