Welcome

International Buyers

This catalogue features agriculture products and services that Alberta exports internationally. This catalogue was designed specifically for importers, distributors and buyers located outside of Canada.

The province of Alberta, Canada, is proud of its agriculture and food growers, producers, processors and marketers, and assists these companies in promoting their products and services to the world.

Alberta has built an international reputation as a reliable source of agricultural technology, expertise and food. With over 20 million hectares (50 million acres of total farmland area) used for crop and livestock production, Alberta produces an abundant supply of agricultural commodities available for export and as ingredients for processed products. Alberta's agriculture equipment manufacturers, input suppliers, consultants and researchers have developed a reputation as innovative and knowledgeable product and service providers to the global marketplace.

This catalogue supports linking Alberta product and service suppliers to potential buyers.

We hope you will also visit our beautiful province to conduct business, as well as enjoy the scenery, culture and cuisine.

An online version of this catalogue is available at:

Website: www.agrifoodalberta.ca

Alberta, Canada

The province of Alberta is located in western Canada and is renowned for the natural beauty of its varied landscape which includes mountains, glaciers, foothills, lakes, rivers, forests, badlands, wetlands and open plains.

Alberta's success lies in the diversity of its people. Alberta has a mix of cultures from both the multinational settlers that came to this country and indigenous people who possess diverse and rich heritage, cultures and languages.

Our society is guided by shared values and linked by a deep respect and appreciation for multiculturalism and the value of hard work. English is our most common language, but with Alberta's cultural diversity, dozens of languages are spoken here.

Alberta's Agriculture Sector – A Global Exporter

Our agriculture sector is vast and export-oriented. In 2018, Alberta exported C\$11.6 billion worth of agri-food products to international markets.

Alberta is the largest cattle-producing province in Canada with nearly 4.6 million head on farms or 41 per cent of the national total, as of January 1, 2019. The province is also a significant hog producer in Canada with 1.5 million head on farms, as of January 1, 2019.

Alberta enjoys a global reputation for safe, high-quality agriculture and agri-food products. The reputation stems from its thorough meat inspection and licensing programs, animal tracking systems, accurate and consistent grading systems for grains and oilseeds, and various food safety initiatives for producers, processors, and consumers. These measures ensure the safety and quality of Alberta's agriculture and agri-food products.

Connecting buyers and suppliers

Alberta Agriculture and Forestry provides information and assistance to international buyers and investors in supporting our thriving agriculture and agri-food industries. We support industry by connecting buyers and sellers, while providing information on Alberta's supplier capabilities.

Alberta also maintains a network of international offices that provide on-the-ground representation in many markets.

Visitors come to Alberta for business, pleasure or a combination of both. You can shop in the largest shopping mall in North America, hike where the dinosaurs once roamed, ski in the Rocky Mountains and experience life in the past at heritage sites and explore our modern urban centres.

We invite you to experience all that Alberta has to offer!

Flat Breads, Naan Breads, Tortillas, Bagels, Baklava

Byblos Bakery is one of the largest suppliers of pita in Western Canada with distribution throughout major grocery retailers. We ship pita throughout Western Canada as well as into the United States. Byblos Bakery Ltd. is your one stop shop for pita bread, bagels and tortillas for anywhere in the world. Byblos Bakery has a certified Food Safety Program under the supervision of our own certified Quality Assurance Manager.

We are able to ship you our Byblos Brand baked goods or supply you with a high quality product to fit your Private Label Program. We can ship your pita frozen to you for a cost effective thaw and sell program and allow you to manage your pita category more efficiently.

Artisan Specialty Breads and Pizza Crusts

Founded in 1989, Crust Craft is a high-capacity bakery serving retail and food service clients across Canada and the United States.

We combine the state-of-the-art technology with time-honoured artisanal baking techniques. The results are consistent, top-quality, and cost-effective products. We produce hand-stretched par-baked pizza crusts, fully baked naan and flatbreads as well as customized raw dough items designed for further processing in in-store bakeries.

Our research and development team specializes in listening to your ideas and creating innovative solutions and will work with you to perfect your product. From our facility to your shelf or menu, we'll deliver a product your customers will love! Your success is our success!

Crust Craft maintains a HACCP-compliant facility and achieved an "AA" rating on our recent British Retail Consortium (BRC) audit, one of the most stringent food safety standards in the world.

We built our reputation as an industry leader on a foundation of satisfied clients. When you work with Crust Craft, you get more than a supplier—you get a partner!

Asian Bakery Products

Golden Happiness Bakery is a family-owned and operated business that was founded in 1987. Originally, Golden Happiness started as a retail bakery in the heart of Calgary's Chinatown. Today, Golden Happiness is a manufacturer of a range of frozen Asian and Western food products. Their products are supplied to many grocery chains and food service establishments across Canada and the United States.

Golden Happiness offers a variety of frozen products including baked buns, steamed buns, spring rolls, dumplings, croquettes and their well-known Chinese long donut. The Chinese long donut is a versatile product consumed by many Asian communities world-wide. Golden Happiness has developed this product to be consumed as convenience food that is easily reheated while still maintaining the taste and texture of freshness.

Golden Happiness Bakery takes pride in their product quality and has achieved the Good Manufacturing Practice Certification (GMP). The company believes that high quality inputs is the first step to creating a high quality product.

Gluten Free Baked Goods

Based in Edmonton, Canada, Kinnikinnick Foods is North America's leading source of delicious gluten-free baked goods. Their products are not only gluten-free but also free from dairy, tree nuts, peanuts and soy. The range of products include a variety of breads, buns, bagels, donuts, muffins, waffles, pizza crusts, pie crusts, cookies, crumbs and baking mixes. All Kinnikinnick products are certified Kosher OU.

Their products are sold in retail ready packaging as well as select products in bulk foodservice for industrial use. They uphold the strictest allergen standards in the industry, with an in-house laboratory that tests the purity of all incoming ingredients and final products. The plant is BRC and gluten-free certified ensuring the safest products for all their customers.

As a family business, Kinnikinnick continues to focus on providing the highest quality, innovative and broadest selection of free from/allergy friendly products. Try our products and find out why we say the best things in life are free from.

Handcrafted Aromatic Bitters

Token Bitters makes handcrafted artisanal aromatic bitters, inspired by and made in the city we call home: Edmonton, Alberta, Canada.

Bitters are a potent flavouring agent made of concentrated botanicals such as aromatic herbs and fruits. Bitters are predominantly used as an additive to cocktails and can also be used to add flavor to non-alcoholic beverages, coffees, baked goods and more.

Token Bitters uses organic ingredients sourced from local farmers and businesses whenever possible. While sometimes we look outside the province for fruits that won't grow in the North, most of our bitters are made with plants grown fresh in Alberta under some of the highest standards in the world. The bitters are hand-made and bottled without chemicals or artificial preservatives.

