Welcome

International Buyers

This catalogue features some of the agriculture products and services that Alberta exports internationally. This catalogue is a resource for importers, distributors and buyers located outside of Canada.

The province of Alberta, Canada, is proud of its agriculture and food growers, producers, processors and marketers, and assists these companies in promoting their products and services to the world.

Alberta has built an international reputation as a reliable source of agricultural technology, expertise and food. With over 20 million hectares (50 million acres of total farmland area) used for crop and livestock production, Alberta produces an abundant supply of agricultural commodities available for export and as ingredients for processed products. Alberta's agriculture equipment manufacturers, input suppliers, consultants and researchers have developed a reputation as innovative and knowledgeable product and service providers to the global marketplace.

This catalogue is a tool to link potential buyers with Alberta product and service suppliers.

We hope you will also visit our beautiful province to conduct business, as well as enjoy the scenery, culture and cuisine.

A PDF version of this catalogue is available at:

Alberta, Canada

The province of Alberta is located in western Canada and is renowned for the natural beauty of its varied landscape which includes mountains, glaciers, foothills, lakes, rivers, forests, badlands, wetlands and open plains.

Alberta's success lies in the diversity of its people. Alberta has a mix of cultures from both the multinational settlers that came to this country and indigenous people who possess diverse and rich heritage, cultures and languages.

Our society is guided by shared values and linked by a deep respect and appreciation for multiculturalism and the value of hard work. English is our most common language, but with Alberta's cultural diversity, dozens of languages are spoken here.

Alberta's Agriculture Sector – A Global Exporter

Our agriculture sector is vast and export-oriented. In 2019, Alberta exported over \$11.6 billion worth of agri-food products to international markets.

Alberta is the largest cattle-producing province in Canada with 4.9 million head on farms or 40.4 per cent of the national total, as of July 1, 2020. The province is also a significant hog producer in Canada with 1.5 million head on farms, as of July 1, 2020.

Alberta enjoys a global reputation for safe, high-quality agriculture and agri-food products. The reputation stems from its thorough meat inspection and licensing programs, animal tracking systems, accurate and consistent grading systems for grains and oilseeds, and various food safety initiatives for producers, processors, and consumers. These measures ensure the safety and quality of Alberta's agriculture and agri-food products.

Connecting buyers and suppliers

Alberta Agriculture and Forestry provides information and assistance to international buyers and investors in supporting our thriving agriculture and agri-food industries. We support industry by connecting buyers and sellers, while providing information on Alberta's supplier capabilities.

Alberta also maintains a network of international offices that provide on-the-ground representation in many markets.

Visitors come to Alberta for business, pleasure or a combination of both. You can shop in the largest shopping mall in North America, hike where the dinosaurs once roamed, ski in the Rocky Mountains and experience life in the past at heritage sites and explore our modern urban centres.

We invite you to experience all that Alberta has to offer!

Totally Awesome Cookie Mix

Confetti Sweets is a bake shop in Sherwood Park, Alberta, that specializes in baking totally awesome cookies. Our soft, chewy cookies can now be made at home with our totally awesome mix! The mix is available in four delicious flavours: Chocolate Chunk, Coconut, Sugar and Oatmeal Chocolate Chunk.

What sets our product apart from other sweets on the market is the taste, texture and quality of ingredients. All our ingredients are premium and no preservatives or additives are added to any of the mixes.

Each package is between 490-625 grams and can be ordered in cases of 12. No minimum/maximum order volume.

Sold through direct to consumer, wholesale, and grocery retail channels.

Asian Bakery Products

Golden Happiness Bakery is a family-owned and operated business that was founded in 1987. Originally, Golden Happiness started as a retail bakery in the heart of Calgary's Chinatown. Today, Golden Happiness is a manufacturer of a range of frozen Asian and Western food products. Their products are supplied to many grocery chains and food service establishments across Canada and the United States.

Golden Happiness offers a variety of frozen products including baked buns, steamed buns, spring rolls, dumplings, croquettes and their well-known Chinese long donut. The Chinese long donut is a versatile product consumed by many Asian communities world-wide. Golden Happiness has developed this product to be consumed as convenience food that is easily reheated while still maintaining the taste and texture of freshness.

Golden Happiness Bakery takes pride in their product quality and has achieved the Good Manufacturing Practice Certification (GMP). The company believes that high quality inputs is the first step to creating a high quality product.

Canadian Craft Beer

Blindman Brewing is a multiple-award winning craft brewery based in the heart of Canada's barley heartland. Brewing out of Lacombe, Alberta, using the highest quality ingredients and leading-edge production techniques, Blindman believes in creating innovative, flavourful beers.

Our lineup includes new and in-demand styles as well as modern takes on old favourites. Some of our standouts include our Blindman River Session Ale, Longshadows IPA, Five of Diamonds Pilsner, Ichorous Imperial Stout and our Kettle Sours.

Packaged mainly into the fast-growing category of 473 mL "tall boy" cans and some traditional 355 mL cans, Blindman also uses centrifuging instead of traditional filtering to increase shelf stability without sacrificing flavour.

