

SCHEDULE 1

Water Conservation Objective

The Water Conservation Objective (WCO) on the Nose Creek is a rate of flow that is the existing instream objective increased by 10%.

Existing instream objective on Nose Creek are as follows:

Value (CUBIC METRES PER SECOND)	Value (CUBIC FEET PER SECOND)
0.085	3.0

Water Conservation Objective (WCO) on Nose Creek are as follows:

Value (CUBIC METRES PER SECOND)	Value (CUBIC FEET PER SECOND)
0.094	3.3

The above Water Conservation Objective is to be met at the mouth of Nose Creek.

Up-to-date water flow information is available most of the year from the Alberta Government web site at:
<https://rivers.alberta.ca>