Token Bitters come in 120 ml bottles and are offered in eight flavours (and counting!). Our box set contains four flavours in smaller 15 ml bottles, for convenience.

Sold direct to consumer or at food & beverage service establishments. No minimum/maximum order volume. Opportunities for white-labeling and unique SKUs.

Natural and Organic Barley Products

Progressive Foods has a unique process to cook barley efficiently without losing its nutritional values. Our passion to create a tasty and healthy product has inspired us to make a natural and organic barley from locally grown hullless barley.

SNAPPY Grains™ is a Progressive Foods' brand with two product lines: Natural Barley in A Snap and Organic Barley in A Snap. SNAPPY Grains™ barley is an excellent source of protein, fibre and cholesterol lowering soluble fibre- beta glucan. As well, our barley contains a high per cent of resistant starch that is unique to SNAPPY Grains™. The many health benefits make barley a versatile grain and a great alternative to rice and starch rich foods.

Progressive Foods offers high quality products that can improve your health. We have put in the effort to prepare our barley to a state that provides convenience and simplicity in use. Snappy Grains™ barley only takes ten minutes to cook unlike other barley products and be served in many different ways. Check us out online for delicious recipe ideas.

Make Snappy Grains™ a part of your breakfast, lunch, dinner or dessert ... in a snap. Natural, organic, delicious!

Wasabi Powder and De-oiled Mustard Powder

Sakai Spice produces wasabi powders and low oil mustard powders. They have a patented process that removes the oil from the mustard seed enhancing taste and pungency. The process ensures a longer shelf life and a more concentrated product, which provides a substantial cost savings.

Sakai Spice's in-house research and development lab enables them to work with customers in the development of new mustard flours and wasabi powders.

Sakai Spice Offers wasabi in standard 1kg bags as well as 20kg poly bags.

The size of bag is flexible depending on customer's preference.

Sakai Spice offers mustard powder, cake, and bran in both oriental and yellow as well as blends. All mustard powders are packaged in 20kg paper bags. Bran and cake can be packaged in either 20 kg paper bags or 1MT bulk bags.

Both mustard and wasabi powders are kosher and halal certified.

Hemp, Pulses and Oilseeds

Arjazon Seed Trading Ltd. was established as a sister company of a Netherlands-based exporting company with the same name. Arjazon has achieved significant growth in the past years and has opened a new cleaning and bagging facility near Fort Macleod, Alberta in 2017.

The main product that is handled by Arjazon is industrial hemp. Hemp is available for the food market as raw grain or in a dehulled form. Arjazon also processes hemp for birdseed and for other feed purposes.

Other commodities available for export are pulses and oilseeds, including lentils, peas and flaxseed.

Arjazon has the ability to ship product in bulk or in bag sizes varying from 15kg bags to 1500kg bulk bags.

Arjazon is certified for organic processing and trading.

Certified Organic Grains, Pulses, Oilseeds and Flour

Grainworks is a unique family farming operation, established in 1912. We received our first organic certification in the late 1980s. Our specialty is producing and distributing high quality certified organic cereal grains, pulses, and oilseeds, including hard red spring wheat, durum wheat, rye, brown flax, green lentils and red lentils. From these high-quality grains, pulses and seeds, we mill a large variety of specialty flours. Organic integrity is guaranteed with our exclusively organic farming methods and certified cleaning, processing and shipping facility.

Certified COR (Canadian Organic Regime) and JAS (Japanese Agriculture Standard).
Kosher certified.

Grains, Oilseeds & Pulses

Providence Grain Group Inc. was established in 2002. Operating as Providence Grain Solutions, we are one of the few producer owned grain businesses in Canada.

Providence Grain Solutions is a global trading company providing care and attention to the quality of products we sell. We can offer flexible quantities and smaller shipments for various products. As the sole proprietor of Columbia Containers (CCL), we are positioned to sell container sized quantities and deliver on a global basis. Our priority is quality over volume; we select post-harvest, providing a superior end product to international buyers.

Wheat, canola, flax, oats, peas, lentils, malt barley, feed barley, and organics are the products we offer.

Our shareholders are producers. This provides a solid foundation for the farmers who trust our expertise and rely on the solutions we provide at the field level, and for our buyers who are confident in our products and the service we provide. Locally Grown - Globally Connected.

Conventional and Organic Oat Products

Richardson Food & Ingredients is the world's largest oat miller. Our five oat processing mills in North America and the United Kingdom combine to offer a large variety of conventional and organic oat products. We exceed our customer's expectations through quality, service, value, and innovation.

Our whole grain flakes include large rolled oats, and quick or instant cooking oat flakes packaged in bags and super sacs. Whole oat flour, oat bran, steel cut, and whole oat groats are available in bags, super sacs, bulk trucks, or rail. Our products can be used in a range of products including hot and cold cereals, granola bars, cookies, breads, and beverages. All organic products are supplied by our mill in Barrhead, Alberta.

Richardson Food & Ingredients is a division of Richardson International, Canada's largest agribusiness. Richardson is involved in every aspect of the food and agriculture cycle. Our extensive grain networks enable us to source our raw material directly from the grower, which builds a strong connection from the farm to your table.

Seed and Feed Grains

Stony Plain Seed Cleaning provides customers with guaranteed top quality seed and feed grains and ships them either bagged or bulk via truck, rail or ocean containers.

They are capable of cleaning cereals, pulses and specialty crops with storage capacity of approximately 1,600 metric tonnes of grain.

Their robotic bagging system and bulk handling equipment enables them to efficiently package & load both containers and trucks. They also have the ability to load rail-cars at a secondary facility north of our plant.

Stony Plain Seed Cleaning markets and exports crops such as oats, barley, wheat, flax, rye, peas and other specialty grains. They also supply the horse racing industry with top quality oats at competitive pricing. Whether it is bin-run feed oats or high quality triple cleaned pony oats, they can make a product unique to a customer's needs.

Grains and Pulses

W.A. Grain & Pulse Solutions (W.A. Grain) is an Alberta-based company whose primary business is cleaning pulses for export. We also ship all grains and oilseeds for both export and domestic markets and have the capability to clean all products to buyers' specifications.

These products include but are not limited to:

- Pulses – green peas, yellow peas, green and red lentils and fababeans
- Grains – wheat (all types), barley (feed & malt), oats and rye
- Oilseeds – canola and flaxseed
- Ground or cracked (any commodity)

W.A. Grain ships from ten locations throughout Alberta. W.A. Grain also has three owned locations in Saskatchewan, three in Alberta and one in Prince Edward Island. Currently we ship 200,000 MT of pulses and 120,000 MT of grains and oilseeds annually. In the near future, more bagging lines will be added to be able to supply more of our customers' needs in the future. Pulse splitting and cereal de-hulling are soon to be added.

