Welcome

International Buyers

This is our catalogue of agriculture products and services that Alberta exports internationally. This catalogue was designed specifically for importers, distributors and buyers located outside of Canada.

The province of Alberta, Canada, is proud of its exporting agriculture and food growers, producers, processors and marketers, and assists these companies in promoting their products and services to the world.

Alberta has built an international reputation as a reliable source of agricultural technology, expertise and food. With more than 51 million acres used for crop and livestock production, Alberta produces an abundant supply of agricultural commodities available for export and as ingredients for Alberta's processed products.

This catalogue supports linking Alberta product and service suppliers to potential buyers.

We hope you will also visit our beautiful province to conduct business, as well as enjoy the scenery, culture and cuisine.

An online version of this catalogue and companies videos are available at: www.agrifoodalberta.ca/catalogue

Alberta, Canada

The province of Alberta is located in western Canada and its diverse landscape includes mountains, glaciers, foothills, lakes, rivers, forests, badlands, wetlands and open plains.

The province of Alberta is known for its natural beauty, but it's the people of our province that have made it successful. Since its earliest settlements in the fifteenth century, Canada has been built from the dreams of a multinational mix of settlers forging the many economic advantages and high quality of life that Canadians and Albertans enjoy today.

Our society is guided by shared values and linked by a deep respect and appreciation for multiculturalism and the value of hard work. English is our most common language, but with Alberta's cultural diversity, dozens of languages are spoken here.

Alberta's Agriculture Sector – A Global Exporter

Our agriculture sector is export-oriented and in 2015, Alberta exported more than \$10 billion CAD worth of agri-food products to international markets.

Alberta is the largest cattle-producing province in Canada with nearly 5 million head or 41 per cent of the national total. The province is also among Canada's leaders in hog production with 1.5 million head.

Alberta enjoys a global reputation for safe, high-quality agriculture and agri-food products. The reputation stems from thorough meat inspection and licensing programs, animal tracking systems, accurate and consistent grading systems for grains and oilseeds and various food safety initiatives for producers, processors, and consumers. These measures assure the safety and quality of Alberta's agriculture and agri-food products.

Connecting buyers and suppliers

Alberta Agriculture and Forestry provides information and assistance to international buyers and investors in supporting our thriving agriculture and agri-food industries. We support industry by connecting buyers and sellers, while providing information on Alberta's supplier capabilities.

Alberta maintains a network of international offices that provide on-the-ground representation in many markets.

Visitors come to Alberta for business, pleasure or a combination of both. You can shop in the largest shopping mall in North America, hike where the dinosaurs once roamed, ski in the Rocky Mountains and experience life in the past at heritage sites and activities complete with pioneers, cowboys and First Nation dancers.

We invite you to experience all that Alberta has to offer!

Table of Contents

FOOD PRODUCTS

3 Baked Goods and Pasta

Baker Boys – Baked Goods.....	3
Byblos Bakery – Baked Goods.....	4

Baked Goods

Baker Boys specializes in thaw and sell/serve gourmet cinnamon rolls. We're committed to using only the finest ingredients in all of our products such as the Canadian wheat used in our secret sweet dough recipe. Our cinnamon products are made using our signature brand Siam Cinnamon to provide a rich full-bodied cinnamon flavor and our cinnamon rolls are topped with a delicious Kraft Philadelphia® Brand cream cheese frosting. Our products are shipped frozen allowing you to thaw only the amount you require thereby giving you complete control of freshness and shrinkage.

Baker Boys was established in 1993 with the intent of providing gourmet cinnamon rolls to the retail grocery and foodservice industries in Western Canada. Since then we've grown and now operate out of a 30,000 square foot commercial bakery in Calgary, Alberta. Today, we supply a wide variety of thaw and sell/serve fabulous baked goods to the grocery store, convenience store, fundraising, and foodservice industries throughout North America.

Baked Goods

Byblos Bakery is a family-owned business that started in the early 1970s. It has grown to be a highly recognized and valued supplier of pita bread throughout Canada and parts of the United States.

Byblos Bakery Ltd. offers their customers:

- fresh, high quality pitas
- panini, balady, and naan breads
- thin subs
- bagels
- tortillas and tortilla wraps
- baklava
- pita chips

Byblos is able to ship their Byblos brand baked goods or produce a high quality product to fit your own private label program. They can ship fresh, frozen, raw and par-baked.

Byblos has an accredited Quality Assurance Department, HACCP Program and is BRC (British Retail Consortium) certified. Byblos recently installed new MAP (Modified Atmosphere Packaging) equipment.

Pizza Crusts & Specialty Breads

Crust Craft is a highly automated industrial bakery offering a wide range of frozen bread products and pizza crusts to the foodservice and retail sectors. We manufacture more than 100 types of pizza crusts, as well as raw dough discs. Specialty breads include focaccia, Naan breads, and gourmet burger and hot dog buns.

Through our commitment to innovation, we are continually developing new and exciting products using only the best available ingredients. The result: high caliber, artisan-quality products marketed under our own brand and customers' private labels.

Crust Craft maintains a HACCP-compliant facility and achieved an "A" rating on our recent British Retail Consortium audit, one of the most stringent food safety standards in the world.

Established in 1989, the Crust Craft brand remains synonymous with quality and excellence in the marketplace.

Baked Goods

At dpb you will find high quality baked goods including muffins, scones, cookies, danish, strudel, cereal bars, squares and savoury items. Most recently dpb added a cake/cupcake program and a number of bake-off items that are very successful.

With four generations of baking history, dpb moved into the commercial baking industry and in 2003 moved into a 25,000 sq. ft building specially designed to meet the needs of their customers.

The dpb facility is HACCP compliant, GMP and CFIA recognized. We support private labels, food service and co-packing.

Gluten Free Baked Goods

Based in Edmonton, Canada, Kinnikinnick Foods is North America's leading source of deliciously diverse baked goods products created for those maintaining a gluten, dairy and/or nut-free diet, as well as for mainstream consumers looking for healthier food alternatives. Kinnikinnick runs the largest dedicated gluten-free, dairy free and nut free bakery in North America, thus ensuring that its retail and foodservice customers enjoy the most variety of uncontaminated, risk-free food products available today. Kinnikinnick facilities & products are Orthodox Union Kosher certified.

