Labour Market

Strong job growth resumes

Alberta added 10,600 net new jobs in November after two months of modest gains. Over the last 12 months, Alberta has posted the highest employment growth among the provinces at 3.6%, having created 78,100 jobs. Alberta job gains over the last twelve months account for roughly 44% of net new jobs added in Canada (see chart).

Despite the strong job growth, the unemployment rate in Alberta moved up to 4.7% in November from 4.4%. Growth in the labour force (+18,000) outpaced the impressive job growth.

Building Permits

Value of permits jump

The total value of building permits in Alberta soared in October, increasing 23.6% y/y as a result of exceptional residential permit growth (+37.2%). Residential permits were led by exceptionally strong apartment and single dwelling numbers. The value of non-residential permits grew 6.0% over October 2012, with robust growth in commercial permits offset slightly by weak industrial numbers.

International Merchandise Trade

Exports continue to rally

Energy continues to drive exceptional growth in exports, with total exports increasing 19.0% in October over the same month last year. Exports have grown 6.8% year-to-date. Energy exports increased 26.1% and are now up 9.2% year-to-date. Basic & industrial chemical, plastics, and

Contact:

<u>Warren Kirkland</u> <u>Alexander Gainer</u> 780.427.8845 780.638.3238 rubber products continue to post strong growth, up 15.8% in October.

At the national level, exports increased 6.8% year-over-year due to energy, forestry, and basic & industrial chemical, plastics exports.

Residential Construction Investment

Investment breaks new ground

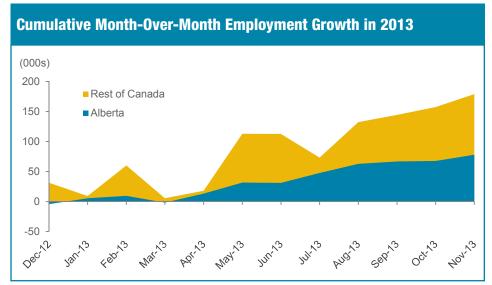

The value of residential construction investment in Alberta built on the record set last quarter, reaching \$4.2 billion in the third quarter, a 5.0% increase over Q3 2012. Construction of new dwellings continue to drive investment, increasing 11.4% in Q3, while renovations have fallen 10.0% over the same period.

Nationally, residential investment dropped 1.1% year-over-year in the third quarter, the first negative year-over-year reading since Q2 2011.

US Employment

Labour market showing signs of strength

The US economy added 203,000 jobs in November up slightly from 200,000 jobs in October. Meanwhile, the US unemployment rate fell 0.3 percentage points to 7.0%. Some of the decline in the unemployment rate was due to 377,000 fewer people on temporary layoffs, the bulk of whom were employees furloughed during the government shutdown. The strong jobs report was greeted enthusiastically by markets, the S&P 500, Dow Jones and Nasdaq were all up roughly 1% during the trading day.
