Job Vacancies

Alberta's job vacancy rate edges up

Alberta's job vacancy rate, the number of job openings for every job in demand, has hit its highest level since late 2012. The rate averaged 2.6% between May 2013 and July 2013, well above the national average rate of 1.4%. Over the same period, there were 2.3 unemployed people for every job opening in Alberta, much lower than the national average of 6.5. Both measures indicate a job market that is much tighter in Alberta than in the rest of Canada. Alberta's share of national job vacancies, now at 24%, has trended higher in recent months (see chart).

Retail Sales

Consumer spending flat

Alberta's retail sales were essentially unchanged in August at \$6.1 billion. However, sales were up a strong 5.5% over the same month last year, led by higher spending at motor vehicle and parts dealers as well as food and beverage stores. Alberta leads the provinces in sales growth, posting the highest year-over-year and year-to-date increases.

Canadian retail sales were up 0.2% in August, lifted by higher sales at food and beverage stores. Year-over-year growth in national sales remains modest at 2.7%.

Wholesale Trade

Trade remains flat in August

Following a sharp run-up starting in late 2009, the value of wholesale trade in Alberta has stayed relatively flat since mid-2012. Increases in

certain months have been offset by declines in others. In August, this trend continued, with a 0.7% dip in wholesale trade, partly reversing July's 2.0% gain. Compared with August 2012, sales were up 1.6% as gains in food & beverage and building supplies.

New Housing Construction

Alberta posts another increase, though growth moderating

Construction investment in new housing continues to increase, hitting an all-time high in August. The value new housing investment (in 2007 dollars) was up 5.6% year-over-year (y/y) in August, the 22nd straight increase, but down from more lofty growth earlier in the year. Investment in apartment construction shows no signs of cooling, marking its twenty-third month of at least double digit growth in August (+ 30.7% y/y). Single

unit construction investment growth was more restrained, up a scanty 0.1% over August 2012 levels.

Nationally, new home investment continues to cool, down 11.3% y/y in August.

Monetary Policy

Bank of Canada maintains interest rate

The Bank of Canada kept its key policy rate unchanged at 1%. The Bank hinted that interest rates may remain low for longer than previously thought given ongoing weakness in the outlook for consumer price growth. Inflation is not expected to return to the Bank's two percent target until the last quarter of 2015, a half year later than the Bank forecast in July. The weakness in inflation is in part due to slack in the Canadian economy that is not expected to be eliminated until the end of 2015.