Their extensive product line includes a variety of breads, buns, cookies, donuts, muffins, pizza crusts, pie crusts, waffles, and easy to use mixes. While they do not currently co-package or private label any products, they do have the capabilities for such an undertaking.

They uphold the strictest allergen standards in the industry, with an in-house laboratory that tests the purity of all incoming ingredients and final products. As a family business, Kinnikinnick continues to focus on providing the highest quality, innovative and broadest selection of allergy friendly products. Many people have already discovered why their family and dedicated employees say Gluten Free Has Never Tasted so Good™.

Certified Organic Products

Prairie Harvest, the brand your customers love to buy, is your one-stop place to shop for all your organic pasta requirements.

Prairie Harvest's San Zenone brand of organic corn and rice pasta, manufactured in a 100 per cent wheat-free, gluten-free facility, have proved so popular that they're flying off the shelves everywhere.

Prairie Harvest has five certified organic pasta sauce flavours made from a blend of ingredients and spices. Our taste-testers preferred these sauces to all others, and they were right! These sauces are generating an amazing turn rate for retailers.

The San Zenone lines of gluten-free organic corn and rice pastas and organic pasta sauces boast the same excellent margin point as all our other Prairie Harvest organic products. Also try the Artesian Acres Kamut pasta, San Zenone 100 per cent wheat and gluten-free corn and rice pastas.

Prairie Harvest Canada Ltd. is Canada's largest full-scale organic pasta producer serving the retail, foodservice, industrial and private label markets. Started in 1965 by Vittorio Facchin an Italian immigrant, Prairie Harvest's authentic pasta found instant favour with Edmonton's Italian community. Prairie Harvest uses a time-honoured tradition of using the finest ingredients; slow-drying (up to four times longer) to produce a product with superior taste and texture.

Canada's #1 Tortilla Manufacturer

Solis Foods Corporation is a family-owned Canadian company that manufactures high quality tortillas, wraps and tortilla chip from flour and corn. We offer a wide range of products for both the foodservice and retail markets.

We have three production facilities across Canada, two in St. Marys, Ontario (near Toronto) and one plant in Balzac (Calgary), Alberta. We are well positioned to serve the Asia Pacific region from the Calgary plant.

We are HACCP and Safe Quality Food Silver approved. We produce both private label and branded products for our customers. Solis is a flexible manufacturer that is willing to work with our export customers to ensure they receive a product that is right for their market, in regards to flavour and size preferences.

Our wide range of products include both frozen and shelf-stable formulations using natural ingredients.

We are proud to supply some of Canada's largest retailers, foodservice distributors and restaurant chains.

Pristine Canadian Bottled Glacier Water

We produce pristine Canadian bottled glacier water. Our water source comes from the Columbia Icefields just outside Banff National Park in Alberta. The water has a clean refreshing taste that boasts a pH level of approximately 8.

Our water plants are located in Edmonton and Calgary. They are GSFI-certified and were built in January of 2016 with state-of-the-art equipment. Our plants have the ability to produce 30,000 bottles per hour.

We can produce bottled water in the following sizes: 350 ml, 500 ml, 591 ml, 710 ml, 1L, 1.5L, 4L, 10L, 15L, 18.9L and 20L. We can ship water in containers that have a capacity of 24 pallets or 27,272 kgs.

We have the ability to produce branded or private label bottles (for a nominal onetime fee).

We are an expanding young company that can react to your needs in a professional matter.

Natural Sparkling & Spring Water

Nanton Water and Soda uses only the finest daily-tested natural spring water from its own private source. Nanton's sparkling and spring waters are subject to strict microbiology and chemical testing.

Nanton's sparkling water is available in two sizes - 340 mL/24 pack and 750 mL/12 pack. The sparkling water is available in three flavours – Sparkling Regular, Sparkling Lemon-Lime and Spring Water.

Spring water/drinking water options for export include the following sizes: 235mL, 355 mL, 500 mL, 1 litre, 1.5 litre, and 1 gallon.

Nanton Water and Soda Ltd. is, and will remain, Canada's most dynamic, responsive and customer-friendly water producer as defined by customer care, customized programs offering private label bottled water, and flexibility.

The town of Nanton, Alberta, is proud to be the home of a truly Canadian drinking water. In business for more than thirty-four years, and currently exporting into Asia and North America, Nanton Water and Soda Ltd. has provided exceptional sparkling water from one of the finest sourced spring waters in Canada.

Now available for export, you can experience the flavour and taste of a quality Canadian product.

Barbecue Sauces and Seasoning/Rubs

Cattle Boyz Foods has received more than 35 award for our gourmet barbecue sauces and seasoning/rubs. Our success for the last 19 years lies in our passion for gourmet food. Our barbecue sauces and seasonings will add a kick of flavor to any dish!

In Canada, have had a strong presence in mass merchandizers and wholesale club, and national/regional/boutique grocery stores. Since October 2014, our barbecue sauces have been sold in close to 1,200 US grocery stores. Our Original Barbecue Sauce is now in Costco Japan.

Cattle Boyz takes pride in producing an “artisanal” authentic healthy barbecue sauce that comes in unique (reusable) packaging, and has versatile uses. Our products are gluten-free, MSG-free, no allergens, no high fructose corn syrup, no fat and have no liquid smoke. Our brand can be likened to a microbrewery that focuses on high-end products. Plus, Cattle Boyz is more nimble and agile than the larger companies, which is a huge advantage.

All our barbecue sauces and seasoning/rubs are produced in federally-inspected co-packing facilities. We also service custom label and private label clients.

Organic Barbecue Sauce and Ketchup

Honey Bunny uses flexible, shatter-proof, stand-up pouches with a spout designed for easy, controlled pours while the lightness of the packaging requires fewer resources to produce and transport.

Bodacious Tomato Organic Ketchup™ is Honey Bunny's answer to a whole food tomato taste in the condiment line. The rolling tomatoes graphics on the ketchup stands out on the shelf.

Original Amazing Dads Organic BBQ Sauce™ is a honey sweetened BBQ sauce with a hint of smoky hickory, great for all-purpose grilling. Honey Lemon Rosemary is a refreshing and clean flavorful sauce ideal for chicken, ham and seafood. Honey Garlic Sauce is best used as a finishing sauce to your grilling efforts. You can really taste the quality of our apiaries' organic sweet honey combined with our organic garlic. Amazing Dad's eye-catching graphics really stand out on the shelf.