Sulforaphane Skin Care, Supplements & Food

Newco Natural Technology is revolutionizing products using broccoli's most powerful antioxidant, sulforaphane. Over 2 decades dedicated to creating effective natural products.

BroccoFusion[®] Ointment was featured on the Oprah Winfrey Network, in May 2012. This multi-purpose ointment can be used for treating skin conditions from hyperpigmentation to burns and wounds.

BroccoFusion[®] Lotion is a moisturizer that protects against the drying effects of the sun and abuse of the elements, hides acne and skin blotches, smoothes wrinkles and brightens the skin.

BroccoGen 10[®] Capsules are potent sulforaphane antioxidant supplements containing 3-day new broccoli sprout concentrate, carefully extracted without the use of heat or harsh chemicals.

BrainMaintain+[™] Capsules are a source of antioxidants to enhance cognitive function and performance. Ingredients include sulforaphane, curcumin, resveratrol, alpha lipoic acid, ginkgo biloba, and yerba mate.

Brocco-Chocco[®] Chocolate Bars are the world's healthiest chocolate. Made in collaboration with a master chocolatier, each fair trade bar is made of 75% dark chocolate, contains 2-4 lbs. of broccoli sprouts and pink Himalayan salt.

Headquartered in Calgary, Alberta, Newco continues to create leading-edge products.

Deer Products – Velvet Antler and Tendons

Velvet antler, together with ginseng and donkey hide gelatin are recognized as three premium treasures in Chinese traditional medicines. It has been used in oriental countries for centuries, mostly as tonic and a remedy for male impotence and female infertility, anemia, arthritis, insomnia, amnesia, etc.

Parkland Processing Inc. has been processing and exporting velvet antler since 1985. Currently, we process and export about 80% of *Cervus elaphus* velvet antlers harvested from stags (mostly less than 6 years of age) raised in registered Canadian and U.S. deer farms. The quantity and a variety of natural feedings, plus plenty of sunlight in the season when antler grows make the quality of our antlers top in the world.

Our state-of-the-art facility is located in Calgary, Alberta. It is registered by the Canadian Food Inspection Agency and the U.S. Food and Drug Administration. We adapt a nature-like processing mechanism that includes freeze-drying and vacuum deep drying to maximize the preservation of the bioactive potential of velvet antler. No chemicals other than potable spirit is used for processing. No preservatives are used.

Fresh Clean Crisp Canned Air

Vitality Air is committed to delivering the best air possible...

Remember the day when people laughed off bottled water? *"It comes out of the tap, why would I want a bottle?"*

The truth is we've begun to appreciate the clean, pure and refreshing taste of quality water. Air is going the same way.

We're discovering that our senses can tell the difference between poor air and quality breathing.

Just like bottled water, premium air is a growing industry because people are noticing the difference. Now with Vitality Air, anyone can access this high quality, convenient and affordable luxury experience. Minimum Volume: 2,800 bottles – approximately two pallets.

100% Pure Natural Canadian Honey

Bee Maid Honey is a 100 per cent pure Canadian tradition, delivering only the highest quality honey to consumers since the early 1950's.

What makes our highly recognizable brand truly unique is that there are two cooperatives behind it – the Alberta Honey Producers Cooperative and the Manitoba Cooperative Honey Producers. A small group of Western Canadian beekeepers in the provinces of Alberta, Manitoba, and Saskatchewan that shared a vision to sell their quality Canadian honey around the world, combined their resources and expertise to create Bee Maid Honey Limited. Recognized worldwide for our premium quality and exquisite flavour, Bee Maid Honey Limited exports to more than 25 countries.

The honey's delicate flavour is the result of the natural variances of flowering crops and meadows in Western Canada. Our creamed honey is produced by adding crystallized honey to liquefied raw honey and mixing it until the honey has a smooth, creamed texture.

Bee Maid honey offers a wide variety of shapes and sizes of PETE bottles using our in-house blow moulding facility. Our food safety program is always top-of-mind: packing plants are HACCP recognized and we are the first Canadian honey packer to achieve the Safe Quality Food designation. All our products are kosher certified. In addition, Bee Maid Honey is True Source Certified™, which means all our honey is ethically and transparently sourced. The ownership structure has also allowed Bee Maid Honey to implement measures that provide traceability from hive to bottle.

Canadian Honey

Golden Acres Honey/McKenzie Country Farm Honey has gained a reputation for producing some of Canada's finest honey. Our natural and healthy products combined with personal, friendly service and integrity ensure customer satisfaction, which is key to our continued success.

Our honey is a product of both the beautiful and natural environment where it's cultivated, and the caring and conscientious Three Hills, Alberta workers. However, at the foundation of our quality honey are the bees that roam the Albertan wildflowers to produce it.

Golden Acres Honey was started in the mid 1980's and continues to be a family-run operation. McKenzie's Country Farm Honey was purchased in 2001.

In addition to our own brands we also offer private labelling services. Our pack sizes range from 150-gram glass jars to 1440 kilogram totes.

Certifications include: HACCP, Kosher, Pro-Cert, SQF.

Organic Honey, Beeswax & Bee Pollen

Good Morning Honey Ltd. produces 100% Canadian honey. Our protocols ensure the safest, most pure honey is gently removed from the beehives by hand then harvested and packaged in our extraction facility. The honey is not pasteurized, letting it remain in its raw, natural form - just as the bees made it.

Our record keeping provides traceability of the honey from the hive to you. Good Morning Honey is available in new drums (approximately 290kg each) as well as prepackaged in smaller containers.

Our apiaries cover a diverse area of natural prairie land and farms near Edmonton, Alberta. Our family-owned company is proud to produce some of the world's finest raw and organic honey enjoyed by many across North America, as well as Asia and Europe. Our honey is prized for its colour, silky smooth texture and delicious taste. The northern Canadian climate and long summer days offer the bees the chance to forage on a wide variety of wild flowers along with clover, alfalfa and canola. Good Morning Honey is registered with the Canadian Food Inspection Agency.

Pure Raw Canadian Honey

At the Greidanus Honey Mill we produce our unprocessed honey to be as pure as nature intended. Without blending or pasteurizing our honey, we have maintained all the naturally occurring nutrients to ensure you are receiving nature's healthiest sweetener. We collect all our honey in hives located in the clover-rich prairies of Southern Alberta, known to produce some of the world's finest honey.

We are a CFIA registered and inspected farm. We are True Source Certified, which means all our honey is ethically and transparently sourced.

Our honey is packed in new food grade drums.

Our family farm is a second generation farm that has been operating since 1973.

