#### **Labour Market**

# Alberta unemployment holds steady in June

Alberta's employment was virtually unchanged in June (-700), after posting large gains in the previous two months. Despite the flat reading in June, year-to-date job growth remains strong, up 45,800 (2.1%). Service sector industries weighed on overall employment, with health care & social assistance (-6,600) and transportation & warehousing (-3,300) posting the largest drops. Gains in goods sector industries were partially offset by the declines in services as the agriculture (+2,800) and construction (+2,400) sectors posted solid gains.

June's small job loss, combined with 3,500 more people entering the labour force, resulted in the unemployment rate rising 0.2 percentage points to 5.0%. Despite this increase, Alberta was tied with Manitoba for the second lowest unemployment rate in Canada.

Canada's employment was also flat in June (-400), following an impressive gain in May. The national unemployment rate was unchanged for the month at 7.1%.

#### **Exports**

#### Exports climb in May

Exports experienced strong gains in May over the same month last year (11.7%). This was almost exclusively the result of energy exports, which surged (+12.3%) from May 2012. Strong year-over-year gains were also seen in farm fishing, and basic & industrial chemical, plastics & rubber products.

Total exports have been trending higher so far in 2013 after a notable downturn in the second half of 2012. The total value of exports in June was \$8.5 billion.

Nationally, total exports were up 2.4% year-over-year, driven by broadly based

gains in farm, fishing & intermediate foods, energy products, basic & industrial chemical, plastics & rubber products, and forestry products. Some industries, however, posted losses, notably in motor vehicle and parts, and metal and non-metallic mineral products.

# **US Employment**

# US employment beats market expectations

The US economy added 195,000 jobs in June. This was ahead of market expectations of 165,000 and slightly above the average monthly gain of 182,000 over the past 12 months. In addition to June's job numbers, estimated changes in non-farm payrolls for April and May were revised up by a combined 70,000

jobs. Despite the job gains, the US unemployment rate was unchanged from May to June at 7.6%.

#### **Canadian Dollar**

# Loonie hits 21-month low against US dollar

The Canadian dollar has depreciated by about 5 cents against the US dollar over the last three weeks. On July 2, the loonie closed at its lowest level since early October 2011 at US94.8¢/\$CAN. The recent drop in the Canadian dollar comes amid the Federal Reserve's recent announcement that it might curtail its US\$85 billion per month bond buying program in the near future, contributing to a rise in the US dollar against many currencies, including Canada's.