Honey Bunny has been in operation for more than 20 years. We are Canada's largest producer of organic honey. Our production facility, in Peace River country, features state-of-the-art honey processing and packaging technology. We take great pride in developing honey products that stand out in the marketplace—because there is no substitute for high quality.

Nut Free Golden Peabutter

NoNuts Golden Peabutter is a nut-free, peanut-free spread made from special Alberta-grown peas and canola oil. It has the added benefits of being gluten free, soy free and is Kosher.

Peabutter is offered in 18 oz (510 g) jars and 28 g portion packs.

Peabutter is an innovative product that was discovered by accident. The person who developed the product was looking for a variety of mild tasting pea to make into hummus which is normally made with chick peas. However, chickpeas cannot be grown in northern Alberta. In the process, he discovered the product made tasted more like peanut butter than hummus so he carried on from there and NoNuts Golden Peabutter was the result.

De-oiled Mustard Powder

Sakai Spice produces wasabi powders and low oil mustard powders. They have a patented process that removes the oil from the mustard seed enhancing taste and pungency. The process ensures a longer shelf life and a more concentrated product, which provides substantial cost savings.

Sakai Spice's in-house research and development lab enables them to work with customers in the development of new mustard flours and wasabi powders.

Sakai Spice offers wasabi in standard 1kg bags as well as 5lb (2.27kg) industry-size spice containers with lids.

The size of bag is flexible depending on customer's preference.

Sakai Spice offers mustard powder, cake, and bran in both oriental and yellow as well as blends. All mustard powders are packaged in 20kg paper bags. Bran and cake can be packaged in either 20 kg paper bags or 1MT bulk bags.

Both mustard and wasabi powders are kosher certified.

Certified Organic Grains, Legumes and Oilseeds

Grainworks is a unique family farming operation, established in 1912. We received our first organic certification in the late-1980's. Our specialty is high quality certified organic cereal grains, legumes and oilseeds including hard red spring wheat, durum wheat, rye, brown flax, green lentils and red lentils. Organic integrity is guaranteed with our exclusively organic farming methods and certified cleaning, processing and shipping facility.

Certified COR (Canadian Organic Regime) and JAS (Japanese Agriculture Standard).
Kosher certified.

Quick Cooking Barley

By unlocking barley's inherent potential, Progressive Foods Inc. is introducing this ancient grain as a healthy, convenient, and tasty alternative to rice, pasta, or potato.

Quick Cooking Barley, which cooks in 10 minutes, comprises a pre-cooked, whole grain hullless barley, and gives a porous outer crust. It contains no additives, has fully gelatinized starch and may contain a nutty flavour and aroma. Customized recipes have been developed to provide a variety of menu options.

Quick Cooking Barley currently has two packaging sizes. The 500 g bags (or 400 g/bag for the organic Quick Cooking Barley) are for retail, and 10 kg bags are for wholesale to catering institutions or for other re-packaging. This product can use the Canadian Health Claim associated with foods that assist in reducing cardiovascular disease by lowering blood cholesterol and controlling the glycemic response. The production is strictly controlled by the HACCP program.

Grains, Legumes and Oilseeds

Providence Grain Group Inc. was established in 2002. Operating as Providence Grain Solutions, we are one of the few producer owned grain and agro businesses in Canada.

Providence Grain Solutions is a small global trading company providing care and attention to the quality of products we sell. We can offer flexible quantities and smaller shipments for various products. Our priority is quality over volume; we select post-harvest, providing a superior end product to international buyers.

Wheat, canola, flax, oats, peas, lentils, malt barley, feed barley, canary seeds are the products we offer.

Our shareholders are producers. This provides a solid foundation for the farmers who trust our expertise and rely on the solutions we provide at the field level, and for our buyers who are confident in our products and the service we provide. We know it because we grow it - it's that simple.

Seed and Feed Grains

Stony Plain Seed Cleaning provides customers with guaranteed top quality seed and feed grains and ships them either bagged or bulk via truck, rail or ocean containers.

They are capable of cleaning cereals, pulses and specialty crops with storage capacity of approximately 1,600 metric tonnes of grain.

Their robotic bagging system and bulk handling equipment enables them to efficiently package & load both containers and trucks. They also have the ability to load rail-cars at a secondary facility north of our plant.

Stony Plain Seed Cleaning markets and exports crops such as oats, barley, wheat, flax, rye, peas and other specialty grains. They also supply the horse racing industry with top quality oats at competitive pricing. Whether it is bin-run feed oats or high quality triple cleaned pony oats, they can make a product unique to a customer's needs.

Grains & Pulses

W.A. Grain & Pulse Solutions (W.A. Grain) is an Alberta-based company that cleans pulses for export. We also ship all grains and oilseeds for both export and domestic markets and have the capability to clean all products to buyers' specifications.

Our facilities have modern processing equipment including color sorters, gravity separators and any current technology needed to guarantee our products meet customer needs.

These products include but are not limited to:

Pulses – green peas, yellow peas, green lentils, red lentils, and fababeans

Grains – wheat (all types), barley (feed & malt), oats, and rye

Oilseeds – canola and flaxseed

W.A. Grain ships from ten locations throughout Alberta. Total shipping capacity is 50 railcars per week of cleaned grain or pulses, or close to 5,000 metric tonnes per week. W.A. Grain also has two locations in Saskatchewan.

W.A. Grain is a quality export supplier for the international pulse and grain market. Currently we ship 200,000 metric tonnes of pulses and 120,000 metric tonnes of grains and oilseeds annually. In the near future, bagging and splitting lines will be added to be able to supply more of our customers' needs in the future.

100% Pure Natural Canadian Honey

Bee Maid Honey is a 100 per cent pure Canadian tradition, delivering only the highest quality honey to consumers since the early 1950's.

What makes our highly recognizable brand truly unique is that there are two cooperatives behind it – the Alberta Honey Producers Cooperative and the Manitoba Cooperative Honey Producers. A small group of Western Canadian beekeepers in the provinces of Alberta, Manitoba, and Saskatchewan that shared a vision to sell their quality Canadian honey around the world, combined their resources and expertise to create Bee Maid Honey Limited. Recognized worldwide for our premium quality and exquisite flavour, Bee Maid Honey Limited exports to more than 25 countries.

