

Labour Market

Unemployment rate drops; job growth moderates

Alberta's unemployment rate fell by a half-percentage point to 4.3% in September. The drop was largely the result of a decrease in the labour force, likely due to more young workers than usual returning to school. The province now shares the lowest unemployment rate among the provinces with Saskatchewan.

Alberta posted a net job gain of 4,000 in September. This follows robust job growth of over 15,000 in each of the previous two months. The gain was wholly in full-time positions (+7,500), as part-time positions declined.

Alberta has created 80,300 jobs since September 2012, and posted the highest year-over-year employment growth rate (3.7%) among the provinces.

Nationally, the unemployment rate dropped to 6.9%, its lowest level since December 2008.

Housing starts & new home prices

Alberta housing starts recover

Alberta housing starts increased to 30,500 (seasonally adjusted at annual rates) in September following August's sharp decline. Starts, however, remained below last year's level for the second straight month, bringing the year-to-date average to 35,100.

Canadian housing starts increased to 193,600 in September, largely due to gains in multi-unit starts.

Calgary leads national increase in new home price index (NHPI)

Calgary's NHPI grew by 6.1% compared with August 2012. Builders in Calgary reported that increased costs, and a shortage of developed land, helped push prices higher, according to Statistics Canada. The NHPI for Alberta was up 3.3% in August compared with last year.

Building Permits

Permits slip

The value of building permits in Alberta slid 2.6% in August compared with August 2012. The decline was primarily the result of a drop in residential permits (-8.7%), which posted the first negative year-over-year growth since mid-2011. Growth in non-residential

permits (7.2%) helped offset the fall in residential permits, with industrial and commercial permits both posting strong growth.

Locally, permits in Edmonton declined sharply, with the value of residential permits falling 14.9%. Permit values in Calgary were up 4.7%.

International Merchandise Trade

Alberta exports trending above last year

Total exports jumped 11.9% over August 2012, marking the second consecutive month of double digit increases. Energy products bolstered the increase, rallying 18.6% over the same month last year, helped by higher prices. Chemical, plastic & rubber products, the second largest export category, posted its ninth straight monthly gain.
