Alberta Influenza Immunization Policy

Public Health and Compliance Division
August 2018
New Updates for the 2018–2019 Season

Public Launch:

The Alberta Influenza Immunization Program will begin October 15, 2018. As part of the Alberta Outreach Program, immunizers who are participating in outreach activities can begin to immunize high risk individuals as soon as vaccine is available.

Immunization of Immunizers:

It is recommended that those who will be immunizing Albertans are, themselves immunized as soon as possible upon receipt of vaccine at their site.

Pharmacist Service Delivery:

Pharmacists can administer influenza immunizations to Albertans 5 years of age and older.

Vaccine Products:

Quadrivalent inactivated injectable vaccine is the vaccine of choice for Albertans 6 months of age and older. FLUZONE® QUADRIVALENT and FLULAVAL® TETRA QUADRIVALENT are the vaccines available.

Reporting Requirements:

For the 2018–2019 influenza season, aggregate reporting will be accepted under certain conditions; see Section XIII. Reporting Requirements for more details.
All information in the *Influenza Immunization Policy* (the IIP) is presented for health sector purposes only.

The IIP is subject to change and the Government of Alberta reserves the right to periodically update the information, as required. It is important that the most current version of the IIP is being used.

The IIP is presented with the intent that it is readily available for non-commercial or informational use by health care providers, organizations, and other entities involved in the distribution and administration of influenza vaccine and is not intended for use by the general public. Except where prohibited, the IIP may be reproduced, in part or in whole and by any means without charge or further permission from the Government of Alberta provided that:

- users exercise due diligence in applying the IIP; and
- the Government of Alberta is identified as the source of the IIP.

Users are responsible for any changes and modifications they make to the IIP and in any event, use of the IIP is not a substitute for the proper exercise of professional judgment by the user in applying the IIP. If modifications are made to the IIP by anyone other than by the Government of Alberta, the modified IIP must clearly indicate that it is **not** an official version of the original IIP, and must **not** be represented as having been made in affiliation with or with the endorsement of the Government of Alberta.

<td>Provides provincial direction for immunizers on the cold chain management of publicly funded vaccines.</td>
</tr>
<tr>
<td>Alberta Vaccine Inventory System (AVI)</td>
<td>Is the provincial web-based vaccine inventory management system. AVI is used to manage vaccine ordering, shipping, receiving, and reconciliation.</td>
</tr>
<tr>
<td>Client</td>
<td>Individuals six months of age and older who live, work or go to school in Alberta are eligible to receive influenza vaccine.</td>
</tr>
<tr>
<td>Cold Chain Management</td>
<td>The process used to maintain optimal temperature and light conditions during the transport, storage, and handling of vaccines. This starts with the manufacturer and ends with the administration of the vaccine to the client.</td>
</tr>
<tr>
<td>Health Practitioner</td>
<td>Hospital employees, physicians, and other staff who work or study in hospitals (e.g., students in health care disciplines, contract workers, volunteers) and other health care personnel (e.g., those working, studying or volunteering in clinical laboratories, nursing homes, home care agencies and community settings) who are at risk of exposure to communicable diseases because of their contact with patients/clients (diagnosed or undiagnosed) or their environment.</td>
</tr>
</tbody>
</table>
| Immunizer                           | A health practitioner who meets the following requirements and is eligible to administer vaccine as part of the Alberta Immunization Program:  
  - Is a member of a regulated health profession under the Health Professions Act, |
Is authorized under the respective statute and regulations to administer a vaccine, and
Is compliant with the applicable policies of the Alberta Immunization Policy.

**Examples:**

**Immunizers who receive vaccine through AHS:**
- Are employed directly by AHS and could include, but are not limited to, AHS Public Health and non-Public Health.
- Are not employed directly by AHS and could include, but are not limited to, physicians, employees of long-term care sites, private occupational health services and post-secondary institutions.

**Community Pharmacists:**
- Receive vaccine from Alberta Health through Pharmacy Wholesale Distributors.

---

<table>
<thead>
<tr>
<th>Personal Health Number (PHN)</th>
<th>The unique identifier assigned by Alberta Health for identification within Alberta’s health system. A PHN is assigned to a person upon registration and presume eligibility for basic health services as defined in the Alberta Health Care Insurance Plan.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pharmacy Wholesale Distributors (PWD)</td>
<td>A pharmacy wholesale distributor who has a vaccine distribution contract with Alberta Health.</td>
</tr>
<tr>
<td>Privately Purchased Influenza Vaccine</td>
<td>The seasonal influenza vaccine purchased by pharmacies for use outside of the Alberta Influenza Immunization Program.</td>
</tr>
<tr>
<td>Provincial Vaccine Depot (PVD)</td>
<td>The vaccine depot maintained by the Government of Alberta. All publicly funded influenza vaccine will be received through the PVD for further distribution across Alberta.</td>
</tr>
</tbody>
</table>
II. PURPOSE

Influenza is a vaccine preventable disease yet in 2017-2018 at least 91 deaths in Alberta were attributed to influenza. 3,024 persons were admitted to hospital and 236 of those admissions required intensive care. The elderly, the very young, pregnant women and those living with chronic or immune-compromising conditions are particularly vulnerable.