The honey's delicate flavour is the result of the natural variances of flowering crops and meadows in Western Canada. Our creamed honey is produced by adding crystallized honey to liquefied raw honey and mixing it until the honey has a smooth, creamed texture.

Bee Maid honey offers a wide variety of shapes and sizes of PETE bottles using our in-house blow moulding facility. Our food safety program is always top-of-mind: packing plants are HACCP recognized and we are the first Canadian honey packer to achieve the Safe Quality Food designation. All our products are kosher certified. In addition, Bee Maid Honey is True Source Certified™, which means all our honey is ethically and transparently sourced. The ownership structure has also allowed Bee Maid Honey to implement measures that provide traceability from hive to bottle.

Pure Conventional and Organic Honey

Golden Acres Honey Products Ltd. is a family-owned business that has been packaging the finest Canadian honey for the past 25 years. Our brands include McKenzie's and Golden Acres, and we also package many private labels for domestic and international distribution.

Conventional honey is available in liquid and creamed varieties and can be packaged in retail, bulk or industrial sizes. A select limited quantity of certified Canadian organic honey is also available. One of our customer favourites, is our McKenzie's Natural Non- Processed product, selected from only the very finest raw honey and handled as only we know how.

Golden Acres Honey is situated in one of the finest honey producing areas in the world, the Canadian West. As a company we are small enough to be responsive, yet large enough to be able to handle any commercial project. Golden Acres is certified as Kosher, Organic, and HACCP. We are federally inspected and have a plant that uses world-class processes and equipment, producing a tamper proof and lot numbered product that is fully traceable from shelf to beehive.

Organic Canadian Honey

Honey Bunny is United States Department of Agriculture EcoCert and Kosher Certified. Honey Bunny's apiaries are located in Alberta, Canada, noted for their pristine environment and organic clover honey!

Honey Bunny won a Best Packaging award for its flexible, shatter-proof, stand-up pouches with a spout designed for easy, controlled pours while the lightness of the packaging requires fewer resources to produce and transport.

Wolfe Honey has been in operation for more than 20 years. We are, by far, Canada's largest producer of organic honey. Our production facility, in Peace River country, features state-of-the-art honey processing and packaging technology.

Honey Bunny is family owned. We take great pride in developing honey products that stand out in the marketplace - because there is no substitute for high quality.

Canadian-grown Rhodiola Rosea

The Alberta Rhodiola Rosea Growers Organization (ARRGO) is a cooperative of member farmers across Alberta who commercially cultivate and process Rhodiola rosea. ARRGO provides an alternative to wildcrafting of the world's dwindling native supply. We offer fully traceable and sustainably grown Rhodiola rosea as a premium washed, chipped and dried bulk product. ARRGO has the world's largest supply of cultivated Rhodiola rosea.

ARRGO grows both certified and non-certified organic roots. Our roots are free of adulterants and contaminants. They are processed at our facility in Thorsby, Alberta, and shipped worldwide.

ARRGO's processing facility is Certified-Organic, GACP (Good Agricultural Collection Practices) and GMP-audited (Good Manufacturing Practice). All ARRGO members must maintain a current GACP certificate. Over 100 Alberta member farming families currently grow this amazing root.

Alberta boasts a climate similar to Siberia and the Altai Mountains, where Rhodiola rosea grows naturally. Our members are proud to be providing this high quality and pure raw form of nature's remedy for stress and cognitive health since 2006.

Beta-Glucan Concentrate

GrainFrac is a vertically integrated company that operates in Camrose, Alberta. The company produces and sells a natural beta-glucan concentrated fiber called Cerabeta™ to the food ingredient and nutraceutical industries.

Cerabeta™ beta-glucan concentrate is a dry, white soluble fiber. It is scientifically proven to help lower cholesterol as well as improve digestive health, blood glucose regulation, immunity and satiety. Cerabeta™ beta-glucan concentrate is produced using the company's own innovative, patent pending dry process.

The company is 100% Canadian-owned by a group that includes key members from the farming, academic, and processing communities. They collaborate to produce, mill, extract, process, and package products in their fully accredited, solely Canadian facility.

Elk Meat and Elk Products

Alberta Wapiti Products Co-op (AWAPCO) is a large volume wholesale supplier of ranch raised elk meat and elk products. We are proud to offer light, lean, and tender premium quality elk meat both fresh and frozen. Our elk are raised in a natural environment, with grazing and feeding on clean and spacious pasture. We also offer elk antler.

All AWAPCO elk are raised on farms monitored by Canada Food Inspection Agency, with disease surveillance in place. Our elk are processed at a federally and EU-inspected and approved processing facility with pasture to plate traceability.

AWAPCO is a new generation cooperative located in Alberta, Canada. Our company is owned and managed by our members (currently 144). AWAPCO has been in the business of marketing and selling ranch raised elk meat and elk products since June 2001.

AWAPCO has worked hard to build and maintain our reputation as a dependable and trusted supplier of premium quality elk meat in Europe, the United States, and Canada. AWAPCO is also working on expansion in both southern and eastern United States.

Carmen Creek Gourmet Bison

Consumers and restaurants around the world are discovering Carmen Creek gourmet bison, a pure, lean, and all natural protein that blends a mild flavor profile, exceptional tenderness and the added bonus of superior nutritional value. Carmen Creek bison products do not contain additives, hormones or antibiotics. Our bison are raised on the open range by experienced ranchers committed to ethical animal care and adhering to a natural feeding protocol that never includes animal by-products.

30 per cent leaner than beef, bison cooks quickly yielding tender, juicy results in much less time and virtually no shrink. A diverse product range offers a wide range of preparation options from steaks to roasts, to burgers and more. Bison works beautifully as a center of the plate protein, a side and appetizer or a feature ingredient in pasta or soup.

We offer a full carcass program and/or specialty orders consistently cut to exacting specifications to eliminate waste and optimize yields. Carmen Creek bison products are processed in federally inspected facilities to meet rigorous food safety standards and sustain cold chain management.

Can we add value to your business?

Echelon Foods Turduckens and Roasts

Want to stand out from the crowd? Want to offer unique, great tasting and innovative poultry products that will differentiate your business and impress your clients?