Premium Canadian Vodka

This Canadian vodka is an international award winner with multiple medals and best in show, running up against over 50 vodkas throughout the world at an international tasting competition (Wine & Spirits Wholesalers of America).

This is a carefully four-times distilled grain (corn) vodka mixed with meticulously filtered Rocky Mountain water to create one of the best vodkas Canada has to offer. Celebrating Canada's national sport of hockey, we are proudly and unapologetically Canadian.

Current package formats are 750ml traditional bottle (12 pack) and 750ml hockey stick bottle (6 pack) that includes a gift box. Other formats can be created.

Handcrafted Aromatic Bitters

Token Bitters makes handcrafted artisanal aromatic bitters, inspired by and made in the city we call home: Edmonton, Alberta, Canada.

- Potent flavouring agent made of botanicals (aromatic herbs and fruits)
- Predominately used as an additive to cocktails
- Also adds flavour to non-alcoholic beverages, coffees, baked goods and more

Token Bitters uses organic ingredients sourced from local farmers and businesses whenever possible. They are bottled without chemicals or preservatives. Token Bitters come in 100mL bottles

- Strathcona Orange (Retail: \$23 CAD / Wholesale: \$13 CAD)
- Ritchie Cherry (Retail: \$23 CAD / Wholesale: \$13 CAD)
- Whyte Lavender (Retail: \$23 CAD / Wholesale: \$13 CAD)
- Calder Chai (Retail: \$23 CAD / Wholesale: \$13 CAD)
- Seasonal Flavour: Highlands Mojito (Retail: \$23 CAD / Wholesale: \$13 CAD)

Our Box Set includes the four core flavours in 15mL bottles, for convenience (Retail: \$36 CAD / Wholesale: \$20 CAD).

Natural and Organic Barley Products

Progressive Foods has a unique process to cook barley efficiently without losing its nutritional values. Our passion to create a tasty and healthy product has inspired us to make a natural and organic barley from locally grown hullless barley.

SNAPPY Grains™ is a Progressive Foods' brand with two product lines: Natural Barley in A Snap and Organic Barley in A Snap. SNAPPY Grains™ barley is an excellent source of protein, fibre and cholesterol lowering soluble fibre- beta glucan. As well, our barley contains a high per cent of resistant starch that is unique to SNAPPY Grains™. The many health benefits make barley a versatile grain and a great alternative to rice and starch rich foods.

Progressive Foods offers high quality products that can improve your health. We have put in the effort to prepare our barley to a state that provides convenience and simplicity in use. Snappy Grains™ barley only takes ten minutes to cook unlike other barley products and be served in many different ways. Check us out online for delicious recipe ideas.

Make Snappy Grains™ a part of your breakfast, lunch, dinner or dessert ... in a snap. Natural, organic, delicious!

Wasabi Powder and De-oiled Mustard Powder

Sakai Spice produces wasabi powders and low oil mustard powders. They have a patented process that removes the oil from the mustard seed enhancing taste and pungency. The process ensures a longer shelf life and a more concentrated product, which provides a substantial cost savings.

Sakai Spice's in-house research and development lab enables them to work with customers in the development of new mustard flours and wasabi powders.

Sakai Spice Offers wasabi in standard 1kg bags as well as 20kg poly bags. The size of bag is flexible depending on customer's preference.

Sakai Spice offers mustard powder, cake and bran in both oriental and yellow as well as mustard oil. All mustard powders are packaged in 20kg paper bags. Bran and cake can be packaged in either 20kg paper bags or 1MT bulk bags. Both mustard and wasabi powders are kosher and halal certified.

Hemp, Pulses and Oilseeds

Located in Southern Alberta, Arjazon Seed Trading was established as a sister company of a Netherlands-based export company with the same name. Arjazon has achieved significant growth since opening their new facility in 2017.

With state-of-the-art machinery, Arjazon processes and packages a variety of Canadian pulses and oilseeds. Main commodities processed include peas, lentils, flax, and hemp. These are available for the food market as raw grain or for feed purposes.

Arjazon exports their product all over the world and is actively exploring new markets. Arjazon is certified for organic processing and trading.

Arjazon offers their product to be shipped bulk, or in bag sizes varying from 15kg bags to 1500kg bulk bags.

Grains, Oilseeds & Pulses

Providence Grain Group Inc. was established in 2002. Operating as Providence Grain Solutions, we are one of the few producer owned grain businesses in Canada.

Providence Grain Solutions is a global trading company providing care and attention to the quality of products we sell. We can offer flexible quantities and smaller shipments for various products. As a major shareholder of Columbia Containers (CCL), we are positioned to sell container sized quantities and deliver on a global basis. Our priority is quality over volume; we select post-harvest, providing a superior end product to international buyers.

Wheat, canola, flax, oats, peas, lentils, malt barley, feed barley, and organics are the products we offer.

Our shareholders are producers. This provides a solid foundation for the farmers who trust our expertise and rely on the solutions we provide at the field level, and for our buyers who are confident in our products and the service we provide. Locally Grown - Globally Connected.

Pulses, Flax and Cereals

At Scoular, we pride ourselves on competitively meeting our customers' needs and efficiently managing the supply chain of pulses, flax and cereal grains from producer to customer around the globe.