Pure Raw White Canadian Honey

When you purchase Paradis Honey, you are purchasing over 350 years of family bee-keeping history from France to Canada. Their forefathers had their beginning in France and sailed to Canada in 1658, landing in Quebec City. Today, Mike, Lise and their children are proud to continue this long family tradition of beekeeping and honey production.

Their family name means Paradis and that is exactly what you receive when purchasing Paradis Honey. The absolute best 100% Pure Raw White Canadian Honey, sourced from Canadian Clover, alfalfa and wildflowers from the fields of the beautiful Peace River region of Northwestern Alberta, Canada.

With their custom manufactured state of the art equipment, they carefully remove the honey from the hives/combs in their CFIA approved and True Source Certified facility. The honey is placed in new steel drums for storage or packaged into premium retail packaging.

Please contact us for all of your domestic and international requirements.

Organic Honey

Our family-run apiary in Guy, Alberta has been producing pure, organic honey for over 25 years. As leaders in sustainable beekeeping, Peace River Organic Honey is proud to offer the only honey certified as both organic and non-GMO. Our entire process, from hive to honey jar, is free from chemicals, pesticides and antibiotics.

As a True Source certified apiary, we can trace every delectable drop of our honey to the pristine Peace River region we call home. The area's cool climate and abundant fields of red clover and wild alfalfa create a honey that's delicately sweet and distinctively light in colour. Our honey is creamed rather than heat treated to preserve its subtle flavour notes and natural nutrients and vitamins.

Our 40,000 square foot processing facility is HACCP recognized with full production, packaging and distribution capabilities. We offer retail (500 gram jar) and bulk sales, bulk packaging and private label opportunities. We are Canadian Food Inspection Agency (CFIA) and Safe Quality Food (SQF) certified, ensuring the highest standards of food quality and safety. In addition to our organic and non-GMO designations, Peace River Organic Honey is also Kosher certified.

Peace River Organic Honey is our family's labour of love and we are thrilled to share it with pure-food enthusiasts around the world.

Pure Canadian Honey and Honeycomb

Beekeeping has been in the family for generations, in fact all the way back to 1936 when family members moved to Falher. While our ambition was modest – to bring pure, all-natural honey to our family's table – it only took a taste for us to know it deserved to be shared.

The meticulous methods we use to create our pure, all-natural honey are what distinguishes Wolfe's from the swarm. To make honey that soothes the soul and energizes the body, we rely on the skill and dedication of our hardworking, family-run team and time-honoured processes.

Nature's liquid fruit. At Wolfe's, it's been our passion for over 75 years and we're honoured to share it with you. So get your buzz on! Treat yourself to a taste of Wolfe's Honey today, and celebrate the sweet life.

We are the only packer in Canada of Pure Honeycomb rounds. Packing: 28g to 1kg bottles and able to pack 2.5kg pails to 7kg pails. Available for co-packing, private label and our brand.

Canadian-grown Rhodiola Rosea

The Alberta Rhodiola Rosea Growers Organization (ARRGO) is a cooperative of member farmers across Alberta who commercially cultivate and process Rhodiola rosea. ARRGO provides an alternative to wildcrafting of the world's dwindling native supply. We offer fully traceable and sustainably grown Rhodiola rosea as a premium washed, chipped and dried bulk product. ARRGO has the world's largest supply of cultivated Rhodiola rosea.

ARRGO grows both certified organic and conventionally-grown Rhodiola roots. Our roots are free of adulterants and contaminants. They are processed at our facility in Thorsby, Alberta, and shipped worldwide.

ARRGO's processing facility is Certified-Organic, GACP (Good Agricultural Collection Practices) and GMP-audited (Good Manufacturing Practice). All ARRGO members must maintain a current GACP certificate. Over 100 Alberta member farming families currently grow this amazing root.

Alberta boasts a climate similar to Siberia and the Altai Mountains, where Rhodiola rosea grows naturally. Our members are proud to be providing this high quality and pure raw form of nature's remedy for stress and cognitive health since 2006.

Elk Meat and Elk Products

Alberta Wapiti Products Co-op (AWAPCO) is a large volume wholesale supplier of ranch raised elk meat and elk products. We are proud to offer light, lean, and tender premium quality elk meat both fresh and frozen. Our elk are raised in a natural environment, with grazing and feeding on clean and spacious pasture. We also offer elk antler.

All AWAPCO elk are raised on farms monitored by Canada Food Inspection Agency, with disease surveillance in place. Our elk are processed at a federally and EU-inspected and approved processing facility with pasture to plate traceability.

AWAPCO is a new generation cooperative located in Alberta, Canada. Our company is owned and managed by our members (currently 144). AWAPCO has been in the business of marketing and selling ranch raised elk meat and elk products since June 2001.

AWAPCO has worked hard to build and maintain our reputation as a dependable and trusted supplier of premium quality elk meat in Europe, the United States, and Canada. AWAPCO is also working on expansion in both southern and eastern United States.

Bragging Rights:

- 100% Canadian Beef.
- Prohibited from receiving antibiotics of any kind.
- No added hormones or steroids.
- Sustainable program from conception to consumption.
- Traceable back to their farm of origin.
- Raised in Canada, from birth to finish.
- Vegetarian Feed.
- Humanely Raised.

Heritage Angus Beef sets the highest of standards by paying close attention to animal welfare, food safety, traceability, environmental stewardship and rural Canadian values. Heritage Angus Beef is produced from handpicked cattle that graze on the finest grasses and fodders on select feeds. With a passion for agriculture that comes from Canadian Ranching families, Heritage Angus Beef is made from ranch-raised beef that exceeds expectations in its flavour, tenderness and quality.

Simply stated, Heritage Angus Beef is antibiotic and hormone free beef at its very finest, just as nature intended with quality assurance that is backed by the national Canadian Angus Rancher Endorsed Program as well as the Verified Beef Producers of Canada.

Bison Meat

Mountain Creek Bison herds are raised in as natural state as possible.

Yearling bison are sent to a special “bison only” feedlot where they are fed a finishing ration for a minimum of 120 days. This ration is approximately 50% barley grain (sometimes oats and wheat may be blended in) and approximately 50% roughage that consists of grass and legumes as well as cereal straw. This high end finishing diet is used to ensure a consistent and high quality carcass. We never use hormones of any kind, nor do we use antibiotics, ionophores or growth promoters in the rations.

All our animals are slaughtered and processed at a federally inspected HACCP-approved facility for uncompromised food safety and product integrity. Every load is tested for 0157 H7 and it is our goal to raise bison in a healthy sustainable manner for the well being of both the consumer of the product and the bison under our care.

Mountain Creek Bison is an Alberta family-owned and based company. Our animals are sourced with a team of personally selected ranchers.

We offer a full range of wholesale cuts and trim.

Pure Canadian Bison Meat

MEET NOBLE

WHAT'S IN A NAME?

IN OUR CASE, EVERYTHING.