The Original Turducken is the manufacturer of premium quality turduckens and turducken roasts under the Echelon Foods brand. Our turduckens combine deboned turkey, duck, chicken and sausage stuffing into a culinary feast that will “wow” your customers. Our products are available with pork and pork-free sausage stuffing and in bacon-wrapped options. They are available in sizes and formats from 1.5 kg to 5.5 kg.

The Original Turducken is a Canadian company based in Calgary, Alberta. We produce at HACCP certified facilities in Alberta that adhere to the highest food safety standards. We ship products frozen in quality vacuum-sealed packaging to ensure and maintain product integrity. We have significant production capability and flexibility to meet export demand and private label needs.

We currently supply turduckens to retailers, foodservice companies and on-line to consumers across North America and are expanding internationally based on product requests from various markets. We take pride in working closely with our customers to deliver an exceptional dining experience and provide a 100% consumer satisfaction guarantee.

Bison Meat

Mountain Creek Bison herds are raised in as natural state as possible.

Yearling bison are sent to a special “bison only” feedlot where they are fed a finishing ration for a minimum of 120 days. This ration is approximately 50% barley grain (sometimes oats and wheat may be blended in) and approximately 50% roughage that consists of grass and legumes as well as cereal straw. This high end finishing diet is used to ensure a consistent and high quality carcass. We never use hormones of any kind, nor do we use antibiotics, ionophores or growth promoters in the rations.

All our animals are slaughtered and processed at a federally inspected HACCP-approved facility for uncompromised food safety and product integrity. Every load is tested for 0157 H7 and it is our goal to raise bison in a healthy sustainable manner for the well being of both the consumer of the product and the bison under our care.

Mountain Creek Bison is an Alberta family-owned and based company. Our animals are sourced with a team of personally selected ranchers.

We offer a full range of wholesale cuts and trim.

Premium Antibiotic and Hormone Free Canadian Beef

One Earth Farms, suppliers of premium Canadian beef under our Heritage Angus brand to customers around the world. Certified Angus cattle are raised without the use of hormones and antibiotics. All of our products are halal. Our beef is produced with time honoured tradition.

RAISED WITH:

- Traceability from pasture to plate.
- Genetic authentication of Angus descent.
- A promise of sustainable environmental stewardship.
- Pride from Canadian family ranches that dedicate themselves to feeding your family.

RAISED WITHOUT:

- The use of antibiotics.
- The use of artificial growth hormones.
- The use of animal by-products.

HERITAGE ANGUS BEEF is produced from hand-picked cattle that graze on the finest grasses and fodder on select feeds. Heritage Angus Beef is unparalleled in its flavour, tenderness and quality.

Embracing environmental stewardship, cattle are grazed with care and compassion for both the animal and for the sustainability of land and water resources which come from traditional values of Canadian ranching families and from the quality assurance that is backed by the national Verified Beef Production program. Heritage Angus Beef is legendary beef that you can trust and savour.

Premium Grain-Finished Lamb

SunGold Premium Lamb is produced in a large variety of cuts, trims and ground with value added options that appeal to both the retail and food service sectors and further processors. The company also offers a full line of offal products.

SunGold lamb is grain-finished for a minimum of 45 days. It has a slightly milder taste and a higher meat to bone ratio which provides exceptional value for either the retail or food service customer. SunGold products are packaged with state-of-the-art processing and packaging equipment to maximize product quality and consistency.

Operating in Alberta since 1974, SunGold Specialty Meats Ltd. is the largest federally-approved processor of lamb in Canada. Registered as Est. 136 by the Canadian Food Inspection Agency (CFIA), SunGold is capable of exporting to a variety of international markets. SunGold has operated with ISNA (Islamic Society of North America) Halal Certification since 2006.

SunGold Specialty Meats has the expertise to be able to consistently supply high quality premium lamb for our customers and can arrange delivery options to final shipment destinations.

Fresh and Frozen Pork

Sunterra Meats supplies high quality, traceable chilled and frozen pork cut to unique customer specifications.

Sunterra Farms' rigorous health and transportation protocols result in world-class market hogs entering Sunterra Meats. At the plant level, we make a personal commitment to ensure we meet or exceed industry standards at every step in the process right through to the shipping and delivery to our valued customers.

Sunterra Meats' customers are highly discriminating, demanding fresh tasting product that arrives at market in good condition. To meet this challenge, Sunterra uses state-of-the-art vacuum and shrink packaging technology that keeps moisture and oxygen away from the product.

The Sunterra brand is well known in Asia and the plant is working toward having EU approval. The company is relatively small but is currently exporting 70% of its products to the demanding Japanese market for retail and foodservice customers.

Wagyu Beef

Introducing Kobe Classic Beef, producers of the world's most exquisite and tantalizing beef product ever produced. Unlike other beef producers, our beef originates from Japanese Wagyu sires. Kobe Classic is so juicy, velvety smooth and flavorful, it's become the main draw at many establishments in North America.

Wagyu Canada Inc., based out of Alberta, Canada, produces specialty high end branded beef for markets in food service and retail. Our traceability program enables all information on the live animal to be carried directly to the point of consumption.

Wagyu Canada Inc. produces all muscle cuts for steaking and roasting along with a complete line of gourmet ground beef products. They also offer AAA and AA Black Angus beef for private label programs for export markets in Europe and Asia as well as a complete line of Alberta produced grain-fed bison meat.

There are certainly no assembly lines or cookie cutter approaches in the way we supply our products...you tell us what you want and we'll make sure you get it!

Western Royal Angus™ Beef

Since 1958, Western Feedlots has been producing world class cattle for global markets. Our premium beef brand, Western Royal Angus™ (WRA), represents the best we have to offer.

Raised in the foothills of the Rocky Mountains in beautiful Alberta, Canada, WRA cattle are fed a rich vegetarian ration of premium Western Canadian barley, resulting in beef that is well marbled, tender and juicy every time. Incorporating our decades of ranching experience, WRA allows only youthful black Angus cattle which are processed in a federally approved plant under the ISNA Halal ritual.

WRA is sold fresh chilled or frozen and available in multiple specifications depending on buyer's requirements.

Western Feedlots is one of Canada's leading cattle feeding operations and produces over 200,000 high quality Canadian cattle every year. Please contact us with any additional questions or requirements and we would be pleased to serve you.

