

Resale Housing Market

Average resale prices accelerate

The average price for an existing home in Alberta was \$384,305 in September, up 7.8% from September 2012. This was the largest year-over-year increase since April 2010, and was driven by strong gains in Calgary (8.7%) and Edmonton (8.1%). Sales edged down slightly from August, but were up 13.0% year-over-year. The sales-to-new listings ratio rose to 0.68 as listings dropped off, well above Canada's 0.56 ratio.

The national resale market continued to rebound in September: sales jumped 11.5% and prices rose 8.5% year-over-year.

Consumer Price Index

Alberta inflation edges down

Consumer price inflation in Alberta dropped to 1.3% in September, the lowest reading since April. September's inflation rate was brought down by declining gasoline and durable goods prices. Service prices continued to buoy headline inflation, increasing by 2.4% year-over-year. Inflation excluding the more volatile food and energy components also edged lower by 0.1 percentage points to 1.5% in September. Inflation has been subdued so far this year, averaging 1.4%.

Canada's inflation rate was unchanged in September at 1.1%. The core inflation rate, which strips out volatile components and is used by the Bank of Canada to gauge inflationary pressures, held steady at 1.3%.

Manufacturing Shipments

Shipments gain momentum

Manufacturing shipments rose sharply for the fourth straight month in August to \$6.5 billion. This is just shy of the three year high set in November 2011 and close to the record \$6.6 billion in July 2011. On a year-over-year (y/y) basis, shipments jumped 8.0% as higher energy prices supported a 21.0% surge in petroleum and coal product shipments. Chemical (+17.8% y/y) and machinery (+9.7% y/y) also contributed to August's strong report.

Nationally, shipments continue to hold steady, coming in around last year's levels for the second straight month.

Non-Residential Construction Investment (NRCI)

Alberta construction investment jumps

NRCI in Alberta jumped 4.9% in Q3 over the previous quarter and was up

5.7% compared with Q3 2012. The gain over the second quarter reflected strong construction investment in Calgary (+5.8%), with flood reconstruction likely contributing to the increase. The strong third quarter pulled year-to-date growth in NRCI up to 3.1%.

US Debt Ceiling Deal

Government shutdown ends

After nearly a month of political brinkmanship, the US Congress agreed to both suspend the statutory debt ceiling until February 7 and fund the federal government until January 15, 2014. Markets were up over 1% on the news of a deal. Furloughed federal employees have returned to work. They will receive back-pay for the time they missed.