We focus on bulk and bagged shipments via truck, rail, intermodal and container, originating from our Scoular-owned facilities across Western Canada. Transportation and logistics are a key strength to our business in Canada and abroad.

Our goal is to be the supplier of choice by always operating with a high level of integrity while providing our customers with the quality of product they need, when and where they need it.

Peas and Faba Beans

At St. Paul Seed Processing we partner directly with local growers and control seed cleaning to meet the highest specifications. We offer a secure, high-quality supply of exports in a timely fashion.

The industry has changed a lot since the first wooden plant was built in the 1950's. At St. Paul Seed Processing we're evolving with the times. Our state-of-the-art facility is regularly updated with new equipment to quickly and consistently deliver you high-grade results.

We are proactively exploring new markets for high-quality pulses. We recently became an organic certified cleaning facility.

Bagging and bulk intermodal loading options are available.

Seed and Feed Grains

Stony Plain Seed Cleaning provides customers with guaranteed top quality seed and feed grains and ships them either bagged or bulk via truck, rail or ocean containers.

They are capable of cleaning cereals, pulses and specialty crops with storage capacity of approximately 1,600 metric tonnes of grain.

Their robotic bagging system and bulk handling equipment enables them to efficiently package & load both containers and trucks. They also have the ability to load rail-cars at a secondary facility north of our plant.

Stony Plain Seed Cleaning markets and exports crops such as oats, barley, wheat, flax, rye, peas and other specialty grains. They also supply the horse racing industry with top quality oats at competitive pricing. Whether it is bin-run feed oats or high quality triple cleaned pony oats, they can make a product unique to a customer's needs.

Grains and Pulses

W.A. Grain & Pulse Solutions (W.A. Grain) is an Alberta-based company whose primary business is cleaning pulses for export. We also ship all grains and oilseeds for both export and domestic markets and have the capability to clean all products to buyers' specifications.

These products include but are not limited to:

- Pulses – green peas, yellow peas, green and red lentils and fababeans
- Grains – wheat (all types), barley (feed & malt), oats and rye
- Oilseeds – canola and flaxseed
- Ground or cracked (any commodity)

W.A. Grain ships from ten locations throughout Alberta. W.A. Grain also has three owned locations in Saskatchewan, three in Alberta and one in Prince Edward Island. Currently we ship 200,000 MT of pulses and 120,000 MT of grains and oilseeds annually. In the near future, more bagging lines will be added to be able to supply more of our customers' needs. Pulse splitting and cereal de-hulling are soon to be added.

Canadian-grown Rhodiola Rosea

The Alberta Rhodiola Rosea Growers Organization (ARRGO) is a cooperative of farmers who commercially cultivate and process Rhodiola rosea. ARRGO provides an alternative to wildcrafting of the world's dwindling native supply. Our roots are fully traceable and sustainably grown, and are sold bulk and as teas. ARRGO has the world's largest supply of cultivated Rhodiola rosea.

ARRGO grows both certified organic and conventional Rhodiola. Our roots are free of adulterants and contaminants, and are shipped around the world.

ARRGO's processing facility is Certified Organic, HACCP, and GACP (Good Agricultural Collection Practices). ARRGO members are audited annually for GACP.

Our members are proud to provide this pure, premium quality raw form of nature's remedy for stress and cognitive health since 2006.

Sulforaphane Skin Care, Supplements & Food

Newco Natural Technology is revolutionizing products using broccoli's most powerful antioxidant, sulforaphane. Over 2 decades dedicated to creating effective natural products.

BroccoFusion[®] Ointment was featured on the Oprah Winfrey Network, in May 2012. This multi-purpose ointment can be used for treating skin conditions from hyperpigmentation to burns and wounds.

BroccoFusion[®] Lotion is a moisturizer that protects against the drying effects of the sun and abuse of the elements, hides acne and skin blotches, smoothes wrinkles and brightens the skin.

BroccoGen 10[®] Capsules are potent sulforaphane antioxidant supplements containing 3-day new broccoli sprout concentrate, carefully extracted without the use of heat or harsh chemicals.

BrainMaintain+[™] Capsules are a source of antioxidants to enhance cognitive function and performance. Ingredients include sulforaphane, curcumin, resveratrol, alpha lipoic acid, ginkgo biloba, and yerba mate.

Brocco-Chocco[®] Chocolate Bars are the world's healthiest chocolate. Made in collaboration with a master chocolatier, each fair trade bar is made of 75% dark chocolate, contains 2-4 lbs. of broccoli sprouts and pink Himalayan salt.

Headquartered in Calgary, Alberta, Newco continues to create leading-edge products.

Fresh Clean Crisp Canned Air

Vitality Air is committed to delivering the best air possible...

Remember the day when people laughed off bottled water? *"It comes out of the tap, why would I want a bottle?"*

The truth is we've begun to appreciate the clean, pure and refreshing taste of quality water. Air is going the same way.

We're discovering that our senses can tell the difference between poor air and quality breathing.

Just like bottled water, premium air is a growing industry because people are noticing the difference. Now with Vitality Air, anyone can access this high quality, convenient and affordable luxury experience. Minimum Volume: 2,800 bottles – approximately two pallets.