Canola Oil, Margarine, Shortening and Non Dairy Whip Topping

Bunge is Canada's largest processor of oilseeds producing protein meals for the animal feed industry and vegetable oils used a food ingredient. Bunge's quality product lines include: shortenings, frying fats, whip toppings, emulsifiers, confectionary fats, salad oils, margarines, specialty baking shortenings and winterized oils, all of which are manufactured in both bulk and packaged forms. Bunge Canada is a large co-packer and custom formulator to industrial customers.

Bunge Canada has more than 35 years of experience in the processing of canola oil and has pioneered its application in the market for food ingredient uses. Bunge's facilities are modern and able to efficiently access the North American market by truck and railcar, and Bunge operates the only terminal in Eastern Canada that can move grain from the western prairies to overseas markets year-round.

Bunge Limited is a leading global agribusiness and food company with 25,000 employees in more than 30 countries. Bunge is the:

- world's largest oilseed processor
- world's largest seller of bottled vegetable oil to consumers and a leading supplier of premium edible oils to the U.S. foodservice industry
- world's largest corn dry miller
- largest exporter of soy products to Asia

BUNGE®

Quality Foods Begin With Quality Ingredients™

Oils, Margarines and Shortenings

Richardson Oilseed offers a wide variety of zero trans fat canola oils, non-hydrogenated margarine and shortening solutions that satisfy the needs of our customers requiring innovative, non-hydrogenated, lower saturated fat and clean label fats and oils.

Richardson is involved in every aspect of the food and agricultural cycle; from contracting acreage directly with farmers, receiving grains at harvest, to transporting those crops to the world. Richardson Oilseed Limited has been producing canola oil since the early 1960's and producing our own zero trans fat margarines and shortenings since 2003, supplying retail, foodservice, food manufacturers and industrial bakeries worldwide.

Richardson Oilseed has two state-of-the-art canola crushing facilities strategically located in the heart of North America's best canola growing regions. With two packaging facilities and multiple co-pack partnerships in key locations across North America, we are able to effectively reach all our customers at home and around the world.

Richardson Oilseed Limited, a division of Richardson International, is one of the largest canola oil processors in the world. Our roots trace back to 1857, when James Richardson began trading grain in southern Ontario. Today, Richardson is Canada's largest, privately owned agribusiness.

OILS AND FATS

Canola Oil and Other Food Oils

Sunora Foods, based in Calgary, Alberta, Canada, has its roots in canola oil. The very name – Sunora – is derived from the sun golden canola flowers that grow in the fields in the shadow of the Canadian Rockies.

Sunora is internationally recognized for its canola oil and related canola products and is a major Canadian exporter of food oil. Although Sunora Foods has its roots in canola oil, many customers turn to Sunora for other food oils and canola margarine. To these customers, Sunora means corn oil or soybean oil or sunflower oil. With its international trading capabilities, the company is often the best and most cost-effective source of corn oil, soybean oil and sunflower oil.

Oriental Cuisine and Western Sausage

Siwin products range from delectable ring sausage, Asian styled sausage, cocktail sausage, and exclusive specialties like our variety of Philippine Style Tosino and Longanisa. Every Siwin product is a little different from what you might expect—and all are consistently highly favoured in our consumer taste tests.

If your customers are tired of the same boring packaged meats they've always eaten, have them try Siwin. Unlike other meat products, Siwin foods are an exciting and unprecedented fusion of Canadian, European and Asian flavours in quality ready-to-eat meats. We take our time preparing our products, slowly marinating then seasoning and cooking with care.

The Siwin name is your assurance of fresh, flavourful and unique food. Siwin products are satisfying as a snack or as part of a complete nutritious meal.

Your customers will get the meaty tastes they crave—with a splash of adventure!

Stir Fry Sizzlers

Crave something unique try our Siwin Stir Fry Sizzlers™, ready in just seven minutes. Consumers will feel like a top chef, simply by adding vegetables and rice or noodles. The inner package of frozen meat thaws quickly in a microwave or on the countertop and each package has a recipe suggestion to get the creative juices flowing.

Siwin has made cooking an impressive stir-fry easy by formulating a range of authentic Asian flavours and marinating to perfection. Stir Fry Sizzlers™ are made with pure Alberta pork and all-Canadian ingredients, with no added MSG. They are a smart beginning to a nourishing and low-fat meal. Try all five unique flavours: Spicy Thai, Garlic Pepper, Korean BBQ, Sweet & Sour and Teriyaki.

Siwin provides the highest quality ready-to-eat and quick-cooking meal solutions. Wholesome meets high-tech in Siwin's immaculate and modern federally inspected Alberta processing facility, where we produce our products with exceptional care and the highest food safety standards. In the test kitchen, we blend quality herbs and seasonings with the finest cuts of world-renowned Canadian meats. The result is our nutritious Siwin meat products, unmatched for flavour, quality and freshness. Make a great impression with healthy meals that are deliciously different!

Gourmet Indian Appetizers and Entrées

Aliya's Foods Limited, home of the Chef Bombay brand, has been bringing gourmet Indian appetizers and entrées to tables across North America since 1999. By using only the freshest and finest ingredients, Aliya's Foods has become Canada's leader in ready to eat Indian cuisine. All of Chef Bombay products are made with natural ingredients with no additives or colors and contain zero trans fats.

Our federally-inspected, HACCP and SQF certified manufacturing facility boasts state of the art technology providing our clients with the ultimate standards in food safety.

Our flagship product is our Samosas, which is rapidly becoming a staple in entertaining and at the dinner table. Chef Bombay's samosa recipe has been perfected to please the North American palette without compromising on traditional flavors. Our offering uses high quality and fresh ingredients to deliver succulent varieties from chicken tikka, beef and vegetable in a thin, multilayered phylo-type pastry and crisped to perfection. Our entrées include butter chicken and chicken tikka masala, which pairs perfectly with our aromatic long-grained basmati rice. Both entrées include generous portions of marinated chicken in velvety, flavourful sauces.

All of our products are available in retail and food service. We have many retail clients that carry our products under their private label banners as well as co-packing with McCains in the food service segment. We pride ourselves in delivering great quality products with the highest regard for food safety standards.

Organic Baby Food, Cereal, Snacks

Baby Gourmet is Canada's premium market leader of organic baby food, cereal, and snacks, feeding Canadian babies more than 23 million meals annually. Founded ten years ago by sisters Jen and Jill, these unique blends of organic fruits, vegetables, proteins, and grains provide babies with outstanding nutrition and parents the confidence that they are feeding their children the best food.