The goal of the Alberta Influenza Immunization Program is to have the maximum number of Albertans immunized while being cost-effective, efficient and innovative.

The objectives of Alberta’s Influenza Immunization Policy (IIP) are:

- For all Albertans to have access to publicly funded influenza vaccine;
- To reduce the incidence and impact of influenza disease in Alberta;
- To have a potent and safe vaccine available for administration; and
- To have 100% of immunizers receive the influenza vaccine.

The goals and objectives of the IIP can be met when all immunizers work together to implement it. Collaboration, coordination and communication among immunizers during all phases of the immunization process (from vaccine distribution to front line administration) are critical to strengthen Alberta’s capacity to reduce the impact of influenza disease and contribute to the health and well-being of Albertans.

III. LEGISLATIVE AUTHORITY

The IIP is established under sections 10 and 12 of the Public Health Act (PHA) and sections 2 and 2.1 of the Communicable Diseases Regulation.

Under the authority of Ministerial Order 600/2018 and pursuant to section 16 of the Regional Health Authorities Act, pharmacies and pharmacists may participate in the delivery of the Alberta Influenza Immunization Program.

IV. NATIONAL RECOMMENDATIONS

The National Advisory Committee on Immunization (NACI) produces a statement on influenza immunization each year that contains specific information and recommendations regarding the vaccine(s) to be used in the forthcoming season.

Each year, Alberta Health uses the NACI recommendations as a foundation for the IIP, and makes final policy recommendations with consideration to Alberta’s context.

All immunizers are expected to understand the IIP, vaccine charts, and be familiar with the most current NACI statement and relevant influenza vaccine product monographs.

V. ALBERTA TARGETS FOR INFLUENZA IMMUNIZATION

- Seniors aged 65 and older 80%
- Children aged 6 months to 23 months 80%
- Residents of long-term care facilities 95%
- Staff of long-term care facilities 95%
- Health Practitioner 80%
VI. CLIENT ELIGIBILITY

Alberta's universal influenza immunization program began in September 2009. Subject to any directions by the Chief Medical Officer of Health, and any other criteria as established by Alberta Health and the applicable legislation; individuals six months of age and older who live, work or go to school in Alberta are eligible to receive influenza vaccine.

Clients who do not have a Personal Health Number (PHN) or whose PHN is inactive should be directed to a local AHS Public Health clinic for administration of vaccine.

VII. EDUCATION/TRAINING

All immunizers are expected to complete an annual influenza immunization update, which at minimum, would require reading the IIP and reviewing current resources, prior to administering influenza vaccine.

- **Immunizers who receive vaccine through AHS:** can access the AHS Influenza Immunization for Health Professionals Information Package.
- **Community Pharmacists:** can access the Alberta Pharmacists' Association (RxA) Annual Influenza Immunization Education.

VIII. VACCINE SUPPLY AND DISTRIBUTION

Alberta Health purchases influenza vaccine through a national procurement process. Alberta Health receives influenza vaccine from manufacturers over several months and distributes vaccines over time. Access to supply is monitored closely.

**Immunizers who receive vaccine through AHS:**

- The Provincial Vaccine Depot (PVD) ships vaccine to AHS vaccine depots for further distribution.
- AHS is responsible for distributing influenza vaccine to all immunizers (excluding community Pharmacists); distribution amounts are based on vaccine availability.
- Vaccine orders are placed using the Alberta Vaccine Inventory (AVI) system.

**Community Pharmacies:**

- Influenza vaccine is distributed to pharmacies through Pharmacy Wholesale Distributors (PWD); distribution amounts are based on vaccine availability.
- Ordering threshold for QIV per order is:

<table>
<thead>
<tr>
<th>Minimum order</th>
<th>Maximum order</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 unit (200 doses)</td>
<td>20 units (200 doses)</td>
</tr>
</tbody>
</table>

  *Note: one unit is 10 doses of vaccine."

- Exemptions to the maximum ordering thresholds will be considered during an outbreak situation, as determined by Alberta Health.
IX. ADMINISTRATION OF VACCINE

The Alberta Influenza Immunization Program will begin October 15, 2018. As part of the Alberta Outreach Program, immunizers participating in outreach activities can begin to immunize individuals, as soon as vaccine is available. Pharmacists can administer privately purchased influenza vaccine prior to the program start date at a cost to the client. The following influenza vaccines are subject to the 2018–2019 IIP.

<table>

<td></td>
</tr>
</tbody>
</table>

For off-site influenza immunization service delivery, please refer to the Appendix: Guide to Off-Site Coordination of Influenza Vaccine Administration.