100% Pure Natural Canadian Honey

Bee Maid Honey is a 100 per cent pure Canadian tradition, delivering only the highest quality honey to consumers since 1954. What makes our highly recognizable brand truly unique is that there are two cooperatives behind it – the Alberta Honey Producers Cooperative and the Manitoba Cooperative Honey Producers.

Recognized worldwide for our premium quality and exquisite flavour, Bee Maid Honey Limited exports throughout the world for retail, food service and food manufacturing. The honey's delicate flavour is the result of the natural variances of flowering crops and meadows in Western Canada. Our creamed honey is produced by adding crystallized honey to liquefied raw honey and mixing it until the honey has a smooth, creamed texture.

Bee Maid Honey offers a wide variety of shapes and sizes of PETE bottles using our in-house blow moulding facility. Our food safety program is always top-of-mind: packing plants are HACCP recognized and we are the first Canadian honey packer to achieve the Safe Quality Food designation. All our products are kosher certified. Bee Maid Honey is also True Source Certified®, which means all our honey is ethically and transparently sourced. Our ownership structure allows us to implement measures that provide traceability from hive to bottle.

Raw, Luxury, Superfood Honey

Drizzle Honey is selectively sourced, completely raw, luxury honey. Our collections are created using only natural, pure, 100% Canadian honey.

We have three Collections: The Everyday Luxury Collection includes our white and golden honeys as well of rounds of honeycomb. The Superfood Honey Collection includes our coveted raw honey blended with organic superfoods to create a health-conscious, functional honey. Lastly, the Craft Honey Collection boasts our one-of-a-kind seasonal honeys.

All honey is produced using high standards of traceability and food safety practices. Drizzle is a Certified B Corporation™, meeting the highest standards of social and environmental performance, accountability, and transparency in the world. Our food safety program includes a CFIA facility, food grade packaging and HACCP certification. We are a proudly women-owned and run enterprise.

Backed by a passionate team, our company is seeking export partners to bring the Drizzle brand worldwide.

Organic Honey, Beeswax & Bee Pollen

Good Morning Honey Ltd. produces 100% Canadian honey. Our protocols ensure the safest, most pure honey is gently removed from the beehives by hand then harvested and packaged in our extraction facility. The honey is not pasteurized, letting it remain in its raw, natural form - just as the bees made it.

Our record keeping provides traceability of the honey from the hive to you. Good Morning Honey is available in new drums (approximately 290kg each) as well as prepackaged in smaller containers.

Our apiaries cover a diverse area of natural prairie land and farms near Edmonton, Alberta. Our family-owned company is proud to produce some of the world's finest raw and organic honey enjoyed by many across North America, as well as Asia and Europe. Our honey is prized for its colour, silky smooth texture and delicious taste. The northern Canadian climate and long summer days offer the bees the chance to forage on a wide variety of wild flowers along with clover, alfalfa and canola. Good Morning Honey is registered with the Canadian Food Inspection Agency.

Pure Raw Canadian Honey

At the Greidanus Honey Mill we produce our unprocessed honey to be as pure as nature intended. Without blending or pasteurizing our honey, we have maintained all the naturally occurring nutrients to ensure you are receiving nature's healthiest sweetener. We collect all our honey in hives located in the clover-rich prairies of Southern Alberta, known to produce some of the world's finest honey.

We are a Canadian Food Inspection Agency licensed and inspected farm.

Our honey is packed in new food grade drums.

Our family farm is a second generation farm that has been operating since 1973.

Organic Honey

Our family-run apiary in Guy, Alberta has been producing pure, organic honey for over 25 years. As leaders in sustainable beekeeping, Honey Bunny Inc. is proud to offer honey certified as both organic and non-GMO through our Peace River Honey brand.

Our entire process is free from chemicals, pesticides and antibiotics. We can trace every delectable drop of our honey to the pristine Peace River region we call home. The area's cool climate and abundant fields of clover and wild alfalfa create a honey that's delicately sweet and distinctively light in colour.

Our 40,000 square foot processing facility is equipped with full production, packaging and distribution capabilities. We offer retail and bulk sales, bulk packaging and private label opportunities. We are Canadian Food Inspection Agency (CFIA) and Safe Quality Food (SQF) certified, ensuring the highest standards of food quality and safety.

Pure Raw White Canadian Honey

When you purchase Paradis Honey, you are purchasing over 350 years of family bee-keeping history from France to Canada. Their forefathers had their beginning in France and sailed to Canada in 1658, landing in Quebec City. Today, Mike, Lise and their children are proud to continue this long family tradition of beekeeping and honey production.

Their family name means Paradis and that is exactly what you receive when purchasing Paradis Honey. The absolute best 100% Pure Raw White Canadian Honey, sourced from Canadian Clover, alfalfa and wildflowers from the fields of the beautiful Peace River region of Northwestern Alberta, Canada.

With their custom manufactured state of the art equipment, they carefully remove the honey from the hives/combs in their CFIA approved and True Source Certified facility. The honey is placed in new steel drums for storage or packaged into premium retail packaging.

