Average Weekly Earnings

Construction industry leads growth

In August, average weekly earnings were up 1.3% to \$1,118 from September. Despite the monthly uptick, the year-over-year increase of 1.4% was the smallest since January 2010. This reflects an elevated base period, as earnings spiked in August 2012, and a leveling off of earnings since May (see chart).

The construction industry is an outlier, Average weekly earnings are growing faster in the construction industry than other major sectors of the economy, increasing 8.4% on a year over year basis. Construction earnings are up 6.4% year-to-date. Some of this might be due to reconstruction efforts after the flood, which has increased demand for construction workers.

Nationally average weekly wages rose 0.4 % over July to \$918. The gap between Alberta and the national average increased to \$199 from \$189 in the prior month. This time last year the gap stood at \$196.

Rigs Drilling

More rigs active

October marks the third consecutive month of gains in the number of active drilling rigs, a reversal of the downward trend in the latter half of 2012 and early 2013. In Alberta, there were an average of 239 rigs drilling in October, up 2.0% over October 2012. Utilization rates climbed 3.7 percentage points compared to last year.

Nationally, active rig counts climbed 1.7%.

Rail Transport of Crude Products

More barrels moving by rail

Transportation of crude oil products by rail continues to ramp up. The amount of crude products transported out of Western Canada rose to 743.5 thousand tonnes in August, close to an all-time high. This is the 20th consecutive month of at least double digit year-over-year growth, with tonnage increasing 34.3% above August 2012 levels. Year-to-date tonnage of crude products by rail is up 84.1% over the same time last year.

Bankruptcies

Insolvencies trend lower

Alberta has reached a new record low for business bankruptcies, with only 7 businesses facing insolvency in August, down 30.0% over the same month last year. Likewise, fewer households are filing, with consumer

bankruptcies dipping 16.5% over August 2012.

At the national level, 4.9% more bankruptcies were filed for businesses compared to a year ago, while consumers declared 4.1% less.

Real GDP by Industry

Robust growth fueled by oil and gas

After a decline in June, real GDP has been strong, rising 0.6% in July and 0.3% in August. August growth was driven by a 2.8% increase in oil and gas extraction industry, the third consecutive increase after supply disruptions caused declines in April and May. The August increase in oil and gas extraction GDP was mostly due to a 5.6% increase in nonconventional oil extraction, though conventional oil and gas extraction also increased, up 0.9%.