Additional Influenza Vaccine Resources:

- Alberta Immunization Policy
- Alberta Health vaccine chart- Influenza Quadrivalent Inactivated Vaccine
- Product monograph- GlaxoSmithKline- FLULAVAL® TETRA; Sanofi Pasteur- FLUZONE® Quadrivalent
- World Health Organization- Recommended composition of influenza virus vaccines for use in the 2018–2019 northern hemisphere influenza season
X. COLD CHAIN MANAGEMENT

Appropriate storage and handling is essential to provide potent biological products to the public. Detailed requirements are outlined in the Alberta Vaccine Cold Chain Policy (AVCCP).

All known exposures of influenza vaccine to temperatures outside +2.0ºC to +8.0ºC or inappropriately exposed to light must be reported.

All vaccines exposed to cold chain excursions need to be quarantined and the cold chain break reported as soon as possible and within one business day of the occurrence.

- **Immunizers who receive vaccine through AHS:** send the Alberta Health Services Cold Chain Break Report Form to the AHS Zone Contact.
- **Community Pharmacists:** send the Pharmacy Cold Chain Break Report Form to Alberta Health at health.imm@gov.ab.ca.

XI. ADVERSE EVENTS

Monitoring the health and safety of Albertans is paramount. Immunizers must have protocols in place for management and reporting of anaphylaxis and other serious adverse events.

Report all Adverse Events Following Immunization (AEFI) of influenza vaccine to AHS as soon as possible (at minimum weekly) using the AEFI form. Information on how and when to report an AEFI, and the definitions of reportable AEFI in Alberta are included in the Alberta AEFI Policy.

When the adverse event is severe (e.g., anaphylaxis), the event must be reported within 24 hours to the local AHS Public Health office. The list of AHS Public Health offices is available at the link below, Adverse Event Following Immunization Policy and Procedures: [www.health.alberta.ca/professionals/immunization-policy.html](http://www.health.alberta.ca/professionals/immunization-policy.html)

If an immunizer is unsure whether a symptom following immunization is related to the immunization, the immunizer should consult with the local AHS Public Health office as soon as possible.

XII. RECORDING REQUIREMENTS (Client Record)

The following data elements must be collected for each client who receives influenza vaccine and be included in the client’s immunization record:

- client’s last name
- client’s first name
- Personal Health Number (PHN) or Unique Lifetime Identifier (ULI)
- date of birth
- gender/sex
- postal code
- Influenza Vaccine name (brand name)
- manufacturer lot number
- dosage administered
- date and time of immunization
- site of injection
- route of administration
- name and designation of Immunizer
XIII. REPORTING REQUIREMENTS

Immunizers who receive vaccine through AHS:

- Individual line data is to be submitted electronically (if available), at minimum weekly, to the provincial repository in accordance with the Immunization Data Submission and Response Guidelines.
- If electronic data capture capabilities are not available, aggregate data should be submitted, at minimum monthly, to Alberta Health Services.

**Note:** all doses administered to children 9 years of age and under must be submitted to AHS for data entry using the Influenza/Pneumococcal Immunization Record.

**Reason Codes 2018–2019 (Influenza Immunization Record)** are listed in order of priority:

<table>
<thead>
<tr>
<th>Reason Codes</th>
<th>Descriptor</th>
<th>PIN</th>
</tr>
</thead>
<tbody>
<tr>
<td>03</td>
<td>Health Practitioner (including acute care, long term care, home care, and public health)</td>
<td>03666603</td>
</tr>
<tr>

<td>03666603</td>
</tr>
<tr>
<td>45</td>
<td>Children 6 months to 23 months</td>
<td>03666603</td>
</tr>
</tbody>
</table>

**Community Pharmacists:**

- Pharmacists must submit claims to Alberta Blue Cross (ABC) within three business days to assist with vaccine supply monitoring and timely recording of immunization event into Netcare.

**Pseudo Identification Number (PIN)/ Reason Codes for 2018-2019** are listed in order of priority

<table>

Superseded
XIV. INFLUENZA VACCINE WASTAGE

In order to mitigate wastage and reduce dilution of supply, a judicious approach to influenza vaccine ordering is required. Influenza vaccine wastage should be less than five percent at the end of the influenza season. Immunizers (excluding AHS Public Health) are responsible for the proper destruction of unused/expired influenza vaccine according to the standards of practice at their respective sites. The cost for destruction will not be reimbursed.

For immunizers who receive vaccine through AHS, all influenza vaccine that is not used after the season ends must be reconciled in AVI using the reason code "Wastage/Influenza Season End".

XV. CHARGES/BILLING

Immunizers who are administering influenza vaccines as part of the provincially funded Alberta Influenza Immunization Program cannot charge an eligible Albertan for vaccine, supplies or services associated with the administration of the vaccine.

XVI. OFF-SITE WORKPLACE CLINICS

Immunizers offering influenza immunization services in a workplace setting cannot charge an eligible Albertan for vaccine, supplies, or services.

Immunizers offering influenza immunization services in a workplace setting as off-site workplace clinics cannot charge the Province, however, may charge the employer for the services associated with the administration of the vaccine but not for the vaccine itself.