Pure Canadian Honey and Honeycomb

Beekeeping has been in the family for generations, in fact all the way back to 1936 when family members moved to Falher. While our ambition was modest – to bring pure, all-natural honey to our family's table – it only took a taste for us to know it deserved to be shared.

The meticulous methods we use to create our pure, all-natural honey are what distinguishes Wolfe's from the swarm. To make honey that soothes the soul and energizes the body, we rely on the skill and dedication of our hardworking, family-run team and time-honoured processes.

Nature's liquid fruit. At Wolfe's, it's been our passion for over 75 years and we're honoured to share it with you. So get your buzz on! Treat yourself to a taste of Wolfe's Honey today, and celebrate the sweet life.

We are the only packer in Canada of Pure Honeycomb rounds. Packing: 28g to 1kg bottles and able to pack 2.5kg pails to 7kg pails. Available for co-packing, private label and our brand.

Premium Grain-Finished Lamb

Canada Lamb Processors Ltd. formerly SunGold Specialty Meats Ltd., a subsidiary of North American Lamb Company Ltd. (NALC), is designed to form a truly Canadian integrated lamb supply chain to provide premium lamb products to domestic and international markets with year-round consistent supply and specification.

Operating since 1974, CLP is the largest federally inspected, Halal Certified processor of lamb in Canada. Registered as Est. 136 by CFIA, CLP exports to a variety of international markets and looking to expand.

Our brand SunGold Premium Lamb, is produced in a large variety of enhanced fresh and frozen cuts, and grinds with value added LambTonight options that appeal to both the retail and food service sectors and further processors. The company also offers a full line of offal products.

SunGold lamb is grain-finished for a minimum of 45 days. It has a slightly milder taste and a higher meat to bone ratio which provides exceptional value for either the retail or food service customer. CLP products are packaged with state-of-the-art processing and packaging equipment to maximize product quality and consistency.

Bison Meat

Mountain Creek Bison herds are raised in as natural state as possible.

Yearling bison are sent to a special "bison only" feedlot where they are fed a finishing ration for a minimum of 120 days. This ration is approximately 50% barley grain (sometimes oats and wheat may be blended in) and approximately 50% roughage that consists of grass and legumes as well as cereal straw. This high end finishing diet is used to ensure a consistent and high quality carcass. We never use hormones of any kind, nor do we use antibiotics, ionophores or growth promoters in the rations.

All our animals are slaughtered and processed at a federally inspected HACCP-approved facility for uncompromised food safety and product integrity. Every load is tested for O157 H7 and it is our goal to raise bison in a healthy sustainable manner for the well being of both the consumer of the product and the bison under our care.

Mountain Creek Bison is an Alberta family-owned and based company. Our animals are sourced with a team of personally selected ranchers.

We offer a full range of wholesale cuts and trim.

Premium Canadian Bison Meat

Producers and wholesale marketers of premium quality bison meat, Noble Premium Bison are ranch-raised on Canadian grassland without added hormones or antibiotics. We follow restorative ranching practices to improve soil health, conserve biodiversity, and support the bison with minimal intervention. Noble specializes in premium bison products and offer a wide variety of cuts including portion-controlled steaks, ground etc.

Bison meat is part of a culinary revolution, and customers want to know where their meat comes from, how it's raised and handled, and what goes into making it a premium product. Noble is meeting that demand through a commitment to transparency and best practices. Our products are processed at the only single-species SQF-certified plant in North America, ensuring the safety, quality and consistency of every cut of bison we sell.

MEAT CO**

Ethnic Meat Products

Siwin Foods produces a wide range of sausage and marinated meat products and specialties in such products as Philippine Style Tocino and Longanisa.

If your customers are tired of the same boring packaged meats, have them try Siwin. Unlike other meat products, Siwin produces an exciting and unprecedented fusion of Canadian, European and Asian flavours. They are easy to prepare and satisfying as a snack or part of a nutritious meal.

Your customers will get the meaty tastes they crave-with a splash of adventure!

Fresh and Frozen Pork

Sunterra Meats supplies high quality, traceable chilled and frozen pork cut to unique customer specifications.

Sunterra Farms' rigorous health and transportation protocols result in world-class market hogs entering Sunterra Meats. At the plant level, we make a personal commitment to ensure we meet or exceed industry standards at every step in the process right through to the shipping and delivery to our valued customers.

Sunterra Meats' customers are highly discriminating, demanding fresh tasting product that arrives at market in good condition. To meet this challenge, Sunterra uses state-of-the-art vacuum and shrink packaging technology that keeps moisture and oxygen away from the product.

The Sunterra brand is well known in Asia and the plant is working toward having EU approval. The company is relatively small but is currently exporting 70% of its products to the demanding Japanese market for retail and foodservice customers.

Wagyu Beef

Introducing Kobe Classic Beef, producers of the world's most exquisite and tantalizing beef product ever produced. Unlike other beef producers, our beef originates from Japanese Wagyu sires. Kobe Classic is so juicy, velvety smooth and flavorful, it's become the main draw at many establishments in North America.

Wagyu Canada Inc., based out of Alberta, Canada, produces specialty high end branded beef for markets in food service and retail. Our traceability program enables all information on the live animal to be carried directly to the point of consumption.

