Real GDP by Industry

Alberta tops the provinces in real GDP growth in 2012

Real GDP by industry in Alberta grew by 3.9% in 2012, leading all provinces for the second straight year and far outpacing the national average (1.8%). This is in line with the *Budget 2012* forecast and the *Budget 2013* estimate of 3.8% growth.

A major contributor to this growth was the oil and gas extraction industry, which expanded by 6.1%. Growth was also propelled by the construction sector (7.7%), with residential construction and electric power engineering leading the way. Oil and gas engineering construction, Alberta's largest construction sector, grew 6.4%.

Other industries in Alberta also recorded strong GDP growth. The manufacturing industry expanded by 5.3%, driven primarily by increases in fabricated metal products, machinery and wood products. Robust consumer spending fueled a 5.5% expansion in the retail trade industry, led by a jump in vehicle sales. Overall, the service-producing industries grew 3.7%.

Retail Sales

Consumer spending jumps

Alberta retail sales rose sharply for the second month in a row, up by 2.2% to \$6.0 billion in February. On a year-over-year basis, retail sales increased by 7.4%, by far the strongest growth among the provinces. The increase was led by higher spending at automobile dealers (15.1%) and at clothing and clothing accessories stores (6.4%). Declines at grocery stores and convenience stores tempered the year-over-year gains.

Canadian retail sales rose 0.8% in February and were up 1.5% on a year-over-year basis.

Average Weekly Earnings

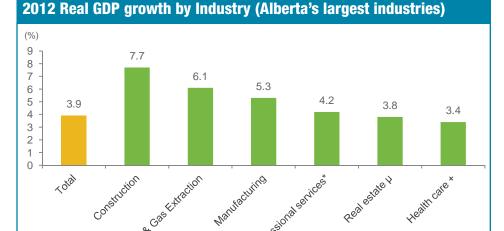

Earnings continue to climb

Alberta average weekly earnings increased an impressive 1.5% in February to \$1,100 per week. Earnings were 4.5% higher than the same month last year, reflecting gains in the hourly wage rate and average hours worked. Goods producing industries posted the largest year-over-year earnings gains (7.1%), far outpacing the increase in the service sector (3.7%). Nationally, average weekly earnings increased to \$909 and were 3.1% higher than February 2012.

US Real GDP

First quarter growth rebounds on stronger household spending

US real GDP increased at an annual rate of 2.5% in the first guarter of 2013. below market expectations. but up from a 0.4% increase in the fourth quarter of 2012. US households were the primary drivers of growth in the first quarter as real consumption expenditures increased at an annual rate of 3.2%. Fiscal restraint continued to weigh on growth. In particular, national defense spending declined by 11.5% in the first quarter after contracting by 22.1% in the fourth guarter of 2012. The rate of decline in defense spending over the last two quarters was greater than in any two consecutive quarters since the Korean War.

Quarterly; annual numbers are presented on a census year basis (July 1- June 30)

YTD (year-to-date) represents the change since the beginning of the year compared to the same period in the previous year. "SA" denotes seasonally adjusted. "SAAR" denotes seasonally adjusted at annual rate

Sources: All data is from Statistics Canada except Housing Starts (Canada Mortgage and Housing Corporation), MLS Average Resale Prices (Canada Real Estate Association), Rigs Drilling (Canadian Association of Oilwell Drilling Contractors) and Bankruptcies (office of the superintendent of Bankruptcy Canada).

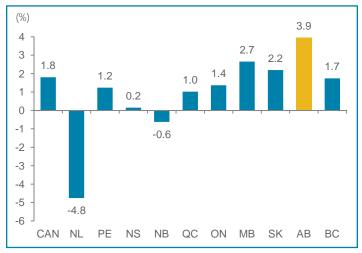

Quarterly, average of Calgary and Edmonton

Average of Calgary and Edmonton
