Average Weekly Earnings

Growth remains subdued

Weekly earnings in Alberta inched up to \$1,115 in September, a 2.6% increase over the same month last year. This is the third consecutive month that earnings have increased by less than 3% on a year-over-year (y/y) basis. Year-to-date, earnings have grown by 3.2%, almost two percentage points higher than consumer price inflation.

Farm Cash Receipts

Receipts tracking ahead of last year's record high

In Alberta's agriculture sector, strong crop production continues, which has helped offset recent price declines. In the first three quarters of 2013, Alberta farm receipts came in at \$9.1 billion, 2.1% above the same time last year. The year-to-date gain is entirely due to strength in the first quarter, as receipts were down year-over-year in both the second and third quarter. Despite strong growing conditions, total crop receipts dipped 18.1% y/y in the third quarter, as wheat, canola and barley prices all dropped sharply. Livestock receipts, which are about half of total farm receipts this year, are roughly unchanged on a year-to-date basis.

Investment in New Housing Construction

Breaking new heights

Alberta investment in new housing set a new high in September, up 5.8% y/y to \$928 million. Growth is up 12% year-to-date despite more moderate growth in recent months. Apartment investment shows no signs of slowing.

Contact:

Warren Kirkland
Alexander Gainer

780.427.8845 780.638.3238 up 24.0% in September, and 31% year-to-date. Single family home investment growth was more subdued, at 3.5% y/y. Nationally, new housing construction continues to trend lower, falling 7.5% y/y in September.

Rigs Drilling

Fewer rigs active

After three months of increasing activity, the average number of rigs drilling in Alberta decreased by 9.8% y/y in November. Year-to-date, the average number of rigs drilling remains 5.5% below last year.

Rail Transport of Crude Products

Tracking upwards

The rail industry continues to move increasing amounts of crude oil products. The amount of fuel oil and crude petroleum transported

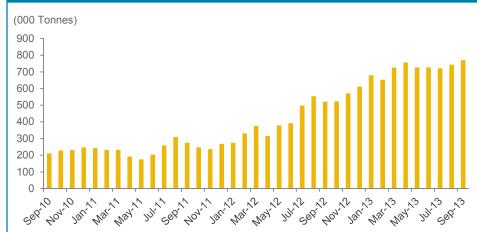

increased to about 770,000 tonnes in September, an all-time high. Tonnage of these products increased 48% over the same month last year, the 21st straight month of double digit growth. Year-to-date, the increase is 79%.

Canadian GDP Growth

Growth accelerates in the third quarter

The Canadian economy expanded by 2.7% (annualized) in the third quarter, up from 1.6% in the second quarter. The growth was the highest in two years, and partly reflected the rebound after the temporary disruptions of the Southern Alberta flooding and the Quebec construction strike. Both events hampered growth in the second quarter. Household consumption and inventories were the largest contributors to growth.

Rail Transport of Fuel Oils and Crude Petroleum from Western Canada