Wagyu Canada Inc. produces all muscle cuts for steaking and roasting along with a complete line of gourmet ground beef products. They also offer AAA and AA Black Angus beef for private label programs for export markets in Europe and Asia as well as a complete line of Alberta produced grain-fed bison meat.

There are certainly no assembly lines or cookie cutter approaches in the way we supply our products...you tell us what you want and we'll make sure you get it!

Oils, Margarines and Shortening

Bunge Loders Croklaan is Canada's largest processor of oilseeds producing protein meals for the animal feed industry and edible oils used as a food ingredient. Bunge's quality product lines include: shortenings, frying oils, emulsifiers, confectionary fats, salad oils, margarines, specialty baking shortenings and winterized oils, all of which are manufactured in both bulk and packaged forms.

With more than 40 years of experience in the processing of canola oil, Bunge Canada has pioneered its application in the market for food ingredient uses. Our facilities are modern and able to efficiently access the North American market by truck and railcar. In addition, Bunge operates the only terminal in Eastern Canada that can transport grain from the western prairies to overseas markets year-round. Bunge Limited is a leading global agribusiness and food company with 35,000 employees in more than 40 countries. Bunge Loders Croklaan is the:

- world's largest oilseed processor
- world's largest seller of bottled vegetable oil to consumers and a leading supplier of premium edible oils to the United States foodservice industry
- world's largest corn dry miller
- largest exporter of soy products to Asia

Canola Oil and Other Food Oils

Sunora Foods, based in Calgary, Alberta, Canada, has its roots in canola oil. The very name – Sunora – is derived from the sun golden canola flowers that grow in the fields in the shadow of the Canadian Rockies.

Sunora is internationally recognized for its canola oil and related canola products and is a major Canadian exporter of food oil. Although Sunora Foods has its roots in canola oil, many customers turn to Sunora for other food oils and canola margarine. To these customers, Sunora means corn oil or soybean oil or sunflower oil. With its international trading capabilities, the company is often the best and most cost-effective source of corn oil, soybean oil and sunflower oil.

Custom Soups, Sauces, Dips and Fillings

Kitchen Partners Limited is a Canadian-owned company based in Edmonton, Alberta. We are a customer food processor focussed on food service multi-unit customers and Home Meal replacement segment at retail. Our HACCP accredited facility, is federally inspected meat and seafood with USDA eligibility, specializing in frozen stirred food – soups, sauces, dips, fillings and dressings.

Kitchen Partners produces only custom proprietary products (private label and co-packing). We start by understanding the challenges our customers are facing in their business. Challenges like – how to control rising food costs; the ability to consistently deliver the same product day-to-day and place to place; the lack of available in-house expertise and the challenge of innovation and creating the next new “wow” item.

Our run sizes start at 10,000 lbs. with capacity to over 5 million lbs. Our products are packed in pouches ranging from 1 lb to 8lbs and in cases ranging from 6 lbs to 24 lbs.

Let our passionate and dedicated professionals work with your team to create and deliver something truly amazing. We are the kitchen behind your kitchen. We will work tirelessly to be your most trusted partner.

Gourmet Indian and African Foods

Thumbs Up Foods Inc. (est. 1996) manufactures gourmet ethnic East-Indian and East-African style specialty foods for food service and wholesale (under the brand name: Serenna's™).

Family owned and Canadian-based (in Calgary, Alberta), the company prides itself on its authenticity and use of fresh, local ingredients. The family's roots are in East Africa and India, which ultimately inspired the fusion cuisine.

Products are currently supplied to five-star hotels, catering companies, local stores, golf courses and delis across Western Canada.

Products include:

- Samosas - Light and crisp on the outside with the right amount of spice on the inside. The dough is prepared without the addition of oil, reducing the fat content.
- Roti/Chapatti (Flatbreads) - Authentic Indian staple with flavour derived through simple ingredients, making it a great alternative to tortillas or bread. Serenna's™ Chapatti contains no sodium, sugar, or preservatives.
- Pakora (Fritters) - No added gluten, these pakora are a flavourful delight, made with potatoes, carrots, spinach, chickpea flour, and an array of spices.
- Marinades - Tandoori, Tikka, East-African BBQ, or Mishkaki.

Bridging Autosteer Systems

Agra-GPS offers “JD-bridges” that connect John Deere GPS systems to other brand machinery. For farmers who prefer the John Deere GPS interface, they can now easily connect their existing GPS to almost any other brand combine, tractor, or forage harvesters. The customer can expect his John Deere GPS to work the same in his non-John Deere machines as it does in John Deere machines. For combines and harvesters, that even includes yield and moisture data.

To date, Agra-GPS JD-Bridges are available for Amazone, CNH, CAT, Claas, Deutz, Fendt, Gleaner, Horsch, JCB, Krone, Kubota, Massey, Miller, Valtra, & Versatile machinery.

Contact us if you need an interface that connects a JD GPS system to other brand agricultural machinery.

e-Agriculture Digital Integration Services

To be effective in agriculture, a farm must focus its efforts on optimizing production per acre, minimizing operational costs, reducing the risk of crop failure, and selling at the optimal price. This effort requires a high coordination of agriculture inputs, knowledge of the field, while adapting to unpredictable events.

