

Labour Market

Job creation picks up, unemployment rate drops

Alberta's labour market rebounded sharply in July, adding 16,600 jobs after no change in June. This is the third time in the last four months that Alberta has recorded large monthly job gains in excess of 14,000. All of the new positions were in the private sector, with the majority being part-time service sector jobs. Year-over-year employment growth rose to 3.0%, the highest rate since May 2012.

The surge in jobs lowered the unemployment rate down to 4.5%. Up until July, the unemployment rate had been creeping higher (reaching 5.0% in June) due to Alberta's soaring net migration and the related increase in the labour force.

Canadian employment dropped by 39,400 jobs in July, pushing the unemployment rate up slightly to 7.2%. The job losses were concentrated in youth employment and public sector positions.

Building Permits

Permits well above last year's level

In June, the total value of building permits in Alberta dipped slightly from May's levels, but was up a sharp 24.3% over the same month last year. Strong year-over-year growth was observed across all sectors, with residential permits up 15.8% and non-residential permits increasing 36.1%. Non-residential growth was strong across the board with industrial (14.1%), commercial (21.8%) and institutional (145.2%) all posting solid growth.

Nationally, the value of permits was down 4.8% year-over-year in June, due to declines in residential permits.

International Merchandise Exports

Exports hold steady

Alberta exports came in at \$7.7 billion in June, a modest 0.5% decrease from the same month last year. Continued strength in basic & industrial chemical, plastics & rubber products, which jumped 28.8% year-over-year, failed to offset soft energy exports (+0.4%) and negative growth across a broad section of other sectors.

At the national level, exports fell 0.8%, led by a 3.9% dip in energy products and a 6.5% decline in motor vehicles & parts.

New Housing Price Index (NHPI)

Alberta prices gain strength

Alberta's NHPI accelerated for the third straight month, rising 2.9% over the same month last year. This is the largest gain since April 2008. The increase was largely due to the

housing component (3.5%), while land prices posted a more modest gain (1.4%). Year-over-year, prices in Calgary jumped 5.3% while Edmonton advanced 0.6%. At the national level new home prices were up 1.8% over the same period.

Housing Starts

Alberta new home construction moderates

Alberta housing starts moderated for the third straight month, falling to 33,608 (seasonally adjusted at an annual rate) in July. This was slightly (+1.2%) above the same month last year. Year-to-date housing starts remain strong at 36,500, 9.2% above the same period last year.

Canadian housing starts were down in July, falling 9.5% from the same month last year.
