Rigs Drilling

Rig counts decline, but at a slower rate

The number of rigs operating in Alberta continued to track below last year's levels in July, falling 5.7% over the same month last year to 187. However, rigs drilling fell at a slower year-over-year rate than was observed in much of 2013 and late 2012, and came in above their five-year average. Utilization rates were down in July, with 31% of rig capacity being utilized compared to 33% the same month last year.

Nationally, rig counts were down 4.2% over July 2012, with a 36% utilization rate.

Canadian Real GDP by Industry

Growth continues despite oil & gas decline

Canada's GDP increased for the fifth month in a row in May, rising 0.2% over April. Gains were fairly broadbased, with most major industries recording increased output. The notable exception was the oil and gas extraction industry, where GDP dropped significantly for the second straight month, falling 2.1% due to a 7.4% decline in the non-conventional oil extraction industry. Maintenance shutdowns at petroleum facilities were largely responsible for the decline.

Canada Industrial Product Price Index (IPPI) and Raw Materials Price Index (RMPI)

Oil drives price growth

Growth in the national IPPI accelerated to 0.6% year-over-year in June, up from 0.1% in May. The increase was largely due to the impact of higher gasoline prices, which pushed up the price of petroleum and coal products by 5.3%. Excluding petroleum and coal products, the IPPI fell 0.1%. Also in June, the national

RMPI increased year-over-year for the first time since February 2012, by 4.0%. Mineral fuels were largely responsible, as crude oil prices increased 10.5%.

US Real GDP

Growth accelerates in the second quarter

US real GDP grew by 1.7% in the second quarter according to advance estimates. This is an improvement from the downwardly-revised 1.1% increase in the first quarter. There were notable accelerations in non-residential fixed investment (+4.6%), exports (+5.4%) and residential investment (+13.4%). Despite automatic spending cuts that took effect in March, government expenditures were only down 0.1% in the second quarter.

US Labour Market

US job creation slows, unemployment rate drops

The US economy added 162,000 payroll jobs in July, below market expectations and the slowest one-month gain since March. Revisions shaved 26,000 off the previously reported May and June job gain. However, the separate household survey showed that the unemployment rate dropped 0.2 percentage points to 7.4%, the lowest level since December 2008. The lower unemployment rate reflected job gains and a decline in labour force participation.