Offering a complete solution for families, each Baby Gourmet variety is 100% organic and NEVER contains added sugar or salt. The complete product line includes: a variety of Organic cereals (first foods), pureed baby food (age 6 months +) featuring a unique blend of fruits, vegetables, grains and yogurt; savoury meals (8 months +) which contain meat protein for growing babies; and snacks (8 months +) that focus on easy to eat blends of fruit and vegetables. Where applicable, Baby Gourmet products are certified Kosher and are peanut free. Baby Gourmet is available at every major retailer in Canada.

Recently launched Slammers Snacks meets the needs of school-aged kids, for healthy snacks on the go. These organic blends of superfoods (fruits, vegetables, grains and/or yogurt) are high in antioxidants and deliver a full serving of fruit and vegetables, fueling the fun for active kids.

Baby Gourmet is developing export capabilities in several Asian markets and are open to opportunities to feed babies and children in other markets.

FOODS

Frozen Potato Products and Other Frozen Foods

McCain Foods Limited is the world's largest manufacturer of frozen potato specialties and also produces other food products, including pizza, appetizers, oven meals and desserts. Our products can be found in thousands of restaurants and supermarkets in more than 160 countries around the world. Our potato facility in Alberta exports about half of what it produces to nine different countries in the Asia-Pacific region.

Our success at home and abroad has been built on the goodness of the potato. A powerhouse of nutrients, potatoes are among the leading sources of seven essential nutrients including potassium, fibre and vitamin C. Plus they are low in fat and are cholesterol free. Best of all, McCain French fries, a favourite around the world, offer much of this same goodness. To find out more about our love for potatoes, please visit www.mccain.com.

McCain is an international leader in the frozen food industry, employing approximately 18,000 people and operating 50 production facilities on six continents. McCain products are delicious, nutritious, affordable and convenient. We offer good food made by good people doing good things that makes people feel good.

Gourmet Indian Foods

Thumbs Up Foods Inc. manufactures gourmet ethnic Indian style specialty foods.

Samosas are an Indian savory pastry; triangular in shape and filled with aromatic, spicy mixtures of vegetables or meat. Serenna's™ samosas are light and crisp on the outside with just the right amount of spice on the inside. Easy to prepare as an appetizer or snack, they also make a delicious side dish with other entrées. Our dough is prepared through a lamination process that does not require the addition of oil and results in a product with reduced fat content.

Serenna's™ Whole Wheat Rotis (Chappati) is a thin unleavened flatbread, made with atta (whole-wheat) flour, rolled out and baked on a tawa (special griddle). Serenna's Vegetable Pakora (Fritters) are a flavourful delight, made with potatoes, carrots, spinach, chickpea flour and an array of spices. They are all blended together to tantalize your taste buds. This is a "GLUTEN FREE" product.

Thumbs Up Foods is a family owned, independent Canadian company based in Calgary, Alberta, Canada. The family's roots are from Tanzania, East Africa. The company started in 1996 and has now expanded the supply of its products to five-star hotels, catering companies, local stores, golf courses and delis across Western Canada directly, as well as through local distributors. Exports to the US have also become an integral part of the business.

CheeCha Puffs – Gluten Free

Gluten Free CheeCha Puffs are great tasting hot air puffed potato pasta chips. They are fast becoming the most popular snack in the gluten free category because they are also low in fat, dairy free, soy free, egg free, and peanut and tree nut free.

Beyond their allergen free ingredients, and much to the pleasure of our customers, Gluten Free CheeCha Puffs taste great. They are available in five excellent chip flavours that include Original, Fiesta Salsa, Luscious Lime, Sea Salt & Pepper and Sea Salt & Vinegar.

Gluten Free CheeCha Puffs are certified gluten free by the Canadian Gluten Free Association. The plant is British Retail Consortium food safety certified.

CheeCha Puffs are available in 2.5 oz/70 g bags. There are 12 bags per case. The shelf life varies with flavour from 210 days to 365 days. However, our plant is ready to consider private label options that does allow for other pack sizes.

Wild Mushrooms, Berries, Rice, Grains and Greens

Marketing a vast selection of edible wild mushrooms, packaged for retailers and restaurants as fresh, frozen or dried products. Our dried gourmet mushrooms, packaged as whole mushrooms, slices, blends or powders are used throughout the food industry.

We source domestically grown fresh mushrooms from quality producers. Mo-Na Food also provides a gluten-free gourmet mushroom soup mix.

Spring and summer months bring all types of wild greens such as fiddleheads, ramps, miner's lettuce, sea asparagus and watercress. Available year round from Mo-Na Foods: frozen wild and locally grown berries, wild rice, grains and pulses.

Established in 1980 as the first Canadian wild mushroom company, Mo-Na Food Distributors specializes in the marketing and distributing of wild mushrooms, wild rice, greens and berries. Currently marketing a full line of wild foraged foods not treated with chemicals or preservatives, Mo-Na has gained a reputation of providing only the best quality wild products available.

Export Hay Forage Compactors

Hunterwood Technologies designs, engineers, and manufactures innovative machines that compress baled and loose hay into mid-to-high density bales. Hunterwood presses are designed for export processors and enable the storage and transportation of hay to be more efficiently optimized. Hunterwood Technologies provides the means for hay and feed exporters to reach their global market.

Hunterwood presses accommodate two-tie bales, three-tie bales, large square bales (3x3, 3x4, 4x4), and loose hay. Fully customizable presses provide hay exporters with a machine that is unique and that fulfills specific needs. With output rates up to 40 Metric Tonnes per hour, Hunterwood presses are the most efficient hay presses on the market.

Hunterwood Technologies provides forage exporters with viable transportation options so that alfalfa, animal feed and other forages can reach global markets.

Livestock Solutions Software

ViewTrak Offers Innovation

Seeing a growing demand for accountability and traceability in our food supply, ViewTrak Technologies began developing software and hardware in the 1990's to track livestock from the pasture to plate today, ViewTrak has one of the world's most complete offering of software available for the livestock industry.