Noble Premium Bison was born out of years of commitment by industry leaders, to provide pure food value to clients. At the heart of the brand lies a dedication to our animals, the environment, and our customers. With a targeted focus on export markets, Noble Premium Bison lives up to its name by consistently delivering outstanding product and excellent service.

FOREFRONT OF A CULINARY REVOLUTION

Sustainably raised bison has become part of a culinary revolution. Consistently meeting demand with supply requires not only rigorous standards and processes, but also the experience to execute them. At Noble Premium Bison we deliver on both.

Our customers, and yours, have a right to know everything about our bison—where it comes from, how it's raised and handled, and what goes into making it a premium product. We've worked hard to develop the very best practices that ensure the safety and quality of our products.

Ethnic Meat Products

Siwin products range from delectable ring sausage, Asian styled sausage, cocktail sausage, and exclusive specialties like our variety of Philippine Style Tosino and Longanisa. Every Siwin product is a little different from what you might expect—and all are consistently highly favoured in our consumer taste tests.

If your customers are tired of the same boring packaged meats they've always eaten, have them try Siwin. Unlike other meat products, Siwin foods are an exciting and unprecedented fusion of Canadian, European and Asian flavours in quality ready-to-eat meats. We take our time preparing our products, slowly marinating then seasoning and cooking with care.

The Siwin name is your assurance of fresh, flavourful and unique food. Siwin products are satisfying as a snack or as part of a complete nutritious meal.

Your customers will get the meaty tastes they crave—with a splash of adventure!

Premium Grain-Finished Lamb

SunGold Specialty Meats Ltd., a subsidiary of the newly merged entity, North American Lamb Company Ltd. (NALC), is designed to form a truly Canadian integrated lamb supply chain to provide premium lamb products to domestic and international markets with year-round consistent supply and specification.

Operating since 1974, SunGold Specialty Meats Ltd. is the largest federally-approved processor of lamb in Canada. Registered as Est. 136 by CFIA, SunGold exports to a variety of international markets. SunGold operates with Halal Certification since 2006.

SunGold Premium Lamb is produced in a large variety of cuts, trims and ground with value added LambTonight options that appeal to both the retail and food service sectors and further processors. The company also offers a full line of offal products.

SunGold lamb is grain-finished for a minimum of 45 days. It has a slightly milder taste and a higher meat to bone ratio which provides exceptional value for either the retail or food service customer. SunGold products are packaged with state-of-the-art processing and packaging equipment to maximize product quality and consistency.

Fresh and Frozen Pork

Sunterra Meats supplies high quality, traceable chilled and frozen pork cut to unique customer specifications.

Sunterra Farms' rigorous health and transportation protocols result in world-class market hogs entering Sunterra Meats. At the plant level, we make a personal commitment to ensure we meet or exceed industry standards at every step in the process right through to the shipping and delivery to our valued customers.

Sunterra Meats' customers are highly discriminating, demanding fresh tasting product that arrives at market in good condition. To meet this challenge, Sunterra uses state-of-the-art vacuum and shrink packaging technology that keeps moisture and oxygen away from the product.

The Sunterra brand is well known in Asia and the plant is working toward having EU approval. The company is relatively small but is currently exporting 70% of its products to the demanding Japanese market for retail and foodservice customers.

Wagyu Beef

Introducing Kobe Classic Beef, producers of the world's most exquisite and tantalizing beef product ever produced. Unlike other beef producers, our beef originates from Japanese Wagyu sires. Kobe Classic is so juicy, velvety smooth and flavorful, it's become the main draw at many establishments in North America.

Wagyu Canada Inc., based out of Alberta, Canada, produces specialty high end branded beef for markets in food service and retail. Our traceability program enables all information on the live animal to be carried directly to the point of consumption.

Wagyu Canada Inc. produces all muscle cuts for steaking and roasting along with a complete line of gourmet ground beef products. They also offer AAA and AA Black Angus beef for private label programs for export markets in Europe and Asia as well as a complete line of Alberta produced grain-fed bison meat.

There are certainly no assembly lines or cookie cutter approaches in the way we supply our products...you tell us what you want and we'll make sure you get it!

Oils, Margarines, Shortening and Whip Topping

Bunge Loders Croklaan is Canada's largest processor of oilseeds producing protein meals for the animal feed industry and edible oils used as a food ingredient. Bunge's quality product lines include: shortenings, frying oils, whip toppings, emulsifiers, confectionary fats, salad oils, margarines, specialty baking shortenings and winterized oils, all of which are manufactured in both bulk and packaged forms.

With more than 40 years of experience in the processing of canola oil, Bunge Canada has pioneered its application in the market for food ingredient uses. Our facilities are modern and able to efficiently access the North American market by truck and railcar. In addition, Bunge operates the only terminal in Eastern Canada that can transport grain from the western prairies to overseas markets year-round. Bunge Limited is a leading global agribusiness and food company with 35,000 employees in more than 40 countries. Bunge Loders Croklaan is the:

- world's largest oilseed processor
- world's largest seller of bottled vegetable oil to consumers and a leading supplier of premium edible oils to the United States foodservice industry
- world's largest corn dry miller
- largest exporter of soy products to Asia

Cold Pressed Canola Oil

Pleasant Valley Oil Mills, proudly and passionately produces the healthiest and highest quality cold pressed, NON GMO, edible, farm-to-table sunflower and canola oil and meal for commercial sale at our facility in the heart of canola country in Central Alberta, Canada. Custom bottling or bulk distribution available.

Using the best in cold-pressing technology, we separate oil from seed using a state-of-the-art steel press and eliminate the need for any unnecessary and unhealthy additional processing, such as bleaching and deodorizing which are used in over 99% of oils. This results in a more natural, clean, and better tasting product that most importantly maintains the full nutritional values nature provides as well as the aroma and buttery flavour.

With 100% of our heart-healthy, non-GMO canola seeds being sourced from our own farmyard and local sustainable farmers, food manufacturers globally can trust in the quality and flavour of our oils and meal. As a community that wholeheartedly believes in community, we pour our hearts into every seed so you can rest assured that it's good for yours.

Oils, Margarine and Shortenings

Richardson Food & Ingredients offers a wide variety of innovative, non-hydrogenated, lower saturated fat, and clean label margarine, fats and oils. We're proud to supply these products to retail, foodservice, food manufacturers and industrial bakeries worldwide.

Our two state-of-the-art canola processing facilities are strategically located in the heart of Canada's best canola growing regions – Alberta and Saskatchewan. Our two packaging facilities are located in Lethbridge and Oakville, Ontario, and multiple co-pack partnerships across North America, allow us to effectively supply our products to our many customers around the world.

