

## Labour Market

### *Alberta job growth sustains momentum*

The province's employment posted another large increase in August (+15,200), building off July's gain (+16,600). This is the fourth notably strong increase in the last five months. Virtually all of the new jobs were in self-employed positions. August's job gains were evenly split between full-time and part-time positions. Year-over-year employment growth rose to 3.6%, the fastest pace since May 2012. Despite the impressive job gain, the province's unemployment rate increased 0.3 percentage points to 4.8% as 22,300 people joined the labour force in August (for more information on Alberta's rising labour force, see this month's [Labour InSight](#)). Despite the increase, Alberta holds the second-lowest unemployment rate in the country.

Canadian employment increased by 59,200 in August, pushing the unemployment rate down slightly to 7.1%. Job gains were concentrated among people over the age of 55.

## International Merchandise Exports

### *Exports bounce back*

Exports jumped 13.7% in July over the same month last year, on strong gains from the energy sector (+17.1%). Energy exports had a strong recovery with prices increasing sharply and refineries back in operation after closures earlier this year. Basic & industrial chemical, plastics & rubber products - the second largest contributor to exports - fell slightly from last month, though continues to post strong gains on a year-over-year basis. Overall, exports are up 4.8% year-to-date.

## Residential Construction

### *Investment jumps in second quarter*

The total nominal value of residential construction investment in Alberta hit a record level of \$4.1 billion in the second quarter of this year. This marks an 11.0% increase over the same period last year, with total investment up 9.4% year-to-date. Overall investment is being led by new dwelling investment, which jumped 16.0% over the second quarter of 2012, marking the seventh consecutive increase. Gains in new dwelling investment was tempered by renovation investment, which fell 2.2% from the same time last year.

Nationally, total investment edged up slightly (+2.1%) year-over-year due to stronger renovation spending.

## US Labour Market

### *Underwhelming jobs report*

The US economy added 169,000 payroll jobs in August, up from an increase of 104,000 jobs in July, but short of market expectations and below the average monthly job gain of 184,000 over the last 12 months.

The unemployment rate, which is calculated using a separate survey, ticked down 0.1 percentage points to 7.3%, the lowest rate since December 2008. The fall in the unemployment rate occurred entirely because fewer people were looking for work. The labour force participation rate (the share of the population that is employed or actively seeking employment) fell to 63.2%, a 30-year low.