Feedlot Solutions, Feedbunk Solutions and Cattle Medical System enables you to have complete control over all aspects of your feedlot operation. It is Windows based, tracks feed, vaccinations, treatments and weight gain for individual animals as well as an entire pen. Take the headache out of recalculating ration costs and invoicing customers. Feedlot Solutions does it all at the click of a button.

Auction Master Pro software maximizes the speed of your livestock auction. Its Windows based, touch screen enabled, with in-sale recording and HD display screens to modernize the look and feel of your auction. You will be pleased with the functionality and your customers will thank you.

The PG-207 Electronic Pork Grader enables you to be certain of the quality of the meat you are processing and ensures producers are getting fair payment for their hogs. The PG-207 is used to provide accurate grading measurements on over 50,000,000 pork carcasses annually. Under development is the **LG-409 Electronic Lamb Grader** which will be used for grading lamb carcasses. It will be market ready in late 2014.

Forage

Green Prairie International is a respected global wholesale supplier of quality forage products and has become one of Canada's premier processors and suppliers of long-fiber timothy and alfalfa hay to valued international markets.

Stringent quality assurance ensures that the product consistently meets the needs and expectations of the customers. Careful attention is given to forage crops from their early growth and development stages to their harvest. This careful attention continues right through delivery to the plant and processing ensuring the products are free from contamination and meet high-quality standards fit for shipment to the consumer.

Forage products are compressed into bales that allow for easy and efficient handling. State-of-the-art compressing facilities allow Green Prairie to efficiently process forage crops to give consumers maximum return on investments. The majority of the products are consumed by horses and both dairy and beef cattle.

Green Prairie is a forward thinking company and is always innovating ways of harvesting, compressing and transporting hay globally. Located in close proximity to major transportation hubs, Green Prairie's exceptional logistical expertise ensures frequent and in-time delivery by truck or by ship.

Green Prairie International

Currently exporting to: Japan, China, India, United Kingdom, The Netherlands, South Korea, United Arab Emirates, Taiwan, United States, Vietnam, Kuwait

Planning to export to: Middle East

Horse Hay

First formulated forage feed ration in bale on the market. Engineered with the horse and their handlers in mind.

Bale size and weight has been designed to transport efficiency and handling ease.

Process removes dust and pollen to protect the equine respiratory system. This also reduces ambient dust in enclosed spaces for a better barn environment. This Canadian Food Inspection Agency inspected facility also removes contamination incorporated during harvest. Stones, metal, rodents, bones and wood contamination is removed. Bales are individually weighed, and passed through a moisture and metal scanners.

Bales are stacked in blocks of 64 and fit on a conventional pallet. They can be loaded and unloaded from a steel shipping container carrying maximum allowed weight (1,280 bales per container).

We only use the best forages available on the Canadian Prairies.

Looking for customers globally.

Swine Genetics Supply & Farm Management

Alberta Animal Genetics Consulting Group Ltd. (AAGCG) can provide services related to swine genetics supply, Canadian Centre for Swine Improvement program genetic evaluations and Estimated Breeding Value index generation and large farm management staffing.

AAGCG already has four contracts with breeding farms in China and anticipates sales of 600-1000 breeding pigs in chartered aircraft loads to Heilongjiang, Hebei and Shanxi Provinces in 2014 through 2016.

Mandarin speakers in AAGCG help pig farm owners and their managers enhance production levels on their farms to North American standards where recommendations are followed.

Livestock Genetics and Agricultural Technologies

Alta Exports International (AEI) offers full-service import and export consulting and markets livestock, embryos, genetic technologies and semen to the international market. AEI's expertise covers a wide scope within the agricultural export business and with extensive experience and the proper resources, AEI is able to meet all aspects of transporting livestock around the globe. AEI is also involved in numerous technology transfer projects and provides training in embryo production and management, semen production and livestock management for both beef and dairy cattle.

Alta Exports International is a Calgary-based livestock export and marketing company that was established in 2000 by members of the Alta Genetics International Marketing Team, whose passion for the livestock industry remains the cornerstone of the company. AEI markets livestock, embryos, genetic and livestock production technologies and semen and farm equipment.

Since their inception, AEI's network has expanded internationally with divisions in both China and Russia and continues to venture further into international markets.

Livestock and Livestock Genetics

Cantriex Livestock International Inc. (Cantriex) is a full service livestock and livestock genetics brokerage company that has been in the business of exporting for more than 30 years. Cantriex's vast network of domestic and international customers gives the company a strategic position that allows it to complete a wide range of transactions. Operated by Tony and David Saretsky, Cantriex offers marketing, consulting, foreign exchange, logistical and management services for the livestock industry.

Over the course of Cantriex's 30 years they have exported in excess of 5 million head of cattle; from slaughter and feeder cattle to the United States, to registered beef and dairy breeding stock to Mexico, Russia, south east Asia and South America. Cantriex has operated and managed large-scale cattle feeding and cattle grazing operations across Western Canada and has the experience and expertise to provide technical assistance to a wide range of beef operations.

Beef Cattle Embryos

Davis-Rairdan has joint production and marketing agreements with most of the elite purebred beef cattle producers in Western Canada. This allows us to provide high quality proven beef cattle genetics which are custom suited to any international market. All of our embryos are frozen as quality grade one based on the International Embryo Transfer Society grading system.

Davis-Rairdan Embryo Transplants is located near Calgary, Alberta, Canada, and has more than 30 years of experience in the field of bovine embryo transfer. We have exported in excess of 50,000 cattle embryos to more than 30 countries and can handle all aspects of international embryo shipments. Davis-Rairdan is certified by the Canadian Embryo Transfer Association and approved by the Canadian Food Inspection Agency to produce embryos for export. Our embryo transfer team has been involved in several large scale embryo transfer projects around the world including Russia, Hungary, Colombia and Sweden.

Livestock Genetics - Porcine Germplasm

Live breeding pigs and fresh or frozen boar semen exported from herds and boar studs across Canada provide high quality performance from pigs tested in the Canadian Centre for Swine Improvement.

Improved genetics can be supported by AI equipment and supplies, barn equipment and supplies in developing pig breeding operations.

Management expertise and web-based record-keeping ensure that the imported breeding program can be maintained and enhanced in any country. Seminars, on-farm demonstrations and written reports provide help with managing the breeding herds.

On-Farm Skills Training programs for barn workers can be offered either as classroom learning or hands-on in-barn training for new swine technicians.