Richardson Food & Ingredients, a division of Richardson International, is one of the largest canola oil processors in the world. As Canada's largest agribusiness, Richardson International is involved in every aspect of the food and agriculture cycle. We work alongside our farm customers, sourcing raw material directly from the grower and are actively involved in every stage of the food production cycle. From processing and packaging, to merchandising and logistics, our business is fully-integrated to ensure product quality and food innovation continue to exceed global expectations.

Canola Oil and Other Food Oils

Sunora Foods, based in Calgary, Alberta, Canada, has its roots in canola oil. The very name – Sunora – is derived from the sun golden canola flowers that grow in the fields in the shadow of the Canadian Rockies.

Sunora is internationally recognized for its canola oil and related canola products and is a major Canadian exporter of food oil. Although Sunora Foods has its roots in canola oil, many customers turn to Sunora for other food oils and canola margarine. To these customers, Sunora means corn oil or soybean oil or sunflower oil. With its international trading capabilities, the company is often the best and most cost-effective source of corn oil, soybean oil and sunflower oil.

Frozen Entrées

Inovata Foods is a leading North American co-packer and supplier of private label frozen entrées. Since inception in 1989 they have grown to occupy two GFSI SQF and HACCP certified facilities with a total of 140,000 sq. ft. of manufacturing space. One of their facilities is situated between Buffalo and Detroit only one hundred miles from the United States border. Inovata Foods’ four assembly lines and industry leading assortment of production equipment allow them to effectively produce a wide variety of frozen entrées from single serve up to 6 lbs. They offer excellent value, quality and customer service.

Inovata Foods’ culinary team excels at developing innovative new recipes as well as backwards engineering existing ones. Making sauce and pasta from scratch as well as cooking various grains on site allows Inovata Foods to offer nearly limitless recipe options. They are certified to manufacture entrées using beef, pork, chicken and seafood.

Packing Options – Various sizes and shapes of bowls and trays are available for co-pack and private label customers. Additionally, two patented innovative single serve trays are also available. CPET, PET, aluminum and paperboard are all options. External packaging options include: six sided retail cartons, sleeves, flow wrap, label and shrink wrap. Multi-packs are available.

Custom Soups, Sauces, Dips and Fillings

Kitchen Partners Limited is a Canadian-owned company based in Edmonton, Alberta. We are a customer food processor focussed on food service multi-unit customers and Home Meal replacement segment at retail. Our HACCP accredited facility, is federally inspected meat and seafood with USDA eligibility, specializing in frozen stirred food – soups, sauces, dips, fillings and dressings.

Kitchen Partners produces only custom proprietary products (private label and co-packing). We start by understanding the challenges our customers are facing in their business. Challenges like – how to control rising food costs; the ability to consistently deliver the same product day-to-day and place to place; the lack of available in-house expertise and the challenge of innovation and creating the next new “wow” item.

Our run sizes start at 10,000 lbs. with capacity to over 5 million lbs. Our products are packed in pouches ranging from 1 lb to 8lbs and in cases ranging from 6 lbs to 24 lbs.

Let our passionate and dedicated professionals work with your team to create and deliver something truly amazing. We are the kitchen behind your kitchen. We will work tirelessly to be your most trusted partner.

Gourmet Indian Foods

Thumbs Up Foods Inc. manufactures gourmet ethnic Indian style specialty foods.

Samosas are an Indian savory pastry; triangular in shape and filled with aromatic, spicy mixtures of vegetables or meat. Serenna's™ samosas are light and crisp on the outside with just the right amount of spice on the inside. Easy to prepare as an appetizer or snack, they also make a delicious side dish with other entrées. Our dough is prepared through a lamination process that does not require the addition of oil and results in a product with reduced fat content.

Serenna's™ Whole Wheat Rotis (Chapati) is a thin unleavened flatbread, made with atta (whole-wheat) flour, rolled out and baked on a tawa (special griddle). Serenna's Vegetable Pakora (Fritters) are a flavourful delight, made with potatoes, carrots, spinach, chickpea flour and an array of spices. They are all blended together to tantalize your taste buds. This is a "GLUTEN FREE" product.

Thumbs Up Foods is a family owned, independent Canadian company based in Calgary, Alberta, Canada. The family's roots are from Tanzania, East Africa. The company started in 1996 and has now expanded the supply of its products to five-star hotels, catering companies, local stores, golf courses and delis across Western Canada directly, as well as through local distributors. Exports to the US have also become an integral part of the business.

Sustainable & Couverture Chocolate Confections

Based in Calgary, Alberta, Canada, Cococo Chocolatiers are expert manufacturers and retailers of award-winning chocolates. Cococo puts its unique culinary expertise to work developing and manufacturing select wholesale, private label, and house brands.

Cococo uses only chocolate made with Rainforest Alliance Certified TM cocoa and cocoa butter to produce a sustainable chocolate future—one that benefits the farmers, communities, and ecosystems involved in cocoa production in West Africa.

Our chocolate is couverture, which means it has a higher cocoa butter content resulting in a superior chocolate flavor and a smoother, creamier texture than other chocolate.

We welcome your inquiries to discuss chocolate-focused products, such as:

- Molded chocolate products such as snack bars and baking bars
- Enrobed products such as pretzels and biscuits
- Panned products such as coffee beans and nuts
- Artisanal quality loose chocolates like our award-winning sea salt caramels; or our fusion bonbons—such as Apricot Lavender or Mango Peppercorn—for gift giving and boxed chocolate collections.

Potato Snacks – Simply Great Taste!

SPOKES are hot-air puffed potato snacks that are made with simple, natural, gluten-free, dairy-free, and non-GMO project verified ingredients. We use a special hot-air puffing process that lets us make these light and tasty snacks with only 40 calories per cup. The only oil used in the process is a gentle mist of sunflower oil so that our great-tasting seasonings stick. We always air-puff and never fry anything.

The best thing is that SPOKES taste great!

Available in great flavors like: Sea Salt, BBQ, Sea Salt & Vinegar, Mango Habanero, Salt & Pepper, Salsa, Dill Pickle, Bare and Sea Salted Caramel.

Our world-class manufacturing plant is rated as “AA” by BRC. We are Certified Gluten-Free and Circle U Kosher.

Certifications: HACCP, Global Food Safety Initiative – GFSI, Kosher, British Retail Consortium – BRC, Non-GMO Project Verified

Potatoes

Parkland Potato Varieties is a potato variety marketing company that introduces new potato varieties to Canada, the United States and Mexico. Together with our partner, Agrico, we introduce new and improved varieties for the global market, selecting unique potatoes for each region's particular climate, soil type, or palette.

The Agrico varieties are naturally bred to meet the ever-evolving demands of North American processors and consumers. Potato varieties are selected based on critical factors of yield, sustainability, and marketability. Parkland specializes in red and yellow skinned fresh varieties, as well as processing, creamer and fingerling potatoes.

