Bankruptcies

Insolvencies trend sharply lower

The number of Alberta businesses filing for bankruptcy fell 43.8% year-over-year in July, marking twelve straight months of declines. Fewer Alberta residents are facing bankruptcy, with filings falling 21.3% over the same month last year. While Alberta bankruptcies continue to trend well below last year's levels, national bankruptcies have leveled off after several months of declines (see chart).

Price Indices

Industrial product prices increase

The Industrial Product Price Index (IPPI), which measures the gate price Canadian manufacturers receive for their products, increased in August by 1.7% over August 2012. This is the largest increase since March 2012. Prices were affected by a 4.4% increase in the price of petroleum and coal products, principally diesel fuel and gasoline. Since many Canadian producers quote their prices in US dollars, the depreciation of the Canadian dollar also caused the IPPI to increase.

Oil drives raw material prices higher

Raw materials prices rose 5.0% year-over-year in August. The increase was mostly due to higher mineral fuel prices, particular higher oil, natural gas and coal prices.

Canada Real GDP by Industry

GDP recovers after record fall in June

Canadian real gross domestic product (GDP) jumped 0.6% in July after falling 0.5% in June. Many industries

Contact:

 Warren Kirkland
 780.427.8845

 Alexander Gainer
 780.638.3238

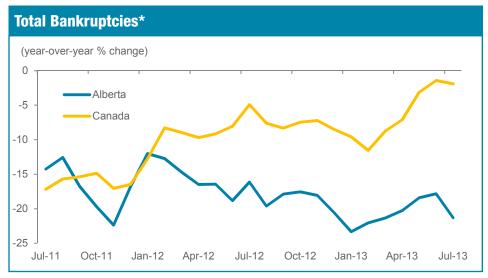

saw production fall substantially in June in part because of a labour dispute in Quebec and flooding in southern Alberta. Most of these industries saw production bounce back in July. Goods production increased 1.2% after falling 0.9% in June. The recovery was attributable to rebounds in construction, which was up 1.9% (-2.1% in June), and manufacturing, which was up 1.1% (-1.0% in June). Similarly, services production rose 0.3% in July after falling 0.3% in June, as wholesale and retail trade rebounded sharply.

GDP growth in the oil and gas sector moderated to 0.2% in July from 2.1% in June. The increase was entirely due to a 0.3% gain in conventional oil and gas extraction.

US Government Shutdown

Shutdown delays jobs report

The September US jobs report was not released today as originally scheduled, due to a partial US government shutdown which has immediately impacted about 800,000 federal jobs. The US congress failed to agree on a new budget that would keep the government fully funded, beyond October 1st. The shutdown adds to the uncertainty created by political brinkmanship in the lead up to the October 17th deadline for raising the debt ceiling. Republicans have asked for a number of policy concessions, including changes to the healthcare law, in exchange for a higher debt limit to keep government programs running.
