

Average Weekly Earnings

Earnings hold steady in April

Alberta's average weekly earnings were almost unchanged (+0.03%) in April, coming in at \$1,098 per week. Earnings are 3.4% higher than the same month last year, reflecting gains in both the average number of hours worked per week and the average hourly wage rate. Goods producing industries led the gains with a 4.0% year-over-year increase in weekly earnings, compared to a 2.5% increase in service industries.

Nationally, average weekly earnings increased by 0.2% to \$910 over March, and were 2.2% higher than March 2012.

Rigs Drilling

Drilling tracks downward

May marked a halt to eleven straight months of year-over-year declines in Alberta rigs drilling; however, June's rigs drilling numbers were again negative, dropping 17% over the same month last year. June represents the first month since August 2012 where rig counts are below their five year average.

Nationally, rigs drilling were down 21%, with the rig count also falling below the five year average.

Bankruptcies

Bankruptcies continue to fall

The number of consumers and businesses declaring bankruptcy is on a downward trend, a sign of Alberta's strong economy. Business bankruptcies in Alberta decreased on a year-over-year basis for the ninth consecutive month in April, falling by 25.0% to 15. Consumers are also seeing bankruptcies move lower, with bankruptcies falling year-over-year for the 30th consecutive month in April (-11.3%).

Conversely, at a national level both Canadian business (+8.7%) and consumer (+3.7%) bankruptcies were up year-over-year for the first time in seventeen months.

Canadian Real GDP by Industry

Growth slows in April

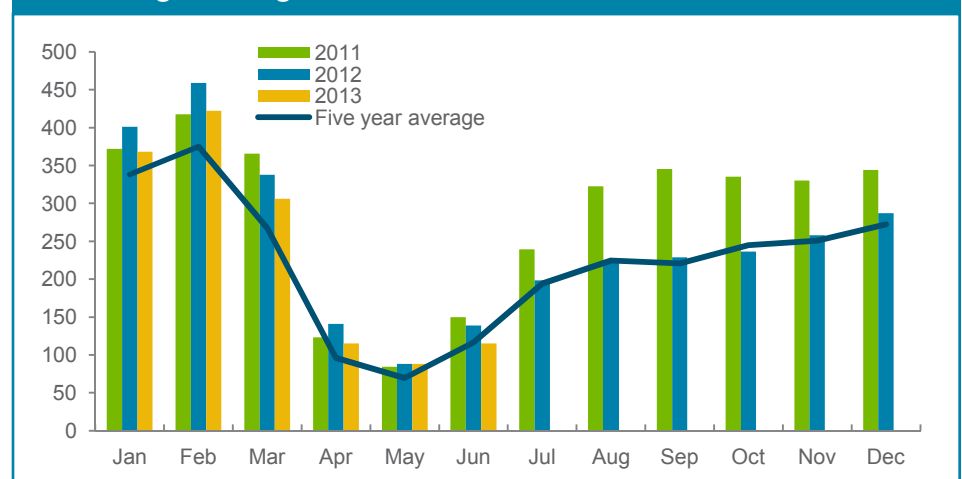

Canada's real GDP growth slowed to 0.1% in April from 0.2% in March, the fourth straight month of positive growth. A relatively broad-based 0.3% increase in the services was partially offset by a 0.3% decline in goods-producing industries. The drop in goods production was largely due to a 2.7% decline in the oil and gas extraction industry, reflecting a 5.9% drop in non-conventional oil extraction and a 0.6% dip in conventional oil and gas extraction.

US Housing Sector

Housing gains momentum

The Case-Schiller house price index increased by 1.7% in April after rising 1.9% in March. Both monthly increases are the largest since the series began in January 2000. April prices were 12% higher than a year earlier, the largest year-over-year increase in 7 years. The strength in prices is echoed in new home sales, which rose 2.1% in May and were up 29% over May 2012. The resurgence in the US housing market has supported gains in Alberta's forest product sector this year.