Fresh Creamer Potatoes

The Little Potato Company is focused solely on the breeding, growing, packaging and promotion of proprietary little Creamer potatoes. It's all we do! All our varieties have outstanding flavour, buttery texture and are loaded with nutrition. Although little, our Creamers are only harvested when they are fully-matured. You can taste the difference!

Our extensive fresh Creamer potatoes are available in both convenient value-added kits and bags. Our 1.5 and 3 lbs gusset bags come with a convenient carry handle and are available in cases of 16, and 24 respectively.

Our Microwave Ready and Oven/Grill Ready products come in eye-catching and convenient pre-packaged steam/roasting tray with seasoning pack and are available in many flavours, available in 6 per case.

Our full line of proprietary varieties includes Baby Boomer, Blushing Belle, Terrific Trios, Dynamic Duos, Something Blue, Miss Blush, and Fingerlings.

We also have a food service offering in 25 lb boxes of yellows, reds, mixed varieties (yellow, red and blues), as well as our popular fingerlings.

We currently pack in Edmonton and Prince Edward Island, Canada, as well as in DeForest, Wisconsin, our new plant in the United States.

Livestock Handling Equipment

Since 1974 Hi-Hog has offered a wide selection of premium quality livestock handling equipment and horse stalls.

As Canada's largest producer of livestock handling equipment our equipment can be found across the country. Our customers range from small hobby ranches to large corporate ranches. You will also find our equipment at veterinary schools, border crossings, auction marts, zoos and government facilities. Similarly, our box stalls and portable event stalls can be found in small private facilities to large, world renowned facilities like Spruce Meadows, Rocky Mountain Show Jumping and Thunderbird Equestrian.

All our products are designed and manufactured in Calgary, Alberta. Our focus is on providing outstanding quality in every item we make. We use high tensile North American steel in all our construction. In addition to using quality materials we also build our products for superior functionality, durability, and safety.

Our products are also designed for efficient and economical shipping. Our overseas orders are shipped by container. Our loading, sales and logistics staff are highly experienced with preparing loads to maximize the value of the load. To maximize your return on investment, we recommend you order full 40' containers.

Forage Processing Equipment

Hunterwood Technologies designs, fabricates, and manufactures equipment to compress baled and loose hay into mid-to-high density bales. Hunterwood hay presses consume two-tie bales, three-tie bales, large square bales (3'x3', 3'x4', and 4'x4'), round bales, and loose hay from the field or from industrial dryers to produce 30 kg half-cuts up to 450 kg big bales. Our full range of forage processing products ensure greater domestic & global transport efficiency for your top-quality forages.

Our quality-built hay presses will support you in being a dominant player in the forage processing market for years to come. Reliability, customer focus, international presence, and continued product development guide our commitment to our current and future customers.

TECHNOLOGIES

Kwik Bandit Utility/Garden Tie

Our company, Kwik Bandit Inc., provides a solution to quickly and safely bundle and secure items. Our revolutionary banding product is durable, reusable, safe and versatile. It is a cost effective replacement to bungee cords, tie downs, straps and twine. Perfect for securing equipment/material, bundling cables/cords, and general use around the farmyard. With an easy stretch, wrap and lock system it makes it simple for anyone to use.

Kwik Bandit has been adopted by users in agriculture/horticultural/farming, trucking, heavy industry, households, marine and commercial companies. Kwik Bandit technology was researched and developed in Canada to withstand the harshest climates and environmental conditions. We make a longer lasting, more adaptable fastening system.

Our product line includes:

1. The 10 - 8" Kwik Bandit (10 lb. tensile strength – 8 inches in length) which is the smallest version of our product line; compact, easy to store and perfect for quick, small jobs.
2. The 50 - 14" Kwik Bandit (50 lb. tensile strength – 14 inches in length), a mid-sized binding tool that is perfect for securing transport loads or being combined to hold larger objects.
3. The 75 - 24" Kwik Bandit (75 lb. tensile strength – 24 inch in length) is the strongest version of our line and has become popular in agriculture, heavy industry and construction.

Livestock Manure and Food Waste Treatment

Livestock Water Recycling (LWR) creates value for food producers by reducing the expense and impact of waste liquids.

The recently re-launched LWR² System is a proven, patented, commercialized nutrient recovery platform. Equipped with data accumulation sensors for our subscription-based analytics program, the System reduces the volume of manure and bio liquids, concentrates nutrients into valuable crop fertilizers and delivers a renewable, high-quality clean water source.

At the height of the farm-to-table social movement consumers are demanding transparency. This technology is designed to achieve optimized production, maximum crop yields and a high return on investment, while minimizing the environmental impact of food production.

Total Mixed Ration Feed Processors

Supreme International, with a history that spans over 60 years, became the first company in North America to design, test and manufacture the vertical feed processor. Supreme has revolutionized the livestock feeding industry by adding many new innovative features to the vertical processor that enabled livestock producers to feed their cattle more efficiently allowing them to lower their feed costs and improve their gains.

Supreme recently launched the Self Propelled Self Loader SP30T, the 1700TR Mechanical Triple Processor and the Generation 2 Truck Mount Series.

Supreme continues to stay on the cutting edge of technology within our production process and stays connected to our front line dealers and customers. We have state-of-the-art equipment to ensure that we can produce with optimization of efficiency not compromising quality.

Supreme International Limited is a world-class organization that serves its customers in over 40 countries globally. Supreme has become the benchmark for quality throughout the world and the name Supreme has become synonymous with the words performance and reliability.

Livestock Traceability and Software

TrustBIX Inc. offers innovation and solutions that meet the challenges facing the livestock and food industry. The company includes the following divisions with over 20 years of experience in livestock and meat technology:

BIXS is a web-based data sharing platform that provides livestock traceability, basic and enhanced, for the cattle industry. BIXS integrates with other systems and software. It is currently expanding its scope into other species, foods and countries. This system is customizable, offering added information and value. Currently supporting the tracking of animals from certified sustainable operations in Canada.

ViewTrak offers Feedlot Solutions, Feedbunk Solutions and a Cattle Medical System, as well as auction software systems – Auction Master Pro and MarketMaster. Electronic pork and lamb grading probes – PG-309 for pork and the LG-409 for lamb. Our support teams are second to none, with extensive knowledge of the industry they work in.

FINS is our financial interest notification system - a risk management tool for lenders to the cattle industry. It provides tracking of financial interest cattle as well as current inventory reporting to lenders and borrowers.

Steel Livestock Handling Equipment

Equipment Built to Last Generations

2W is a locally owned manufacturing company that has been in business since 1988. Located in Nanton, Alberta, the heart of cattle country 80km south of Calgary. The company is committed to providing top quality livestock handling equipment for the cattle, horse, bison and rodeo industries.