We have developed a comprehensive platform powered by state-of-the-art technologies incorporating Internet of Things, Artificial Intelligence and Data Analytics, providing intelligence to help farmers:

- increase yield and crop quality
- optimize operational costs
- connect to the agriculture supply chain
- enable a sustainable management of natural resources.

Precision Agronomy and Farm Management Solutions

With the agricultural technologies available today, farmers have more access to data than ever before. The challenge is collecting, managing and processing the data into insights that work for them.

Decisive Farming was founded in 2011 with the purpose of synchronizing the overwhelming number of data sets that farmers typically manage. Combining boots-on-the-ground support, precision agronomics, including variable rate technology, information management services and crop marketing tools, Decisive Farming provides a single integrated platform, **My Farm Manager®** that acts as the farmer's primary operating system. It currently represents over five million acres and is being used on 40 different crop types in North America.

Decisive Farming was acquired by TELUS, a world-leading communications and information technology company. The acquisition provides Decisive Farming the support of a global leader in communications and digital technologies, enabling the company to grow in key markets and to accelerate the development of its integrated farm management solutions.

Livestock Operated Watering System

The Frostfree Nosepump is a year-round, livestock operated watering system. It relies on an insulated, vertical wet well excavated into the ground that provides a collection point for water from the source, and allows geothermal heat to rise from the bottom of the wet well to the top to maintain a moderate climate inside the wet well during periods of freezing climate.

The Frostfree Nosepump operates a 3" piston pump which draws water vertically out of the wet well at a rate of ½ Liter per manual stroke of the pendulum.

Forage Processing Equipment

Hunterwood Technologies designs, fabricates, and manufactures equipment to compress baled and loose hay into mid-to-high density bales. Hunterwood hay presses consume two-tie bales, three-tie bales, large square bales (3'x3', 3'x4', and 4'x4'), round bales, and loose hay from the field or from industrial dryers to produce 30 kg half-cuts up to 450 kg big bales. Our full range of forage processing products ensure greater domestic & global transport efficiency for your top-quality forages.

Our quality-built hay presses will support you in being a dominant player in the forage processing market for years to come. Reliability, customer focus, international presence, and continued product development guide our commitment to our current and future customers.

Kwik Bandit Utility/Garden Tie

Our company, Kwik Bandit Inc., provides a solution to quickly and safely bundle and secure items. Our revolutionary banding product is durable, reusable, safe and versatile. It is a cost effective replacement to bungee cords, tie downs, straps and twine. Perfect for securing equipment/material, bundling cables/cords, and general use around the farmyard. With an easy stretch, wrap and lock system it makes it simple for anyone to use.

Kwik Bandit has been adopted by users in agriculture/horticultural/farming, trucking, heavy industry, households, marine and commercial companies. Kwik Bandit technology was researched and developed in Canada to withstand the harshest climates and environmental conditions. We make a longer lasting, more adaptable fastening system.

Our product line includes:

1. The 10 - 8" Kwik Bandit (10 lb. tensile strength – 8 inches in length) which is the smallest version of our product line; compact, easy to store and perfect for quick, small jobs.
2. The 50 - 14" Kwik Bandit (50 lb. tensile strength – 14 inches in length), a mid-sized binding tool that is perfect for securing transport loads or being combined to hold larger objects.
3. The 75 - 24" Kwik Bandit (75 lb. tensile strength – 24 inch in length) is the strongest version of our line and has become popular in agriculture, heavy industry and construction.

Regenerative Food Production

Livestock Water Recycling is a technology company that creates value for food producers by reducing the expense and impact of waste liquids. This patented, award-winning system transforms manure/food waste digestate into two distinct fertilizers and clean water. Producers can grow more crops and produce more food using less money and resources.

System automation and digitized outputs gives access to greenhouse gas funding, carbon credits, and the revenue benefits derived from engaging in the circular economy.

Alfalfa, Timothy, Mixed Hay Grain and Dehy Silage in Containers

Barr-Ag Ltd. is Canada's leading exporter of timothy hay, non-gmo alfalfa hay, mixed hay, straw and dehydrated silage products along with peas, feed barley and feed wheat.

Barr-Ag Ltd produces over 75% of what we process with the balance coming from local farmers with whom they have established long-standing relations. This gives Barr-Ag Ltd. the excellent position to control the quality from the seeding to processing and, as such, have more ability to achieve a higher quality control of the products they produce, process and export.

Barr-Ag Ltd has two facilities in Alberta positioned close to the eastern slopes of the Canadian Rocky Mountains. This allows them to grow, compress, and containerize hay and other forage for dairy and beef operations and horse owners around the world. They offer the following packaging options for their compressed hay: 60 kg full bales, 30 kg half-cut bales and 420 and 800 kg big bales in sleeves kg big bales in sleeves. Barr-Ag Ltd. also offers products in sun-cured and heat-treated formats.

Barr Ag Ltd can make custom blended mixes to the end user's requirements and needs.