All equipment is powder coated for a long lasting durable finish. Our steel is ASTM A-500 grade approved tube. We are continually improving our facility with manufacturing processes, for example robotic welders and laser cutting. The strength of steel used in our equipment is what separates us from our competition.

2W has developed an extensive distributor network throughout Western Canada, the United States and Sweden. New markets and products are constantly being sought and developed which keeps 2W on the leading edge in its market.

2W is Freight on Board (FOB), Nanton. Our team will work with new partners to coordinate orders and shipments to minimize freight costs and maximize the loads.

Alfalfa, Timothy, Mixed hay Grain and Dehy Silage in Containers

Barr-Ag Ltd. is Canada's leading exporter of timothy hay, non-gmo alfalfa hay, mixed hay, straw and dehydrated silage products.

Barr-Ag Ltd produces up to 75% of what we process with the balance coming from local farmers with whom they have established long-standing relations. This gives Barr-Ag Ltd. the excellent position to control the quality from the seeding to processing and, as such, have more ability to achieve a higher quality control of the products they produce, process and export.

Barr-Ag Ltd has two facilities in Alberta positioned close to the eastern slopes of the Canadian Rocky Mountains. This allows them to grow, compress, and containerize hay and other forage for dairy and beef operations and horse owners around the world. They offer the following packaging options for their compressed hay: 60 kg full bales, 30 kg half-cut bales and 420 kg big bales in sleeves. Barr-Ag Ltd. also offers products in sun-cured and heat-treated formats.

Barr Ag Ltd can make custom blended mixes to the end user's requirements and needs.

Barr-Ag Ltd. is an experienced, innovative company that offers flexible shipping options and they can take care of the necessary customs documents in an effective and efficient manner.

Dryland Timothy and Oaten Hay

For over 25 years, Dalziel Enterprises has been a Canadian industry pioneer in supplying Asian and US markets with high quality long fiber sources. Our two processing facilities in Central Alberta are adjacent to producers of dryland timothy and mixed hays.

We specialize in double compressed dryland timothy hay. Producers of dryland hay utilize lower impact methods of farming which do not rely on the addition of the same fertilizers and chemicals used in irrigated hay. This provides a more natural, environmentally sustainable, low nitrate, low potassium product for maximum palatability.

Dalziel Enterprises has drying and compressing capabilities at both facilities. We produce 42 kg “Mini-Bales” and 27 kg “Half-Cut” bales. Both products are available in bulk or in stretch wrapped packages.

Starting in 2017, Dalziel has been providing Canadian Dryland Oaten Hay to markets with great success. Dryland Oaten hay grown in Central Alberta has extremely high Water-Soluble Carbohydrate levels and low nitrate levels which make another extremely palatable feed source.

Forage

Green Prairie International is a respected global wholesale supplier of quality forage products and has become one of Canada's premier processors and suppliers of long-fiber timothy and alfalfa hay to valued international markets.

Stringent quality assurance ensures that the product consistently meets the needs and expectations of the customers. Careful attention is given to forage crops from their early growth and development stages to their harvest. This careful attention continues right through delivery to the plant and processing ensuring the products are free from contamination and meet high-quality standards fit for shipment to the consumer.

Forage products are compressed into bales that allow for easy and efficient handling. State-of-the-art compressing facilities allow Green Prairie to efficiently process forage crops to give consumers maximum return on investments. The majority of the products are consumed by horses and both dairy and beef cattle.

Green Prairie is a forward thinking company and is always innovating ways of harvesting, compressing and transporting hay globally. Located in close proximity to major transportation hubs, Green Prairie's exceptional logistical expertise ensures frequent and in-time delivery by truck or by ship.

 @greenprairieinternational

Horse Hay

First formulated forage feed ration in bale on the market. Engineered with the horse and their handlers in mind.

Bale size and weight has been designed to transport efficiency and handling ease.

Process removes dust and pollen to protect the equine respiratory system. This also reduces ambient dust in enclosed spaces for a better barn environment. This Canadian Food Inspection Agency inspected facility also removes contamination incorporated during harvest. Stones, metal, rodents, bones and wood contamination is removed. Bales are individually weighed, and passed through a moisture and metal scanners.

Bales are stacked in blocks of 64 and fit on a conventional pallet. They can be loaded and unloaded from a steel shipping container carrying maximum allowed weight (1,280 bales per container).

We only use the best forages available on the Canadian Prairies.

Looking for customers globally.

Timothy Hay

Supplying top Quality timothy hay as an optimal fiber source feed stuff specializing in the dairy industry. Timothy hay can serve as a complete feed or part of the ration for many ruminant applications including;

- Horse
- Calf Weaning
- Dry and Transition Dairy Cows
- Lactating Dairy Cows
- Heifers

Timothy hay is highly digestible, high in fiber, and low in potassium and nitrates.

We can offer double compressed mini-bale in bulk and stretch-wrapped style packaging. We are able to maximize ocean sea containers with 25,500 kg per container.

Our two Alberta forage processing facilities are HACCP certified and we operate under current Canadian Food Inspection Agency standards and protocols. Our timothy hay is Non-GMO and very often receives no herbicide or pesticide applications making it a very palatable, safe and natural type of forage feed.

Please let us know how we can serve your forage demands with our Canadian Timothy Hay!

Dorper/White Dorper Sheep Genetics

Boda Farm has been raising South African Dorpers and White Dorpers since 1998. Our focus has always been on elite genetics and our selection of breeding stock consistently display top performance as well as strong exterior traits. Since our start with the Dorper breed, we have developed subsidiary flocks in Mexico and in Sweden.

Boda Farm specializes in international export of embryos and semen as well as live shipments. Our semen is collected in a federally-approved facility and all of our embryos are guaranteed to be of the highest quality according to the International Embryo Transfer Society grading system.

Boda Farm also offer international consulting for sheep management, reproduction and nutrition and have been involved in several international projects, including Mexico, Sweden, Kazakhstan and Mongolia.

Boda's flock is EU-certified and our genetics can be found in Mexico, Colombia, United States, Sweden, Norway, Finland, Vietnam, Trinidad and Tobago, Hungary, Czech Republic, Mongolia, Kazakhstan, United Kingdom and Jamaica.

Livestock Genetics - Porcine Germplasm

Live breeding pigs and fresh or frozen boar semen exported from herds and boar studs across Canada provide high quality performance from pigs tested in the Canadian Centre for Swine Improvement.

Improved genetics can be supported by AI equipment and supplies, barn equipment and supplies in developing pig breeding operations.

Management expertise and web-based record-keeping ensure that the imported breeding program can be maintained and enhanced in any country. Seminars, on-farm demonstrations and written reports provide help with managing the breeding herds.

On-Farm Skills Training programs for barn workers can be offered either as classroom learning or hands-on in-barn training for new swine technicians.