Barr-Ag Ltd. is an experienced, innovative company that offers flexible shipping options and they can take care of the necessary customs documents in an effective and efficient manner.

Dryland Timothy and Oaten Hay

For over 25 years, Dalziel Enterprises has been a Canadian industry pioneer in supplying Asian and US markets with high quality long fiber sources. Our two processing facilities in Central Alberta are adjacent to producers of dryland timothy and mixed hays.

We specialize in double compressed dryland timothy hay. Producers of dryland hay utilize lower impact methods of farming which do not rely on the addition of the same fertilizers and chemicals used in irrigated hay. This provides a more natural, environmentally sustainable, low nitrate, low potassium product for maximum palatability.

Dalziel Enterprises has drying and compressing capabilities at both facilities. We produce 42 kg "Mini-Bales" and 27 kg "Half-Cut" bales. Both products are available in bulk or in stretch wrapped packages.

Starting in 2017, Dalziel has been providing Canadian Dryland Oaten Hay to markets with great success. Dryland Oaten hay grown in Central Alberta has extremely high Water-Soluble Carbohydrate levels and low nitrate levels which make another extremely palatable feed source.

Dalziel Enterprises Ltd.

Currently exporting to: Japan, Korea, United States

Planning to export to: Middle East, China

Horse Hay

First formulated forage feed ration in bale on the market. Engineered with the horse and their handlers in mind.

Bale size and weight has been designed to transport efficiency and handling ease.

Process removes dust and pollen to protect the equine respiratory system. This also reduces ambient dust in enclosed spaces for a better barn environment. This Canadian Food Inspection Agency inspected facility also removes contamination incorporated during harvest. Stones, metal, rodents, bones and wood contamination is removed. Bales are individually weighed, and passed through a moisture and metal scanners.

Bales are stacked in blocks of 64 and fit on a conventional pallet. They can be loaded and unloaded from a steel shipping container carrying maximum allowed weight (1,280 bales per container).

We only use the best forages available on the Canadian Prairies.

Looking for customers globally.

Timothy Hay

Supplying top quality Timothy Hay as an optimal fiber source specializing in the dairy industry. Timothy hay can serve as a complete feed or part of the ration for many ruminant applications including;

- Horse
- Calf Weaning
- Dry and Transition Dairy Cows
- Lactating Dairy Cows
- Heifers

Timothy hay is highly digestible, high in fiber, and low in potassium and nitrates.

We can offer double compressed mini-bale in bulk and stretch-wrapped style packaging. We are able to maximize ocean sea containers with 25,500 kg per container.

Our two Alberta forage processing facilities are HACCP certified and we operate under current Canadian Food Inspection Agency standards and protocols. Our Timothy Hay is Non-GMO and often receives no herbicide or pesticide applications making it a very palatable, safe and natural type of forage feed.

Please let us know how we can serve your forage demands with our Canadian Timothy Hay!

Livestock Genetics - Porcine Germplasm

Live breeding pigs and fresh or frozen boar semen exported from herds and boar studs across Canada provide high quality performance from pigs tested in the Canadian Centre for Swine Improvement.

Improved genetics can be supported by AI equipment and supplies, barn equipment and supplies in developing pig breeding operations.

Management expertise and web-based record-keeping ensure that the imported breeding program can be maintained and enhanced in any country. Seminars, on-farm demonstrations and written reports provide help with managing the breeding herds.

On-Farm Skills Training programs for barn workers can be offered either as classroom learning or hands-on in-barn training for new swine technicians.

Elite Canadian Livestock Genetics

Wild Rose Global Exports Ltd. was established in 2016 and focuses on exporting Canadian livestock genetics and technologies. Wild Rose supports their clients around the world with a wide range of expertise. This includes expert advice for the development of farms, the sourcing, selection and transport of cattle, embryos, equipment and technology transfer. We offer follow up support for nutrition, herd health, reproduction management and the best practices farm management.

Kate Kolstad, President, has more than 30 years of experience exporting livestock, embryos, semen and related production technology around the world. Her passion for the cattle industry is rooted in her childhood, having grown up on a 12,000 acre (4850 ha) beef cattle ranch in southern Alberta, Canada.

Kate co-founded Alta Exports International Ltd. (AEI) in 2000 with the company's focus on exporting quality Canadian beef and dairy genetics. During the next 16 years AEI exported more than 20,000 head of live cattle and over 10,000 embryos to Russia, Kazakhstan, China, Mexico, the United States and Colombia.

Increase Microbial Populations in Soil

Minimum 80% Humic Acid Content

Accelerate Crop Residue Breakdown

Reduce Soil Erosion

Improve Soil Aeration

Assist with pH balancing

Increase Water Retention

Enhance Germination and Emergence

Increase Root Count and Root Size

Enhance Nutrient Uptake and Availability

Humic Substances Products – derived from Humalite

Black Earth manufactures the highest quality humic substances in the market. Adding humic products to your application program can help you increase your yields; develop nutrient-rich, sustainable soils - resulting in stronger, healthier plants.

We offer a wide range of products for a variety of industries.: agriculture, aquaculture, animal nutrition and downhole drilling. We work with our partners to produce dry, liquid, soluble and custom formulas.
